Western Maryland College

1911-1912

Westminster, Maryland
FORTY-FIFTH

ANNUAL CATALOGUE

OF THE

Western Maryland College

AT

WESTMINSTER, MARYLAND

1911-1912
Special Information

And where to look for it in the Catalogue.

The College Year Begins on Wednesday, September 18th. Students Should Not Plan to Arrive Earlier than Tuesday. See pages 4 and 5.

What Courses of Study Are Offered? Pages 43-46
What Are the Conditions and Requirements for Admission? Pages 33-37
What Opportunity for Those Not Ready for College? Pages 71-77
What Will It Cost? Pages 66-68
What Are the Living Arrangements and What Outfit Is Necessary? Pages 18, 20, 29
What Scholarships Are Offered and How Secured? Page 22
What Training May Be Had in Music and Elocution? Pages 61-63
What Religious Control is Exercised? Page 21

The College Year

The College Year consists of Thirty-six weeks divided into three terms of Thirteen, Twelve and Eleven weeks respectively.

The First Term opens on the Third Wednesday in September and continues thirteen weeks to Christmas Holidays.

The Second Term opens on the Wednesday following the first day of January and continues twelve weeks.

The Third Term opens immediately upon the close of the Second Term and continues eleven weeks, closing with Commencement Day on the Wednesday following the second Sunday in June.

Calendar for the Year 1912--1913

FIRST TERM

1912

September 18, Wednesday ....... Forty-sixth Year begins at 10.30 A. M. Examinations for admission.
Sept. 19, Thursday, 8.45 A. M. - First Chapel. Class room work begins on the regular daily schedule.
Sept 20, Friday, 2.05 P. M. - Introductory Lecture.
Oct. 7, Monday, 3.30 P. M. - Members of the Sophomore Class taking the full course meet to elect officers.
November 28, Thursday - Thanksgiving Day Recess. Anniversary of the Webster and the Browning Literary Societies.
Dec. 12-18, Thurs- Wed. - Term Examinations of all the classes.
Dec. 18, Wednesday, 12 M. - Christmas Holidays begin.
SECOND TERM

1913

January 2, Thursday, 10.30 A. M. Second Term begins.

February 21, Friday - Anniversary of the Irving and the Philo-

mathean Literary Societies.

March 7, Friday, 8.00 P. M. - Preliminary Trial for the Inter-Collegiate

Oratorical Contest. Names submitted by Societies for June Oratorical Con-
testants.

March 14-20, Friday-Thursday - Term Examinations of all the Classes.
March 20, Thursday, 12 M. - Second Term Ends.

EASTER RECESS, March 20, Thursday, 12 M. to March 26,

Wednesday, 10.30 A. M.

THIRD TERM

March 6, Wed., 10.30 A. M. - Third Term begins. Seniors invested
with Academic Costume.

April 11, Friday, 3.30 P.M. - Submission of subjects by Seniors for
Graduating Essays and Orations.

May 5, Monday, 3.30 P. M. - Essays and Orations for Society Contests
submitted.

May 9, Friday, 3.30 P. M. - Graduating Essays and Orations Sub-
mittted.

May 26-30, Monday-Friday - Senior Final Examinations.
June 2-6, Monday-Friday - Term Examinations of all the classes ex-
cept the Senior.

COMMENCEMENT WEEK, JUNE 8-11

SUNDAY—WEDNESDAY

Sunday, 10.30 A. M. - Baccalaureate Sermon.
Sunday, 8 P. M. - Christian Association Sermon.
Monday, 2 P. M. - Society Reunions.
Monday, 8 P. M. - Commencement Exercises of the Schools
of Music and Elocution.
Tuesday, 10 A. M. - Annual Meeting of the Board of Trustees.
Tuesday, 4 P. M. - Annual Meeting of the Alumni Associa-
tion.
Tuesday, 8 P. M. - Society Contest.
Wednesday, 10 A. M. - Forty-Third Commencement.

  Director of Gymnasium for Young Men

JOSHUA WEBSTER HERING, A. M., M. D., LL. D.,
  Lecturer on Physiology and Hygiene
Historical

Western Maryland College is the outgrowth of a private Academy started in Westminster in the year 1860.

The movement for enlarging the Academy into a College began in 1866, but under such disadvantageous circumstances as to make its failure almost a certainty.

One simple incident gave the movement its only promise of success. In the spring of 1866, Rev. J. T. Ward, D. D., a member of the Maryland Annual Conference of the Methodist Protestant Church, retired from the active intinerancy and settled in Westminster. It happened that Dr. Ward possessed in a marked degree the confidence and affection of Mr. John Smith and Mr. Isaac C. Baile, both of Westminster and men of considerable wealth. These gentlemen, Mr. Smith in particular, will their friend and former pastor, agreed to loan to the prospect of venturing something in an enterprise endorsed by priector of the Academy the money with which to erect the first building, provided Dr. Ward was placed in charge of the College as President. Mr. Smith also suggested that the institution should be called, "Western Maryland College." Both these suggestions were accepted; the cornerstone of the first building was laid September 6th, 1866, and the first session of Western Maryland College was opened September 4th, 1867, with six professors and seventy-three students.

The enterprise was thus only begun, and its difficulties accumulated so fast that it would undoubtedly have come to an end in less than a year, but for the interposition of the Maryland Annual Conference of the Methodist Protestant Church. This body had not been officially
connected with the enterprise at all up to this time, as it was in fact a private concern, but those most deeply interested in the College were members of that church, and hence it was natural that a report should be made to that body, particularly when disaster seemed impending. The report made to the Conference in March, 1868, showed that the one building begun was still unfinished, that the money advanced by Mr. Smith and Mr. Baile was all spent, and that the property was covered by liens for nearly as much more. The Conference determined to save the institution, and accordingly named thirty-three men as a Board of Trustees, who were authorized to become incorporated, to purchase the property, to assume the indebtedness, and to appoint an agent to solicit funds.

The charter was obtained March 30th, 1868; the property purchased August 12th, 1868, and on September 14th, 1868, the College opened its second session under the new auspices and began its long struggle for resources and reputation.

Rev. J. T. Ward, D. D., remained in the Presidency until released at his own request in 1886, when he was succeeded by the present incumbent.

**CONNECTION WITH THE CHURCH**

The College has been under the fostering care of the Methodist Protestant Church from the beginning. Members of that church have given largely of their time and effort and means to establish it, and its success is attributable, more than to any other factor, to the interest thus manifested. The Charter requires that twelve of the thirty-three trustees shall always be chosen from among members of the Maryland Annual Conference of the Methodist Protestant Church. In this sense it is a de-
nominational institution. But its Charter forbids it to be a sectarian institution, declaring that,

"the youth of every religious denomination shall be freely admitted to equal privileges and advantages of education and to all the literary honors of the College without requiring or enforcing any religious or civil test......nor shall any preference be given in the choice of a President, Master, Tutor or Teacher in the said College on account of his or her particular religious profession."

**CONNECTION WITH THE STATE**

The General Assembly of Maryland granted a Charter to the College in 1868, giving the Trustees power to hold property, elect a Faculty and confer degrees "in any of the arts, sciences and liberal professions to which persons are usually admitted in any other Colleges or Universities in America."

Further recognition of the College as one of its important agencies for higher education was given when the General Assembly in 1878 assigned to it a number of the free scholarships which had been founded some years before for the education of those intending to teach in the Public Schools of the State. For the better preparation of such students the College has established a course in Pedagogy; and those completing this course receive a Certificate from the State Board of Education, authorizing them to teach in any of the Elementary and High Schools of the State. In this sense, therefore, the College is a State institution; but its hospitality has been extended as well to those who come from many other States.

During the last twenty years the College has maintained a steady advance in all directions. This might almost be called the "Building Era." Whereas, up to
1886, it had erected but three buildings, costing altogether less than $30,000; it has since that time erected nineteen buildings, costing Three Hundred Thousand dollars, including equipment and apparatus.

Western Maryland College came in with the advent of modern educational ideas, and, unhampered by traditions, it has been free to build for the present and the future.

It led the way in that form of co-education which is rapidly displacing both the absolute separation of the sexes and the education of them in the same classes. It was the first College in the State to employ a Physical Director and to build a Gymnasium; and its recognition of Libraries and Laboratories as indispensable adjuncts to the class-room has resulted in adequate and constantly growing provision in these directions.

The last undertaking of the College has been to raise an Endowment Fund. The Trustees and the Alumni have had committees prosecuting the work with gratifying success, the former aiming at $50,000, the latter at $10,000. Both these sums have been realized and safely invested. But a much greater endowment must be raised before the hopes and ambitions of its friends are realized.
GENERAL INFORMATION
General Information

LOCATION

The College is located in Westminster, Carroll County, Maryland, a city of about four thousand inhabitants, thirty-four miles west of Baltimore, with which it is connected by the Western Maryland Railroad. Westminster is situated in one of the most healthy and beautiful parts of Maryland, and no place could be more desirable as the site for an institution of learning. It is quiet and retired, yet easily accessible and in ready communication with the outside world by railroad, telegraph and telephone. Its streets are lighted by electricity; it has an abundant supply of pure water; its inhabitants breathe an invigorating mountain air, and enjoy the advantages and refinement of a modern city.

The College occupies an eminence at the west end of the city, about one thousand feet above tidewater, which affords a view rarely equaled in extent, variety and beauty.

THE PECULIAR ADVANTAGE

This College offers is that parents can have their sons and daughters educated in the same institution and under the same instruction. It was the first College in the South to offer equal educational facilities to both sexes. But it is not strictly co-educational. Although both sexes have the same instructors, they do not recite together and the two departments are kept entirely separate, the students meeting only at chapel service and in the dining-room with members of the Faculty, and at no other time unless under similar supervision.
DOMESTIC ARRANGEMENTS

The President, with his family, resides in the College campus, and, with the Preceptress and other members of the Faculty, who reside in the College, constantly seeks to provide all the comforts and enjoyments of a well ordered home. Receptions are held once a week, when all the students are brought together for social recreation and for the acquirement of ease and grace in the customs of polite society.

The boarding department is in charge of a housekeeper and steward, under the direction of the President. The table is furnished with wholesome food in abundance, prepared with constant attention to variety and with the view of rendering reasonable complaint impossible.

STUDENT'S OUTFIT

Non-resident students must board in the College. It is expected that each room will be occupied by two boarding students. All necessary furniture is provided, but students are expected to pay for any damage while in possession. It is necessary for each student to bring the following: four sheets for a single bed, pillow, two pillow-cases, blanket, spread, towels, one fork and teaspoon, napkins and napkin-ring.

All the above articles must be marked in plain letters with the owner's name.

ABSENCE FROM COLLEGE AND VISITING

It is the aim of the College to make the students thoroughly at home and to prevent in every way any dissi-
pation of their interest in study. To this end the earnest co-operation of parents and guardians is solicited. Students should be sent promptly at the beginning of the term, and after they have entered should not be removed, even for a day, unless it be absolutely unavoidable. The Faculty has observed the distracting influence incident to students leaving College for social visits, and discourages all such visits in every possible way. In the case of relatives, or where there are special reasons, students may be permitted to spend the day away from College if it does not interfere with stated work. Otherwise parents must not expect that leave of absence will be given except to return home. In this case the Faculty also earnestly requests parents to bear in mind that frequent absences from study make progress impossible. With the long holiday recess at Christmas and the short recess at Easter, the school term is broken up quite enough, and students should be sent back to their work promptly at the end of the recess. The school closes about a week before Christmas Day, and students who leave before the closing day will miss one or more of their examinations. All extra examinations made necessary by students leaving before the time will be charged for at the rate of one dollar for each examination.

Visitors to the College will always be welcome under the following conditions: No person can visit a young lady in the College without a letter from her parents and the approval of the Faculty. No visits are allowed on Sunday. Relatives visiting students must not expect any of the College regulations to be abrogated on account of their presence. The College cannot entertain visitors, but the President will take pleasure in having every attention shown those who may be interested in seeing the College or its students, and will give any information in
regard to hotels and boarding houses, where comfortable accommodations may be secured in Westminster.

**DRESS**

The College does not prescribe a uniform dress, believing that its tendency is destructive of the rightful individuality of the student. But the influence of the College, and even its authority where necessary, will be exerted in favor of plain and economical dressing, so manifestly becoming to young people at school. There are no social functions at the College where full dress is allowed. As to the young ladies, there seems to be no good reason why most of their dressmaking cannot be done at home, thus giving parents the opportunity to limit the expense and direct the style. In preparing the outfit, parents should remember that college life does not call for display in dress, and that it is usually a sign of bad taste.

The members of the Senior Class are required to wear the academic cap and gown on all public occasions during the third term and at Commencement. This makes expensive Commencement outfits unnecessary.

Both male and female students are required to have special suits for the exercises which are taken daily in the Gymnasium. Suits for the young ladies consist of a loose blouse and bloomers made of navy blue flannel. They can be made at home over the patterns found in all Fashion Magazines. Suits for young men are best ordered here. They can be bought cheaper than they can be made at home. The whole outfit will not cost more than $2. Rubber-soled shoes for the Gymnasium cost about fifty cents.
Western Maryland College was founded by Christian men, and is distinctively a Christian College. It holds the promotion of spiritual culture in accordance with the principles of the New Testament above every other kind of education in importance. And while it exacts no religious tests of its students, and makes no attempt to influence denominational preferences, yet it encourages all proper efforts to uphold and extend the religious influences which have happily been a marked feature of college life at this place from the beginning.

The students are required to attend religious exercises which are held at the beginning of every school day, and are required to attend divine service on Sunday morning at some church in Westminster. The following denominations are represented in the city: Methodist Protestant, Methodist Episcopal, Protestant Episcopal, Roman Catholic, Reformed, Lutheran, German Baptist. The church affiliations of students will be scrupulously respected, and only those will be required to attend the Methodist Protestant Church who have no church of their own in the city.

On Sunday evening services are conducted in Baker Chapel by the President, which the students are required to attend. The Young Men's Christian Association and the Young Women's Christian Association have each a branch association in the College and rooms fitted up for religious services. On Sunday afternoon a voluntary meeting of the two associations is held, conducted by the Y.M. C. A. The Sunday School held on Sunday morning is one of our most important religious factors. Though attendance is not compulsory, all the students usually enroll themselves as scholars. The classes are taught by
members of the Faculty, and the lessons used are those of the International Series.

LITERARY SOCIETIES

The Irving and Webster Literary Societies of young men, and the Browning and Philomathean Societies of young women hold regular meetings, and it is the desire of the Faculty that all the students avail themselves of the advantages of these valuable and instructive organizations. No secret societies are permitted in the College.

On Tuesday evening of Commencement Week there is an oratorical and literary contest between the Irving and the Webster Societies, and between the Browning and the Philomathean Societies. The award for the former societies is a trophy presented by the late Prof. A. H. Merrill, Professor of Elocution in the College; for the latter a trophy presented by the late Prof. M. A. Newell, State Superintendent of Education in Maryland.

STATE SCHOLARSHIPS

An act of the General Assembly of Maryland enables the College to furnish tuition, board, fuel, lights and laundry free to two students (one male and one female) from each legislative district of the State, to be appointed by the School Commissioners, by and with the advice and consent of the senators in their respective districts, after a competitive examination of the candidates. A scholarship cannot be held by the same student for more than four years, and the holder is required to give bond to the state of Maryland for such amount, with such security as may be approved by the President of the College, that he (or she) will teach school within the State
for not less than two years after leaving College. In order to enable the Faculty to carry out fully the intention of the Act of the Legislature providing for these scholarships it is highly important that the School Commissioners of the several districts should be careful to appoint students prepared to enter at least the Freshman Class. If, however, any of the candidates selected are deficient in preparation, they will be received in the Preparatory School of the College; but no student under fifteen years of age will be received.

BUILDINGS

I. THE MAIN BUILDING.—This is the central and original part, erected in 1866, of an edifice that now has five wings, with front and flanking towers, with an extreme length of two hundred and eighty feet and a depth of one hundred and thirty-eight feet. The central portion is four stories high, and has on the first floor various administration offices and a large reception parlor; on the second and third floors the apartments of teachers and students, and on the fourth floor the whole space is given up to the Art Department.

2. OWINGS HALL.—This is a wing of the main building, erected in 1871, and named for Miss Lottie A. Owings, for many years preceptress. It extends back from the main building fifty-five feet, and is four stories high. The fourth floor is divided up into small rooms for piano practice; the third and second floors contain rooms for female students, and the first floor is the infirmary. In the basement is the steam laundry.

3. SMITH HALL.—This wing was built in 1887, and is named for Mr. John Smith, the first President of the Board of Trustees. It is a front extension of the
main building on the east side. In the basement is the dining hall, capable of seating at table two hundred and fifty persons; on the first floor are the assembly room, where morning prayers are held every school day and where the students meet for public academic exercises, the school room and private study for young ladies. The second floor contains sleeping rooms for young ladies.

4. HERING HALL.—Another wing erected in 1890, and named for Dr. J. W. Hering, the first Treasurer of the Board and now President. This building is a front extension of the main building on the west side, and is fitted up in the most modern way for recitation rooms of the various departments. It has also a small lecture hall with fifty chairs, and a room eighty feet long for social receptions.

5. WARD HALL.—This wing, built in 1895 to take the place of the smaller building erected in 1882 by contributions secured by Dr. J. T. Ward, the first President of the College, is named for Dr. Ward. It is a rear extension to Hering Hall, three stories high, and is fitted up as a modern home for male boarding students. The rooms are large, each lighted by two windows and open to the sun. In the basement are recitation rooms and private studies for male students.

6. MAMIE McKINSTRY HALL.—Another wing to the main building was built in 1899 as a rear extension to Smith Hall, corresponding to Ward Hall. It provides in the basement the kitchen, bakery and pantry; on the first and second floors additional sleeping rooms for the young ladies. An extension to this hall was added in 1907 to provide for more sleeping rooms; and by action of the Board of Trustees the hall was named for a grad-
uate of the class of 1879, deceased, who designed that the College should have a bequest from her estate.

7. YINGLING SCIENCE HALL.—This building was erected in 1889 and given to the College by the late Miss Anna R. Yingling, of Westminster, Maryland, a graduate of the class of 1871.

It was intended and used at first for a gymnasium, but becoming too small, it was in 1903 completely re-modeled and fitted up for the Sciences. The first floor has a recitation room and two laboratories for Physics. The second floor has similar provision for Chemistry and Biology. In the tower there is a small class room, over which is the astronomical dome containing the telescope.

8. THE PRESIDENT’S HOUSE.—This is a stone and frame structure, built in 1889, and given to the College by Daniel Baker’s Sons, of Buckeystown, Md.

9. LEVINE HALL.—Erected in 1891 by a mortuary contribution from Dr. Charles Billingslea, of Westminster, Maryland, as a memorial to his son, James Levine. It was intended at first for the Primary Department, but when that was abolished in 1899 it was greatly enlarged and fitted up for the Preparatory School. It contains sleeping rooms for all male students not in the College Classes, and recitation rooms, Principal’s office, library and bath rooms.

10. Y. M. C. A. HALL.—Erected in 1893 and devoted to the work of the Association. It has a well furnished audience room and a committee and reading room.

11. BAKER CHAPEL.—This is a stone structure built in 1895 by a contribution of Mr. William G. Baker, of Buckeystown, Maryland, as a thank-offering. The students assemble here on Sunday morning for Sunday School, and on Sunday evening the President of the College preaches during the school year.
12, 13, 14 and 15. PROFESSORS’ RESIDENCES.—
One for the Professor of Mathematics, built in 1896, and
another for the Professor of French, built in 1899, an-
other bought and improved in 1901, and another in 1903.

16. ALUMNI HALL.—This is the largest and most
expensive structure which has yet been built at the Col-
lege. It was completed in 1899, has two stories and a
basement, with extreme width of eighty-three feet and a
depth of one hundred and nine feet. In the first story
are the assembly, committee and banqueting rooms of
the Alumni Association and the halls of the Literary So-
cieties. The second story contains an auditorium, with
main floor and balcony and stage, capable of seating
twelve hundred persons.

17. GYMNASIUM.—A new two-story brick struc-
ture was erected in 1904 to take the place of the old
Gymnasium, which had become too small. On the first
floor are the men’s lockers, toilets and baths, with abun-
dance of hot and cold water. A bowling alley is also on
this floor fitted up with two regulation alleys.

The main floor is a clear space forty by sixty-two
feet and eighteen feet high to the square. A gallery
five feet wide around the four sides with an inclined
floor furnishes an admirable running track.

The Gymnasium is fitted up with complete apparatus
for the best method of physical development, which is
regarded as an important part of the College work.

As the Gymnasium is intended for both sexes, the
ladies have access to it from their bath rooms in Owings
Hall by means of a covered bridge.

18, 19 and 20. RESIDENCES.—Owned by the Col-
lege and occupied by the Chief Engineer, the Butler and
the Watchman.
21. LIBRARY AND ADMINISTRATION BUILDING.—This structure, begun in 1908, and completed a year later, is the most ornate of all the College group. It is built of Indiana limestone and gray hydraulic pressed brick, the design being free Roman Doric, showing massive engaged stone columns. It has a frontage of 65 feet and a uniform depth of 50 feet, and is three stories in height.

The main floor provides offices for the President and Treasurer, a Faculty and Board Room and a Museum. On the ground floor are excellent halls for the Browning and Philomathean Literary Societies. The entire second floor is devoted to the Library, the Reading Room being 30 by 60 feet, and a twenty-two foot ceiling, and the adjacent stack room, 20 by 60 feet, with a mezzanine floor, has a capacity of 25,000 volumes.

The rooms are all finished in high panel work of English white oak and are enriched with stucco pilasters and cornices.

EQUIPMENT

LIBRARY.—In the large and well lighted rooms of the Library Building the College has placed about eight thousand carefully selected volumes, nearly all of which have been purchased in recent years with the view of meeting the special needs of students in supplementing the instruction of the various departments. A librarian is in charge, and the Library is open from 9 A. M. to 5 P. M. for the use of all students. On Sundays students have access to a part of the Library selected with special reference to moral and spiritual improvement. In addition to the reading designated in the departments of study, the professors are always ready to assist students in matters of research of special interest to them. In
addition, the Preparatory School has a library in Levine Hall, and the Literary Societies all own libraries, which are open to their members. In the College Library are also to be found a good mineralogical collection, a cabinet of curios and charts, maps, etc.

LABORATORIES AND APPARATUS... The Chemical Laboratory is fitted up with the usual modern arrangements for individual work—separate tables and drawers supplied with gas and water, and a good collection of working apparatus. Similar provision is made for the Department of Physics. Apparatus is provided for illustrating the course before the class and for individual work, which all students are required to do. A shop is also at the disposal of those who wish to do experimental work. The biological laboratory is equipped with all the regular apparatus necessary for doing thorough work in morphology, embryology and histology. It includes compound and simple microscopes, a microtome, paraffin bath and the usual accessories of glassware, reagents, etc. There is a working collection of several hundred zoological specimens, representing the important classes of vertebrates and invertebrates. The Department of Mathematics and Astronomy has a telescope made by Saegmuller, which is a refractor with a five-inch object glass, equatorially mounted and driven by clockwork, and a very complete engineer’s transit, also made by Saegmuller. The Department of Music is provided with fourteen pianos for practice, all recently purchased new, a Chickering Concert Grand used in recitals, a Chickering Parlor Grand, and a two-manual pipe organ made by Brown.

PHYSICAL CULTURE.—A large part of the fourteen acres belonging to the College Campus is devoted exclusively to out-door sports, while the gymnasium,
fully equipped with the best modern apparatus, furnishes ample provision for in-door exercises and physical development. The usual sports are baseball, football, tennis and golf. Parents who object to their children engaging in any of these sports should make known their objection to the Faculty, who will see that their wishes are respected.

DOMESTIC.—The home life of students is provided for in a modern and comfortable way. Each room is intended for the occupancy of two students, and is large enough to serve as sleeping room and study. There are also a few single rooms. They are all furnished. A large steam plant in a separate building provides heat for each room through its own radiator. An electric light plant also provides light for each room. Thus the minimum of danger from fire is reached. Bath-rooms, with hot and cold water, are located on the second floor of Smith Hall for the young ladies, and in the gymnasium for young men. All students who do not live in Westminster are boarded at the College. The kitchen, pantries and dining room are fitted up with the best facilities for serving meals, so as to make the service as free from objection as possible. There is a large steam laundry, with the latest appliances. For students living in Westminster, besides the general study halls, where accommodations are free, there are separate study rooms, which two or more students may occupy for a small fee.

ASSIGNMENT OF ROOMS

Old students have the preference in the assignment of rooms in the order of classes. New students are assigned to rooms in the order of application. Where it is desired, the President will give special attention to the
selection of room-mates, so as to meet the wishes of parents in this important matter. Two students occupy each room, but there are a few smaller rooms which may be occupied by one student alone. In such cases an extra charge of $5 a term is made.

THE INFIRMARY

In a retired portion of the building six large rooms have been fitted up as an infirmary, where students are given special attention. No extra fee is charged for attendance, unless a special nurse is needed.
ADMISSION AND EXAMINATION OF STUDENTS
Conditions of Admission

1. Both men and women are received as students. They are taught by the same teachers and in practically the same courses of study, although they recite separately and compete for separate honors.

2. Students not prepared for the collegiate course have the very best attention given them in the Preparatory School.

3. Candidates for admission into any class must come well recommended as to moral character (if from another institution of learning with suitable testimonials) and be examined in the studies already pursued by that class.

4. Students must agree to take all the studies of the class entered, unless excused from any portion thereof at the time of entering. No student shall of his own option drop a study during a session. Communications from parents or guardians in reference to studies should be addressed to the President, who will promptly lay them before the Faculty for consideration. But the Faculty reserves the right of final decision.

5. Each student, upon entering, is required to sign a pledge to obey all the rules of the institution, a printed copy of which is at the same time furnished him.
Entrance Examinations

Candidates may be examined during the week preceding Commencement Week, and they are advised to avail themselves of the opportunity in order to qualify themselves by September in any studies in which they may be found deficient. Those who cannot apply at this time will be examined at the beginning of the school year.

Candidates for the Freshman Class first fill out a blank showing their progress in all studies they have pursued. They may also present certificates of work already done.

Students not fully prepared in all the requirements for the Freshman Class may be accepted with conditions in not more than two of the six studies named below, provided neither of these conditions is Algebra or Latin.

1. English

The examination in English is divided into three parts, Grammar, Composition and Literature, the last two being given in one examination.

   a. The examination in English Grammar must always be taken first, and no candidate who fails in this subject will be further considered for the Freshman Class. Any text-book will answer for preparation. The questions will cover the whole subject, particular attention being given to Syntax and the Analysis of Sentences. Time for this examination, one hour.

   b. Composition and Literature. In English Composition as much is required as is found in Lockwood’s Lessons or Hill’s Beginnings. But the main emphasis is laid on the candidate’s ability to write good English.
Penmanship, spelling, punctuation, paragraphing and clearness will all be reckoned in the estimate.

The test will take the form of short compositions on topics assigned from books which must be studied with this in view. These books are: Irving’s “Sketch Book,” Longfellow’s “Evangeline,” Lowell’s “The Vision of Sir Launfal,” Shakespeare’s “Merchant of Venice,” and Scott’s “Lady of the Lake.” These books must be studied so that the candidate will be familiar enough with their subject matter, form and structure to write rapidly and accurately about them.

To test the candidate’s knowledge of Literature, questions of a general character will be asked upon the following books, to answer which it will be sufficient for the candidate to have carefully read them: Webster’s “Bunker Hill Monument Oration;” Shakespeare’s “Julius Caesar;” Macaulay’s “Essay on Addison;” George Eliot’s “Silas Marner.”

One hour and a half will be given to this examination.

2. MATHEMATICS

a. Arithmetic. The examination will cover the whole subject. Problems will be selected especially to show methods and processes. Time, one hour.

b. Algebra. The requirement in Algebra extends to Quadratic Equations, including the fundamental principles, factoring, fractions, equations of the first degree in one or more unknown quantities and problems leading to such equations, involution, evolution and theory of exponents. One hour.

c. Plane Geometry. Definitions, statement and demonstrations of theorems, constructions, and original
exercises involving the general properties of plane rectilineal figures and the circle. One hour.

3. **LATIN**

As much Latin is required for entrance as is usually done in three years in the High School. The examination will be given in two parts. The first part of the work is:

a. Latin Grammar. As much will be covered in this examination as is contained in Collar and Daniell's First Latin Book. Candidates must be thoroughly familiar with forms and able to translate easy sentences from Latin into English and from English into Latin. The sentences will all be taken from the First Latin Book. Time, one hour and a half.

b. The second part of the work includes reading five periods a week for not less than a year.

Caesar, Books I, II, III.
Cicero, First three orations.

Students who pass the first part of this examination only must enter the Upper Sub-Freshman Class. Time, one hour and a half.

4. **HISTORY**

a. Certificates of work done in U. S. History will be accepted in lieu of an examination.

b. Ancient History, covering Greek, Roman and up to 800 A. D. A text-book such as Myers' General History covers the requirements for this examination.

5. **PHYSIOLOGY AND PHYSIOGRAPHY**

A certificate of one-half year's work done in each of these subjects will be accepted in lieu of an examination.
6. PHYSICS

A year's work in Physics in books like Avery's or Gage's Elementary Physics is required. If this work has been done in a High School the certificate will be accepted.

ADMISSION WITHOUT EXAMINATION

Those who present certificates of graduation from approved High Schools will be admitted to the Freshman Class without examination, provided their course of study has included Latin of sufficient extent. If such candidates desire to enter a class higher than Freshman, they must pass an examination on all the work pursued by the class below that which they desire to enter.

TERM AND DEFICIENCY EXAMINATIONS

Examinations of all the classes are held at the close of each term. The results of these examinations are combined with the recitation marks to make up a student's grade for the term.

Whenever a student aggregates three absences from any department he is given a special examination in that department.

If a student shows marked deficiency in any study, the professor in charge may require him to take a special examination at any time during the term to determine whether he shall continue with the class.

GRADERS AND AWARDS

The scholastic standing of the students is determined
by a system of grading, the scale of which is from 1 to 10. A student who makes a grade of seven or over in a department for the year or the part of the year in which the studies of the department are pursued, is passed. The general average of a student is found by adding the grades for the year in each department and dividing by the number of departments.

These grades are recorded on the College books, but not reported. The scholastic standing of students is reported by letters. Those making an average between 9.5 and 10 are reported, "A"; those between 9 and 9.5, "B"; those between 8 and 9, "C"; those between 7 and 8, "D"; those below 7, "E" and are not passed.

Students who obtain on all the regular studies in any department an average under 7 and over 5, may, at the discretion of the Faculty and with the consent of the Professor in charge of the department, be continued with their class, but with the distinct understanding that they cannot be graduated unless they make up the deficiency.

At the Annual Commencement honors are awarded in accordance with the following requirements:

Honorable mention is given to those students making a grade of 9 or over in each course of the full curriculum of their respective classes or a general average grade of 9.4.

(In the above statement the word "course" has the meaning attached to it under "Courses of Study by Departments."

In the Senior Class the student receiving the highest grade for the Senior and Junior years receives the honor of the Valedictory; the next the Salutatory. Six speakers are chosen for Commencement parts on their grades for the preparation and delivery of the essays and orations of the Junior and Senior years. All students who
receive Honorable Mention in the Junior and Senior years, or in the Senior, Sophomore and Freshman years, are graduated Cum Laude, and all students who receive Honorable Mention in the four years of the course are graduated Summa Cum Laude. Students who enter the College as Sophomores will be eligible to Summa Cum Laude provided they make an average of 9 or more in all their entrance examinations.

In the Junior, Sophomore and Freshman Classes gold medals are awarded to the student making the highest general average, provided he is entitled to Honorable Mention.

Gold medals are also awarded to graduates doing the best work in Instrumental Music, Vocal Music and Elocution.

The Norment Prizes founded by the late Samuel Norment, Esq., of Washington, D. C., are Gold Medals given to the students of the Sophomore and Freshman Classes excelling in Elocution.

The Bates Prize, founded by Edward Bayley Bates, '98, in memory of Rev. Lawrence Webster Bates, D. D., is a gold medal awarded to the member of the graduating class who has made the best record during his undergraduate course as a College man.

**HONOR CONDITIONS**

1. No honors will be bestowed on any student who has been guilty of any flagrant misconduct during the year, or who has received 75 demerits; nor will such students be allowed to compete in any contest during Commencement Week.

2. No student may compete in more than one contest at Commencement.
3. No student may compete in any contest at Commencement unless he is taking the full course of study and has passed in each subject.

REPORT TO PARENTS AND GUARDIANS

At the end of each term a report is sent to parents and guardians showing the scholastic standing of students and the character of their deportment.

In addition to these term reports, each member of the Freshman Class is reported separately at the end of each month, except those months when term reports are sent, to show the character of each student's progress, in order that parents and guardians may co-operate with the College in keeping the youngest students from falling behind in their work.

DEGREE OF A. B.

The degree of Bachelor of Arts is conferred upon all who complete either the Classical, Scientific or Historical course of study to the satisfaction of the Faculty.
COURSES OF STUDY
Courses of Study by Groups

The courses of study are arranged in three groups, each covering four years and leading to the degree of Bachelor of Arts.

In the Freshman and Sophomore years the groups are alike in all respects, except that French and German may be substituted for Greek by male students.

In the Junior and Senior years the groups all differ, and are designated, in accordance with their predominating studies, the Classical, the Scientific and the Historical.

Those taking Greek in the Freshman and Sophomore years and choosing the Scientific or the Historical Course, must take German D in the Junior year, and French E in the Senior year.

Students taking Music are not required to take Elocution. In the Junior and Senior years students who have advanced far enough in Music or Elocution to graduate in these studies in two years may substitute either of them for French or German in the Junior year; and for English, Geology or Astronomy in the Senior year. But in any case either Geology or Astronomy must be taken. With these exceptions, all the courses must be taken as here laid down for graduation.

Students may be admitted to these courses who are not candidates for graduation as partial course students; but they will be required to meet the conditions for admission and take the term examinations as other students. They may substitute Piano, Voice, or (after the Sophomore year) Elocution for any study in the course, except language.
The letters appended to the studies in the program indicate Courses, which are fully described in the pages following, under "Courses of Study by Departments." The figures following the name of each study in the program indicated the number of recitations a week in that study for the first, second and third terms, respectively. Courses in italics are not taken by women; courses in parentheses are not taken by men.

Students in the Freshman and Sophomore Classes may take French and German as a substitute for Greek without affecting their graduation. Students who do not wish to take a full course may choose one of the four languages, Latin, Greek, French, German, and must take the other studies of the course.

*Those who have taken French A, B and C are excused from French E.*
Courses of Study by Departments

DEPARTMENT OF PHILOSOPHY

PHILOSOPHY A.—Descriptive Psychology.
  Juniors, second and third terms, three times a week.

PHILOSOPHY B.—Deductive and Inductive Logic.
  Seniors, first term, three times a week.

PHILOSOPHY C.—Ethics.
  Seniors, second term, three times a week.

DEPARTMENT OF ENGLISH

ENGLISH A.—A study of the principles of Rhetoric and Composition with the view to the practical application of them. In practice work the study proceeds from the composition as a whole to the smaller units, with emphasis on correctness, clearness, strength, individuality and readiness of expression. Description, Narration, Exposition and Argument are taken in the order named and carefully studied and practiced. Short themes are required each week, and these are examined by the instructor and reported on in the class-room. There is also parallel reading for the purpose of theoretical illustration.
  Freshmen, five times a week during first term.

ENGLISH B.—The history of English literature from the Anglo-Saxon period to Tennyson. Also the reading and study of a number of English authors. The work in composition continues, and shorter and longer themes are statedly required, with special attention given to planning and to the short story and argument.
  Sophomores, five times a week during second and third terms.

ENGLISH, C.—Literature of the Elizabethan, Puritan and Classical periods studied with reference to the historical significance of the author and the development of a critical apprecia-
tion of his works. Shakespeare, Milton, Addison, Pope and some of the leading novelists are the principal authors studied. Study of the leading poets, essayists and novelists of the Romantic and Victorian periods. Usually the authors studied are Wordsworth, Browning, Tennyson, De Quincey, Ruskin, Carlyle, Scott, Thackeray and Eliot. In connection with the study of the novelists a brief survey of the development of the English Novel is made.

The work in Composition is continued, attention being given to the preparation of more elaborate essays and orations. The critical examination of these productions of the students is made before the class during one period of each week.

_Seniors, throughout the year, three times a week._

ENGLISH D.—A study of the English Bible as literature. This is an effort to interest and instruct students in the various phases of literary style and content represented in the Biblical books. Theological and critical questions are not discussed.

_Seniors, third term, four times a week._

In addition to the above courses, members of all the classes have a period once a week with the Professor of English which is devoted to theme work entirely. Juniors and Seniors are required to deliver before the school one essay or oration during each term.

DEPARTMENT OF LATIN

LATIN A.—Three orations of Cicero: Pro Archia, In Verrem and Pro Milone. While in the reading of these orations a thorough study of forms will be kept up, the attention of the student will be mainly directed to them as masterpieces of oratory. Before taking this course students must have read at least three other orations of Cicero, such as those against Catiline.

_Freshmen, first term, four times a week._

LATIN B.—Virgil’s Aeneid, Books I-VI. Study of Latin versification, with especial reference to the Hexameter. Lectures on the history and development of Epic poetry. Latin Composition is continued.

_Freshmen, second and third terms, four times a week._
LATIN C.—The 21st and 22nd books of Livy are read, and scarcely less attention is directed to the author as a literary artist than as a historian.

*Sophomores, first and second terms, three times a week.*

LATIN D.—Cicero's Tusculan Disputations are read for his philosophy, and his De Senectute and De Amicitia for his inimitable grace as an essayist.

*Sophomores, third term, three times a week.*

LATIN E.—The Odes and Epodes of Horace, with careful analysis of the various metres used by the poet.

*Juniors, first term, three times a week.*

LATIN F.—Horace's Satires and Epistles; the former for their genial and good natured comment on the daily life of the Romans, and the latter as rare specimens of disquisitions in verse form addressed to his friends and treating of life, literature and philosophy.

*Classical Juniors, second term, four times a week.*

LATIN G.—The Agricola of Tacitus is studied, due attention being paid to the characteristics of the writer's style and to the literary merits of this celebrated biography.

*Classical Juniors, third term, four times a week.*

LATIN H.—In the first and second terms the New Comedy of the Greeks, preserved for us only through the Latin translations or adaptations of Plautus and Terence, is studied from the Menachmi of the former and Adelphi of the latter. The points which distinguish this branch of literature from the Old Comedy, on the one hand, and, on the other, from the Comedy of modern times, are explained in lectures. The third term is given up to Juvenal, whose satire is that of the pessimist, and whose savage exposure of the corruption of his age helps us to understand why the Roman Empire fell, and why he was the last great writer that Rome produced.

*Classical Seniors, three times a week.*
DEPARTMENT OF GREEK

GREEK A.—First term: White’s First Greek Book. Careful study of the forms and principal rules of syntax. Special attention to the verb, both regular and irregular. Exercises in translating sentences from Greek and English. Second and third terms: Xenophon’s Anabasis. Lectures on the life of Xenophon and the Greek art of war.

Male Freshmen five times a week.

Male Sophomores, four times a week.

GREEK C.—The first term is devoted to the special study of Thucydides, but it is intended by means of lectures on the methods and style of the two other great historians, Herodotus and Xenophon, to draw attention to the general characteristics of Greek historical literature. Throughout the second term select orations of Lysias or Demosthenes are read, and the questions of Greek law, politics and social life raised by the author receive careful treatment. The third term is taken up with Greek Philosophy. The text-books used are the Apology of Socrates and the Crito, accompanied by readings from Pater’s Plato and Platonism.

Male Classical Juniors, three times a week.

GREEK D.—The work of the first term is in the Clouds of Aristophanes which is selected not only because it is a fair representative of the Old Comedy, but because it presents the Socratic school of philosophy as viewed by its opponents. For supplementary reading the Acharnians of the same author is used. Greek tragedy occupies the second term, and the books read are the Prometheus Bound of Aeschylus, and Antigone of Sophocles or the Bacchantes of Euripides. Attention is called to the difference between the Attic and the Shakespearean tragedy. In the third term the textbook used is the Poetics of Aristotle, thus closing the course with a study of literary criticism as practiced by the most acute and comprehensive thinker of the ancient world.

Male Classical Seniors, three times a week.
The Classical courses are supplemented by a course of lectures on Greek and Roman Literature from Homer to Juvenal, delivered by Prof. Reese.

Classical Seniors, once a week during the second and third terms.

DEPARTMENT OF FRENCH

Students are carefully drilled in pronunciation, and as a preparation for conversation in the language, students are required to bring into the class original questions in French to be answered in the same language by the instructor.

Freshmen, three times a week.

During the year students are drilled on the irregular verbs, and the Grammar is reviewed in connection with the authors read. This course is a continuation of Course A in acquiring a knowledge of forms and facility in the vocabulary.

Sophomores, three times a week.

FRENCH C.—Sadler’s Translation of English into French throughout the year. Reading: First Term, Daudet’s Contes Choisis. Second Term, Hugo’s Hernani. Third Term, Merimee’s Colomba.

Private reading of French authors under the direction of the instructor.

Juniors, three times a week.

FRENCH D.—First Term, Loti’s Pecheur d’Islande and Peilleron’s Le Monde ou l’on s’ennuie. Second Term, Corneille’s Le Cid and Molliere’s L’Avare. Third Term, Sandeau’s Mlle de la Seigliere.

Original letters, descriptions and narratives submitted in French
by the students. Private reading of French authors under the
direction of the instructor. Recitations conducted wholly in the
French language.

*Historical Seniors and Female Classical Seniors, three times a
week.*

FRENCH E.—Fraser and Squar’s Elementary French Gram-
This course being designed for those desiring a rapid acquisition
of a reading knowledge of the language, the whole attention of
the class will be devoted to French Grammar, Composition based
upon the Grammar, translation of easy French prose in large
amounts to obtain a vocabulary, and especially pronunciation.

*All Seniors, who have not taken French, five times a week.*

A course of lectures rapidly reviewing the literature of the
Middle Ages, and studying more especially the literature of the
seventeenth, eighteenth and nineteenth centuries.

*Scientific and Historical Seniors, once a week, second term.*

**DEPARTMENT OF GERMAN**

GERMAN A.—Vos’ Essentials of German Grammar. Harris’
Reader. During the year, students are drilled on the declensions
and on weak and strong verbs. Special pains are taken with pro-
nunciation, all the exercises from the Grammar and the German
text being read aloud in the classes by the students. During the
second and third terms the exercises are written in German script.

*Male Freshmen who do not take Greek, three times a week.*

GERMAN B.—Benedix, Der Prozess; Einer muss heiraten. Von
Hillern’s Hoher als die Kirche. German Composition based on
Hoeher als die Kirche. Chamisso’s P. Schlemihl. General re-
view of German Grammar. During the second and third terms
of this year the elements of conversation are begun, students be-
ing required to submit original questions in German, and the in-
tstructor asking questions to be answered in German.

*Male Sophomores who do not take Greek, three times a week.*
GERMAN C.—Schiller's Die Jungfrau von Orleans. Freytag, Die Journalisten. Goethe, Hermann und Dorothea. Composition during this year will be, as a rule, based upon original themes, such as letters, descriptions, narratives, the subject being selected by the instructor. As far as possible, German will be the only language used in the classroom for explanation or general inter-course. German authors will be assigned for private reading.

Male Juniors, who have taken German A and B three times a week.

GERMAN D.—Joynes-Meissner's Grammar. Super's Elementary German Reader. Heyse's Anfang und Ende. Bernhardt's Auf der Sonnenseite Meyer's Das Amulett. This course aims to give a good reading knowledge of the language and makes no attempt at conversation, the whole stress being placed upon the Grammar, composition and vocabulary. It is designed for those who can take only one year in the language.

All Juniors who have not taken German, five times a week.

History of German Literature. A course of lectures covering more particularly the eighteenth and nineteenth centuries.

Scientific and Historical Seniors, once a week, third term.

DEPARTMENT OF MATHEMATICS AND ASTRONOMY

MATHEMATICS A.—Geometry and Algebra. Plane Geometry is taken up for brief and general review, then follows Solid Geometry, including the study of planes, dihedral and polyhedral angles, prisms, pyramids, cylinders, cones and spheres.

In addition to the acquirement of a knowledge of the subject, this course aims constantly to train the reasoning faculties by the logical character of its demonstrations and to develop the investigating and inventive powers.

At the conclusion of the course in Geometry, Algebra is resumed at Quadratic Equations and completed, including such subjects as Ratio and Proportion, Variation, Progressions, Series, the Binomial Theorem, the Theory of Logarithms, Probability and Determinants. Recognizing the fact that good form and facility in algebraic methods is the best foundation for good work in the higher branches more attention is paid to the mastery of principles than to the solution of problems.

Freshmen, throughout the year, four times a week.
MATHEMATICS B.—Trigonometry and Analytic Geometry. Trigonometry offers the best opportunity for practical application of any of the mathematical branches, and as soon as the formulae for the solution of triangles and the use of the Tables have been learned, original problems for which the student secures data himself are used altogether. Surveying is given the male students, with field work as supplementary to their work in Trigonometry.

In the study of Analytic Geometry, emphasis is naturally given to the analytic method and to the interdependence of the earlier branches of Mathematics. The subject is developed systematically from the location of Points by Cartesian and Polar co-ordinates through the Straight Line, Circle, Conic Sections and higher Plane Curves.

*Sophomores, throughout the year, three times a week.*

MATHEMATICS C.—Calculus. This course aims to give a good working knowledge of the fundamental processes of both branches of the subject, the Differential and the Integral. In the former the differentiation of functions, the simpler applications of the differential coefficient, expansion of functions, examination for maxima and minima values and the evaluation of indeterminate forms are the subjects studied; in the latter, integration of type forms, rectification of curves, quadrature of surfaces and cubature of solids.

After this foundation of work, special topics will be taken up, with a view to giving what is most needed by students contemplating engineering.

*Scientific Juniors, throughout the year, three times a week.*

ASTRONOMY A.—This course is intended to supply that amount of information upon the subject which may fairly be expected of every liberally educated person. It gives an orderly statement of astronomical facts, the methods of arriving at them; treats of the great underlying principles of the science, and supplements all this with a considerable amount of observational work. Students have the benefit of using a five-inch refractor equatorially mounted in a revolving dome, a small transit and other instruments.

*Seniors, half-year, twice a week.*
Lectures on special appropriate topics and the history and development of Mathematics and Astronomy are given at proper times.

DEPARTMENT OF CHEMISTRY AND BIOLOGY

CHEMISTRY A.—General Inorganic Chemistry. Besides the usual text book work, the subject is gone over by lectures fully illustrated by experiments. Two hours a week are spent in the Laboratory, where each student performs about 150 experiments carefully selected by the instructor to illustrate the fundamental principles of the science.

_Sophomores, three times a week throughout the year._

CHEMISTRY B.—Qualitative Analysis and Organic Chemistry. This is primarily a laboratory course supplemented by lectures and recitations. The first half of the year deals with the theory of solutions and analysis of the more common metals and salts. The second half is devoted to the chemistry of the carbon compounds, the laboratory work consisting of the preparation and study of the properties of selected organic compounds.

_Scientific Juniors, three times a week._

BIOLOGY A.—Botany. The physiology, morphology and reproduction of plants are studied from the standpoint of biology and development. In the laboratory the student learns the principles and uses of the compound microscope and makes a study of selected plant types from the lowest to the highest orders. Special attention is devoted to the economic relations of the Bacteria, and the student is familiarized with the methods of handling and cultivating nonpathogenic forms.

_Scientific Juniors, twice a week throughout the year._

BIOLOGY B.—General Zoology, Comparative Anatomy and Embryology. The first half of this course outlines the general principles of Zoology. It includes the classification of animals, with a study of selected types representing the more important classes, the distribution of animals in time and space, the physiology of the cell, the principles governing animal development,
the relation of animals to their environment, and finally, the various theories offered to explain how the modification of animals has been effected. Laboratory work on material to illustrate these topics accompanies that of the classroom. The second half of the course is devoted chiefly to laboratory work in Comparative Anatomy and Embryology of Vertebrates. The course is designed, in connection with the course in Botany, to prepare students for admission to the most advanced medical schools.

_Scientific Seniors, five times a week throughout the year._

DEPARTMENT OF PHYSICS AND GEOLOGY

PHYSICS A.—General Physics: Mechanics, Heat, Sound, Light, Magnetism and Electricity. Lectures, recitations, and laboratory work. The lectures are fully illustrated by appropriate experiments. The object of this course is to familiarize the student with the fundamental concepts and principles of physics.

_Juniors, three times a week, throughout the year._

PHYSICS B.—Physical and Electrical Measurements: Lectures, recitations and laboratory work.

Physical Measurements: A more advanced course in measurements of precision. The work offered will be mainly in the determination of densities, indices of refraction, focal lengths of lenses, investigating the laws of bending, torsion, calorimetry and photometry.

Electrical Measurements: This course includes measurements of resistance, electromotive force, current capacity, and the use of standard cells. Each student will work independently of all others, and to a considerable extent the choice of the line of work pursued will lie with him.

_Scientific Seniors, three times a week throughout the year._

MECHANICAL DRAWING A.—Descriptive Geometry. Projection on right and oblique planes, intersection of lines, surfaces and solids, elevations and sections, isometric projection. The use of drawing instruments. This course is to be taken in conjunction with Physics B, and is intended for those students contemplating further preparation at some engineering school.

_Scientific Seniors, twice a week throughout the year._
GEOLOGY A.—General Geology. Dynamical, structural, and historical geology. Lectures, recitations, and laboratory work on the common minerals and rocks. Excursions are taken from time to time to illustrate the topics studied.

Seniors, half-year, twice a week.

DEPARTMENT OF HISTORY AND POLITICAL SCIENCE

HISTORY A.—Two terms of the Freshman Year are devoted to a general course in European History from 350 A. D. to the present time. The Germanic invasions of the Roman Empire; the rise of the Christian church and the origin of the papacy; the rise of Mohammedanism and its conflict with Christianity; the age of Charlemagne and the reorganization of the Empire in the west; origin of feudalism; rise and development of monasticism; the development of modern states and their territorial conflicts; the struggle between the Empire and the papacy; the economic, intellectual and social life of the Middle Age; the Renaissance; the Protestant Reformation; the Thirty Years' War; England's struggle for constitutional government; the age of Louis XIV; the rise of Prussia and of Russia; the French Revolution, and Europe since the Congress of Vienna.

Freshmen, five times a week during the second and third terms.

HISTORY B.—The first term of the Sophomore Year is devoted to a general course in English History. The institutions of Anglo-Saxon England, the Norman administrative system, the Hundred Years' War, the rise of Parliament, the Tudor and Stuart despotism, the Puritan Revolution, the formation of the British Empire, the rise of cabinet government, the political, social and industrial reforms.

Sophomores, five times a week, the first term.

History C.—The Junior Year is devoted to the political and diplomatic history of Europe during the eighteenth and nineteenth centuries. Special effort will be made to acquaint students with the present day problems of the various world powers. First Term: The age of Louis XIV, the reconstruction of Europe at the Peace of Utrecht, the origin and development of Russia and Prussia, the age of Frederick the Great, the partition of Poland, the hundred years' struggle between France and England for colonial
and commercial supremacy, the old regime in Europe, the scientific spirit in modern reform, eighteenth century despotism, the French Revolution and the First Republic, the Napoleonic Age, and the Congress of Vienna. Second and Third Terms: The industrial revolution, the political revolutions of 1820, 1830 and 1848, the Holy Alliance, the unification of Italy and of Germany, the German Empire, the British Empire in the nineteenth century, the Russian Empire in the nineteenth century. Turkey and the Eastern question, the Congress of Berlin, the expansion of Europe the last century, some of the great problems of to-day.

**Historical Juniors, three times a week throughout the year.**

**HISTORY D.**—This is a course in American History. It will be a general course, supplemented with an intensive study of leading men and measures. First Term: A discussion of the origin, development and meaning of American colonization, the conflict for colonial supremacy in America, the American Revolution, the formation and character of the Constitution and the supremacy of Federalism. Second Term: The rise and progress of Jeffersonian democracy, the War of 1812, the industrial readjustment, the new West, Jacksonian democracy, the slavery question, the Mexican War, the compromise of 1850, the rise of Republicanism, the Civil War, reconstruction. Third Term: Industrial and commercial progress, the new South, the new West, the new Union, the Spanish War, the United States as a world power, some unsolved problems.

**Historical Seniors, three times a week, throughout the year.**

**HISTORY E.**—A study, from translations, of the Greek and Roman Historians, Herodotus, Thucydides, Xenophon, Sallust, Livy and Tacitus. The course consists of lectures on the style and authority of these writers and of the preparation of papers, by the students, based on their reading.

**Classical Juniors, first term, three times a week.**

**POLITICAL SCIENCE A.**—A study of the principles and problems of economic life. First Term: The value of material things; the relation of wants and goods; economic motives, value, exchange, markets, psychic income; wealth and rent; character and uses of wealth, nature and theories of rent, law of diminishing returns; the uses of money, capital and capitalization in modern
industry. Second Term: The value of human services; labor and wages; character of labor, doctrine of population, law of wages, use of machinery, trades-unions; business management and profits; business organization costs and methods of production, profits, profit-sharing, co-operation, monopolies, trusts, promoting, stocks, crises. Third Term: The Social aspects of value; relation of private income to social welfare; relation of the State to industry; State action in regard to money and banking, taxation and international trade, tariff, transportation, trusts, the economic future of society.

**Historical Juniors, three times a week, throughout the year.**

**POLITICAL SCIENCE B.**—The origin and character of government; aristocratic and democratic governments of Greece; Roman dominion and Roman law; Teutonic policy and the present governments of the states of Europe and the United States.

**Historical Seniors, three times a week, throughout the year.**

**POLITICAL SCIENCE C.**—This is a course combining the elements of Economics and Government. The first half of the year is given to a treatment of the principles underlying economic and industrial development in America; the consumption, production, exchange and distribution of wealth; a study of such problems as monopolies, trades-unions, money, transportation, single tax, co-operation, socialism and the economic functions of government.

The second half of the year is given to a study of the United States Government, being concerned chiefly with the structure and operations of American government, federal, state and municipal.

**Classical and Scientific Seniors, three times a week.**

**DEPARTMENT OF PEDAGOGY**

The courses in this department are designed to afford students who intend to devote themselves to teaching, an opportunity to cover the main branches of the subject at the same time they are studying for their degree. They cover two years, and those completing the courses and obtaining the Bachelor's degree will receive a Certificate from the State Board of Education entitling
them to teach in the Public, Elementary and High Schools of Maryland without examination.

PEDAGOGY A.—General History of Education, embracing a review of the most eminent educational theories and systems of ancient and modern times. In the second and third terms of this year the study of Psychology is pursued according to the course as outlined in the Department of Philosophy.

The year will also comprise a review of the elementary branches with a study of methods used in teaching those branches.

Drawing, music, elocution and physical training are included in this course also.

PEDAGOGY B.—The first term is occupied with a study of the philosophy of teaching; its psychological and pedagogical principles.

In the second term School organization and discipline is taken up, comprising methods of supervising and managing schools, teachers and pupils; courses of study and programs, based on the Maryland Teacher's Manual and Courses of Study; sanitation, playgrounds, text-books, supplies and apparatus.

The third term is devoted to the study of School law; the duties of the teacher as an officer of the State; school boards; trustees; contracts; care of property; records and reports.

During this year each student will be given an opportunity to observe and practice teaching in the graded schools of Westminster and in the Preparatory School of the College. Drawing, music, elocution and physical training will be continued through the year.
Supplementary Courses

These courses are arranged to meet the needs of students who desire to study Music or Elocution at the same time they are pursuing the regular course. Such students are of two classes—those who wish to pursue a full course and secure the certificate of one of these departments, and those who desire simply to gain such proficiency as may be possible in limited time. To the former class a substitution is offered, so that they can drop one of the studies of the regular course and take one of these supplementary studies instead, as prescribed in the note to the regular courses. For all students taking these supplementary courses an extra charge will be made, according to the schedule of rates published on page 66. It is not advisable for a student to attempt more than two of these studies at the same time.

PIANO

Students are divided into four grades and carried through a progressive course of studies intended to take them from the rudiments of Music and the first principles of pianoforte playing to enable them to interpret and render the best classic music. Piano may be studied by those who do not desire a full course, and, for such, a selection from the course will be made suitable to their ability and the time they can give to it. But those who desire to graduate in the department must take the entire course, and, in addition, a course in Sight-Singing of at least one year and two years in Harmony. For these no extra charge will be made.

As all lessons are given individually, the pupil’s progress is limited by no condition of time. A student may require two years to complete one of these grades or
two of them may be completed in one year, all depending upon the student’s talent and diligence. Upon completion of the course, students receive a certificate of graduation in the department.

FIRST GRADE. Czerny’s Studies, arranged by Germer, Books 1 and 2; Selections from Field’s Nocturnes, Mozart’s Sonatas, Haydn’s Sonatas.

SECOND GRADE. Czerny’s Velocity, Books 1, 2 and 3; Selections of moderate difficulty chosen from classic and modern composers.

THIRD GRADE. Czerny’s Die Kunst der Fingerfertigkeit op. 740, Books 1, 2 and 3; Beethoven’s Sonatas. Concert pieces from old and modern masters chosen for improving dexterity and expression.

FOURTH GRADE. Chopin’s Studies, Ballades and Nocturnes; Beethoven’s Sonatas; Bach’s Fugues; Grand Concert pieces from the greatest composers.

ADDITIONAL. In the third and fourth grades students desiring the certificate of the department must take Harmony. One year must be given to a study of Sight-Singing. As technical and mental training in pianoforte should not be separated, special attention to correct execution and interpretation of the above studies and selections is required.

PIPE ORGAN

Instruction in Organ playing is given to pupils sufficiently advanced in music to take up this study. The works of Bach, Handel, Rink, Merkel, Kullak and other classical composers, as well as those of standard modern writers, are carefully studied, special attention being given to church music. Harmony is continued throughout the course, and everything pertaining to a thorough and artistic rendering of the music devoted to this instrument is carefully considered.

The College has a fine two-manual organ, with water motor, giving students ample opportunity for practice.
VOICE

The course includes four grades, and the completion of the work entitles the pupil to a certificate stating this fact. But a year's study of the piano or organ and two years of Harmony will be required of all graduates.

FIRST YEAR. Elements of notation—Respiration. Vowel Formation. Articulation; Pronunciation; Placing Tones; Anatomy and Physiology of the Vocal Organs; Seiber's Elementary Vocalises.

SECOND YEAR. Exercises for increasing Flexibility of Voice; Phrasing; Vaecci; Lutgen, Book 1; Songs by Classic and Modern Composers.

THIRD YEAR. Exercises for Flexibility, continued; Lutgen, Book II; Songs in French, German and Italian; Panofka's Harmony.

FOURTH YEAR. Advanced Vocalises by Aprile; Bordogni; Marchesi; Arias from Operas and Oratorios; Songs by Schubert, Schumann and other classic writers; Harmony; History.

There will also be exercises in Concerted Music, Chorus practice and Sight-Singing.

ELOCUTION

The work of this department extends throughout the College course. For the first two years it is general and preliminary. Instruction is given in the regular classes, and no extra charge is made for it, nor is any student excused from it except those who take Music. In the last two years the course is limited to those who take it as an extra. Instruction is given in classes composed of small groups, so as to give individual attention to students. Upon the satisfactory completion of the course the certificate of the department is conferred.

COURSE A.—General instruction in Voice Culture, Respiration,
Punctuation, Articulation, Sight-Reading, Recitation.

_Freshmen, once a week._

COURSE B.—Vocal and Physical Expression, Analysis of Selections, Extemporaneous Speaking, Hymn and Bible Reading, Readings from Shakespeare. Each student is required to recite three selections before the school during the year.

_Sophomores, once a week._

COURSE C.—Vocal Technique, Gesture, Literary Analysis and Interpretation, Expression.

_Special Juniors, twice a week._

_Special Seniors, twice a week._

**LECTURES**

The work of instruction is done mainly in the classroom and by recitation, but in the Collegiate Department the text-book is supplemented by frequent lectures as a part of the regular work.

Besides the above, a course of lectures is delivered to the whole school in Smith Hall, which gives the students an opportunity of hearing various literary, scientific and historical subjects treated, not only by members of the Faculty, but also by distinguished speakers and specialists not connected with the College.

One hour is given every Friday to a public assembly in the Auditorium, where an exercise of a different kind is held every week; Senior Orations and Disputations, Junior Themes, Sophomore Readings and Recitations, Musical Recitals and Lectures alternate in pleasing variety, and offer unusual facilities to broaden the student's culture.
PHYSICAL TRAINING

Besides the opportunities afforded by an extensive campus for outdoor exercise, in an air exceptionally pure and bracing, special attention is paid to the physical development of the students. Female students are required to exercise daily under the instruction of a regular teacher with dumb-bells, wands, clubs and other light apparatus. These exercises are all performed to piano music, which stimulates to more vigorous effort and renders the drill in every way more attractive and beneficial. This training gives the body grace, beauty and health.

A large portion of the fourteen acres of land belonging to the College is devoted exclusively to outdoor sports, while the gymnasium, fully equipped with the best modern apparatus, furnishes ample provision for indoor athletic training. The students are required to exercise daily under the superintendence of a director, who assigns to them the kind of exercise most needed in each case; and no student will be graduated who fails to comply with this requirement.

Special stress is laid upon corrective exercises.

Lectures will be given along with the Gymnasium Work on Personal Hygiene, including talks on breathing, circulation, bathing, clothing, drink and food; on how to exercise to obtain the best results.

The prime object of our course in Physical Training is to strengthen the vital organs, thus making the student healthy and keeping him so; to get the students early in the habit of caring for his own body to the best advantage.

Each student will be given a physical examination before he begins the class work.
Expenses

The Collegiate year consists of thirty-six weeks, and is divided into three terms. The first term begins on the third Wednesday in September, and continues thirteen weeks, when the school is closed for the Christmas holidays. The second term begins on the Wednesday following the first day of January, and continues twelve weeks. The third term begins immediately upon the close of the second, and continues eleven weeks to Commencement Day, Wednesday after the second Sunday in June.

TOTAL EXPENSES FOR THE YEAR

The charges for board, furnished room, laundry and tuition aggregate $225.00 for the year. This amount is payable in installments at the beginning of each term, viz: $80.00 in September, $75.00 in January and $70.00 in March.

The charge for laundry includes twelve plain pieces besides the bed linen. All above this will be done at the expense of the student.

The charge for room means that two students are to occupy every room. Those desiring to room alone will pay $5.00 per term additional.

To students living in town and not boarding in the institution the charge for tuition is $15.00 a term.
LABORATORY FEES

Chemistry, Sophomore year ........................................ $5.00
Chemistry, Junior year.................................................. 6.00
Physics, for each year.................................................... 3.00
Botany, for the year...................................................... 3.00
Biology, for the year..................................................... 6.00

These fees cover the use of apparatus and materials.
The Professor will decide whether any breakage should be charged to the student or not.

ATHLETIC FEE

Young ladies are charged three dollars gymnasium fee at the beginning of the year, and young men five dollars for the support of Athletics and the Gymnasium.

EXTRA EXAMINATIONS

If a student is absent from the regular examinations for the term, he may take them at the next term, provided his excuse for absence is accepted by the Faculty. But if he desires to have the examinations given at any other time, he will be charged a fee of one dollar for each study in which he is examined. If it should be necessary to give a student a special examination to make up a deficiency in a term's work, no charge will be made for the first, but for the second trial, if this should be necessary, a fee of one dollar will be charged for each study in which he is examined.

ROOM DEPOSIT

All students who board in the College or who rent study rooms of the College, are required to deposit $5 with the Treasurer on receiving the keys of the room. This money is returned at the close of the year, with any
charges for injury to room or furniture deducted. In case of damages due to disorder, where the responsibility cannot be directly traced, the cost is assessed on the whole school.

**TEXT-BOOKS**

Students provide their own books and stationery. The College will order these for students if they desire, and furnish them at publishers’ rates. The cost of the books varies with the class, usually running from $5 to $10.

**DEDUCTIONS FOR ABSENCE**

When a student is absent more than two weeks, a reduction will be allowed for board, that is, he will be charged at the rate of $6 a week for the time he is present. If a student is present less than half a term, he will be charged for tuition for one-half a term. If he is present more than half a term, no reduction for tuition will be allowed.

**TIME AND MANNER OF PAYMENT**

All bills are presented at the beginning of each term for that term, and must be paid within ten days. Checks should be made payable to Western Maryland College. No student will be graduated until all bills are paid.

The Preparatory School

ORGANIZATION

Western Maryland College has always had a Preparatory Department, but an entirely new departure was recently made in this direction by removing the department from the College Campus. This was done because the department had grown too large for the rooms the College could spare for it, and especially because it was found desirable to separate students of such different ages so as to put into effect regulations that were desirable for younger students, but could not be enforced while they were associated with older students. A new building was erected, and all its appointments are first class and designed for special use of this school. The building is so near the College that students take their meals at the College dining-room, being, in fact, only about three hundred yards distant, but yet the students are entirely separate as to organization and discipline.

STUDENTS ADMITTED

The school accepts both boys and girls, but the girls have their rooms at the College and are under the care of the Preceptress. They go to the Preparatory school-rooms for their recitations, where they are in charge of the lady principal.

STUDENTS' ROOMS

The rooms for boys are in the Preparatory Building, all furnished, but not carpeted. They have single beds, each room is heated by steam, lighted by electricity, and there is good ventilation and sun. Each room is intended to be occupied by two students.
SCHOOL ROOMS

The school admits only students of two grades, and each of these is provided with a large school room, well ventilated and lighted. Each room has a teacher constantly in attendance, and the students study in this hall during the day, and at night are in their own rooms in Preparatory Hall, where three teachers constantly reside and have them in charge at all hours.

LIBRARY

A special gift of one of the friends of the College, Mrs. Ulie Norment Hurley, of Washington, D. C., enabled us to provide at once an excellent assortment of books specially selected for boys' reading. About 600 volumes now fill the cases, and more will be provided as they are needed. These are placed in a large room, which is open daily to the students.

GOOD SURROUNDINGS

The school is under the immediate direction and control of Western Maryland College, and the students take their meals in the College dining-room, and have all the advantages of collegiate associations, while their own work is removed from immediate contact with older students and under regulations which have to be different in matters of discipline. All the lectures and entertainments at the College are open to the students of the Preparatory School, and the libraries at the College are also at their disposal.

GOOD MANAGEMENT

The President of the College has the responsible oversight and control of the school, and while he does not
teach any of the classes, he yet maintains a careful govern-ernment of the whole course of instruction. The teachers have been selected with special reference to their ability to teach and manage young people. The Principal has had long experience in the management of High Schools, and is specially prepared for the work.

GOOD ORDER

The whole school is ordered with a view to carrying forward the discipline and care of the home. No student is allowed to leave the building at night without special permission, and then only when the Principal regards it as prudent. Students are made to keep their engagements with teachers in the classroom, and every effort is made to get indolent students to form habits of study. If they will not they are removed from the school. No profane language or use of tobacco or spirituous liquors is allowed.

COURSE OF STUDY

The aim is primarily to prepare students for College, but many students come who do not expect to enter College at all. For these the school offers what is sometimes not available at home—a good high-school education.
Requirements for Admission to the Preparatory School

The course of study in the Preparatory School is designed to prepare students for the Freshman Class of the College. All the work of the Grammar grades must have been completed before one can be admitted into the Lower Sub-Freshman Class.

The following indicates the stage of progress in the ordinary studies required:

**ARITHMETIC**—Complete.

**ENGLISH GRAMMAR.**—A thorough knowledge of the Parts of Speech and their uses in the Sentence. A brief composition on some easy topic is also required as a test of spelling, punctuation, etc.

**DESCRIPTIVE GEOGRAPHY.**—As much as is included in Appleton’s Higher or Frye’s Complete Geography.

**UNITED STATES HISTORY.**—A book like Montgomery’s American History will cover the ground required.

Those who pass examinations in the subjects named above will be admitted into the Lower Sub-Freshman Class. Those who wish to enter the Upper Sub-Freshman Class must pass an examination in Latin and Algebra in addition to an examination on the work done by the Lower Sub-Freshman.

**Lower Sub-Freshman Class**

**ENGLISH**

This course combines a study of the Language and the Literature, with constant practice in essay writing.

**GRAMMAR.**—The analysis of the sentence is the groundwork of study for the first and second terms, supplemented by a study of the Derivation and Definition of Words.

*Four times a week.*

**LITERATURE.**—The study of Literature begins with Irving’s “Sketch Book” in the first term; Longfellow’s “Evangeline,” in the second term; and Scott’s “Lady of the Lake” and Shakespeare’s “Merchant of Venice” in the third term.

*Three times a week.*
LATIN

A thorough study of forms and constructions with constant exercises in translating Latin into English and English into Latin. The class is expected to complete a book like Collar & Daniel’s First Latin Book.

*Five times a week.*

MATHEMATICS

Arithmetic is begun at Percentage and completed, with a review of the whole subject in the third term.

Algebra is begun and carried through an elementary text-book.

*Six times a week.*

PHYSIOLOGY AND PHYSIOGRAPHY

Physiology is studied the first term and the elements of Physical Geography the second and third terms.

*Three times a week.*

Upper Sub-Freshman Class

As this class is the immediate preparation for the Freshman Class, no students will be admitted into it except those entirely prepared. No one who has not had at least a year’s Latin will be permitted to enter.

ENGLISH

This course continues the work begun in the Lower class, combining the study of Language and Literature throughout the year. The study of Composition and Rhetoric is begun with the aid of a text book. Constant practice in theme writing and in the application of the principles of Rhetoric to the literature read.

*Three times a week.*

LITERATURE: Burke’s Speech on Conciliation with America; Carlyle’s Essay on Burns or Macaulay’s Life of Johnson; Milton’s Minor Poems; Macbeth; Washington’s Farewell Address and Webster’s First Bunker Hill oration are studied in class. In addition, each student must read during the year six books designated by the instructor for private reading.

*Three times a week.*
LATIN

1st and 2d Terms: Nepos and Caesar’s Gallic War. The textbook used covers portions of each author, about three books of the latter.

3rd Term: Three of Cicero’s orations against Catiline, with study of the development of Roman oratory.

Throughout the year the constant use of the Grammar is required with a special view to Latin Syntax and Prose Composition.

Five times a week.

MATHEMATICS

Algebra to Quadratics.
Plane Geometry.

Six times a week.

HISTORY

General History, throughout the year.

Three times a week.

PHYSICS

A course in Elementary Physics throughout the year.

Three times a week.

Society Contests

On Tuesday evening of Commencement Week there is held an Oratorical and Literary Contest between the Irving and the Webster Societies of young men; and also between the Browning and the Philomathean Societies of young women. These contests were originated in 1872 for the young men and in 1888 for the young women. It was not until the latter year that judges were appointed and decisions of contests were given. The following is the list of the successful contestants since 1888.

1. THE IRVING-WEBSTER CONTEST

1888...Irving..........................G. W. Ward, W. M. Weller
1889...Webster..........................J. F. Harper, W. I. Mace
1890...Irving..........................G. E. Day, D. F. Harris
1891...Webster..........................L. N. Whealton, T. M. Johnson
1892...Irving..........................H. P. Grow, D. E. Wilson
1893...Webster..........................K. G. Murray, W. G. Baker, Jr.
1894...Irving..........................A. N. Ward, T. C. Galbreath
1895...Webster..........................Marion Hearn, M. L. Veasey
1896...Webster..........................C. E. Forlines, E. J. Nelson
1897...Webster..........................C. C. Douglas, C. O. Clemson
1898...Webster..........................A. G. Dixon, C. C. Douglas
1899...Irving..........................H. H. Price, S. A. Harker
1900...Webster..........................G. H. Myers, E. A. Cobey
1901...Webster..........................H. S. Robinson, G. I. Humphreys
1902...Irving..........................E. E. Tarr, R. R. Carman
1903...Irving..........................F. E. Rathbun, J. M. Henry
1904...Irving..........................J. M. Henry, F. E. Rathbun
1905...Webster..........................G. E. Bevans, I. D. Scott
1906...Webster..........................W. E. Davis, J. H. Hendrickson
1907...Webster..........................W. E. Short, G. F. Thomas
1908...Webster..........................J. E. Pritchard, J. S. Turner
1909...Irving..........................C. C. Day, R. V. Lewis
1910...Irving..........................C. Sprague, C. Twigg
1911...Irving..........................C. Sprague, H. S. Beall

Oratorical Association of Maryland Colleges

This is an association of Western Maryland, St. John's, Maryland Agricultural and Washington colleges, organized in 1899 for the purpose of holding contests in oratory by undergraduate representatives of the several colleges. The contests are held in April of each year, and a gold medal is awarded to the representative winning the first place. A second gold medal is also awarded to the representative winning the second place.

The years in which representatives of Western Maryland have won first or second place and the names of her representatives are as follows:

1899—Claude Cicero Douglas   FIRST
1900—Harry Heffner Price      FIRST
1901—George Hammond Myers     Second
1902—Gideon Ireland Humphreys  FIRST
1903—
1904—Levin Irving Insley      FIRST
1905—John Michael Henry       FIRST
1906—George Esdras Bevans     FIRST
1907—John Hunt Hendrickson    FIRST
1908—George Frank Thomas      FIRST
1909—John Samuel Turner       Second
1910—Russell Vinton Lewis     Second
1911—Carl Twigg               Second
1912—Charles Hering Murray    FIRST
