

GREENFIELD RETIRES

Chief Historian for the Department of the Army, Dr. Kent R. Greenfield, Class of 1911, was honored at a farewell reception Friday, September 26, 1958, at the Naval Gun Factory Officers' Club before retiring on the 11th of October.

A native of Chestertown, Maryland, and exchairman of the bistory department of Johns Hopkins evred the Army for 12 years. As a dean of military historians, the scholar will leave an immense research and writing project—the history of the Army in World War II—well on its way towards completion.

This task involved the planning, editing and subsequet publication of a series of 80 odd volumes, as well as nine books dealing with the Korean conflict and the intervals of peacetime activity. Nearly 50 percent of the monumental World War II study has been published since Dr. Greenfield was appointed civilian head of this cooperative.

After receiving his undergraduate training at Western Maryland, Dr. Greenfield was awarded the Ph.D. degree from Johns Hopkins in 1915. He served as an assistant professor at Yule for 10 years, and in 1930 rejoined Johns Hopkins as Professor of Modern European History and as chairman of the department.

Dr. Greenfield has continued to lecture at various colleges throughout the country while serving the academic interests of the Army. He will soon move to Baltimore, where he plans to write his own two-volume history of the second World War. An authority, too, in the area of Italian history, Dr. Greenfield plans extensive travel in Italy next spring. He is the author of *Economics* and *Liberalism* in the *Risorgimento* and *The Historian* and the Army.

Organist Opens Concert Series

In addition to the regular student and faculty plays, recitals and concerts, Western Maryland each year has a series of campus concerts by professional artists.

The programs are open to the public as well as to the college community. Alumni and others who are within driving distance are also invited to take advantage of the series. This year the concert committee has scheduled four performances which will include Organist Catharine Crozyier, the Claremont Quartet, the National Symphony and a production of "Twelfth Night" by Players Incorporated.

Miss Crozier's concert, on October 24 in Baker Memorial Chapel will open the winter season on the Hill. The artist is Professor of Organ and Organist of Knowless Memorial Chapel at Rollins College, Winter Park, Florida. She has a Bachelor of Music and Master of Music degree from the Easttern of Music degree from the Eastman School of Music where at one time she was head of the organ department.

Miss Crozier's concert tours have taken her throughout the United States, Canada, England and France. She has also made numerous recordings. The artist scess the organ as not merely an instrument to perform the works of the past. She thinks of it as a contemporary medium and constantly performs modern works.

Her program for Western Maryland is a blend of the old and the

CATHERINE CROZIER

new. It includes:

George Frederic Handel (1885-1759)-Concerto in F. Major, Opus 4. No. 5. Larghetto, Allegro, Alla siciliana, Fresto; Nicholas Le Begue (1830-1702)--Noel "Une Vierge Pucello"; Claude Daquin (1694-1772)--Noel Grand Jeu et Duo; Andre Raison (1650-1720)--Trio en Passacaille, (The theme of this trio was borrowed by Bach to be used as the first half of the theme for his Passacaglia in C minor); Johann Schastian Bach (1685-1750)--Passacaglia and Fugue in C Minor; Paul Hindemith (1895-

→—Sonata I, Massig schnell -Lebhaft, Scher Langsam - Phantasie - Ruhig bewegt; Jean Langlais (1907 -)—Dialogue sur les Mixtures, Arabesque sur les Flutes; Jehan Alain (1911-1940)— Deuxieme Fantaisie; Marcel Dupre (1886 -)—Prelude and Fugue in G Minor.

WESTERN MARYLAND COLLEGE BULLETIN

Volume XL

October, 1958

No. 1

Western Maryland College Bulletin, Westminster, Maryland, published eight times a year, once in the months of December, March, April, June, August and October, and twice in February, by the College.

Entered as second class matter, May 19, 1921, at the Postoffice at Westminster, Md., under the act of August 24, 1912. Accepted for mailing 1917.

Editor, Nancy Lee Winkelman '51

College Holds Leadership Conference

Thirty-five student leaders returned to college a little early this fall to attend Western Maryand's first leadership conference.

The three day meeting, devoted to discussions among students and faculty, was built around the theme "Helping the Hill." As the Belletin goes to press the conference is just over so it is hard to make an valuation. However, the sessions provoked considerable discussion among the student leaders and made many a faculty member stop and think.

The planning committee—Dean Helen G. Howery, Chairman; Dr. Jean Kerschner; Dean William M. David, Jr.—set up certain objectives for conference members to keep in mind during the sessions. The objectives were based on observations by students and comments from the faculty.

Western Maryland's first leadership conference had these aims:

 To strive toward an understanding of college as a total educational experience and to arrive at an understanding of the relative importance of various aspects of college life.

2. To examine the responsibilities and privileges of student leadership in a small college community

 To define and appreciate the relative roles of students, faculty and administrative officers in the college.

4. To pre-view various organizational activities; to evaluate their worth to the entire college community; and to make recommendations for more worthwhile organizational nolicies.

The conference opened with a social dinner on Sunday evening, September 14. At the first seasion James W. Cotter, '49, make the keynote address. Jim was SGA president in '48-9, on the football team and president of the Bachelors. His talked covered the Bachelors. His talked covered the

DINNER HOUR-Members of the Student Leadership Conference and their advisers meet for a social dinner to open the session.

sponsibility in a small college. He left the students with little doubt that real leadership is a responsibility with more work than glory.

The Monday session opened with a general discussion of "Does the American College Actually Train for Leadership." After hearing reports from various Foundations, the session broke up into group discussions of the implications for Western Maryland leaders.

Monday afternoon was devoted to an examination of the contributions of campus organizations. Again the group was divided, one section devoting its attention to general campus organizations, the other to fraternities and sororities. After a breach for cokes, the group went right on with a discussion of mobilems of the college calendar.

On Monday evening the students heard a faculty panel on the subjeet "What We Think Would Most Help the Hill." Faculty members participating were Dr. L. Earl Griswold, Dr. Reuben Holthaus, Dr. Ralph Price, Dr. Charles Crain, Dr. Jean Kerschner and Dr. John Makosky.

Tuesday was devoted to summing up and a return to points which particularly interested or bothered the conference members. The entire meeting was in the nature of an experiment. It developed from a desire of both students and faculty to see something more worthwhile develop from all the time devoted to extracurricular activities. Several months will probably go by before any real trends will be notable.

However at Tuesday's sum-up session the student leaders did compose the following resolutions which they have submitted to the student body, the faculty and administration:

We the Student Leaders of Western Maryland College, recognize the need for an improvement in the atmosphere or tone of our community and we sincerely desire to improve our entire college life. We do not believe that any short-comings are solely caused by faculty or students or administration, but rather they result from a lack of communication. cooperation, and understanding of each group's purpose. In order to improve the communication and cooperation and understanding between all who make up our community, we make the following proposals:

 The Student Leader's Conference would like to go on record as being in favor of the college establishing a new administrative position to be known as either assistant to the president or as vice president of the college. We feel that this office is much needed to assist the president in meeting some of the minor everyday campus administrative problems. Such

(Continued on Page 10)

FAC Aids Freshmen

Freshmen coming to Western Maryland in the past few years have found that on every side there are individuals and agencies ready to help make their adjustment to college a lot less complicated than they had anticipated.

Chief among the agencies is the Freshman Advisory Council whose twenty senior members are carefully picked in the spring by the Deans of Men and Women for their leadership in the academic and extracurricular life of the college. In the spring these men and women attend a series of discussions with the Deans to talk over freshman problems and pitfalls and receive some instruction in advising.

During the summer they let the incoming class know of their function and how willing they are to help. This year's freshmen women, for example, received a four page letter covering everything from the kind of clothing needed to the fact that there would be young men available to help unpack cars on opening day.

Each senior adviser is assigned a group of from six to eight freshmen who often live in the same dorm or are interested in the same major field. The advisers are expected to have the answer-or know where to find it-to any, except academic, problems. The academic area is up to a faculty adviser and these senior students are trained to encourage freshmen to make more use of this help. The Freshman Advisory Council is on hand to help with questions or problems a freshman may hesitate to take to a faculty member because they seem too unimportant.

Dean Howery sees the Council as one of the most important additions to college life in recent years. Freshmen undoubtedly are grateful for the help and feel relieved to know there is someone to turn to.

LEARNING TO LEAD-Through work in such groups as the Freshman Advisory Council and the Student Government, students learn practical aspects of leadership.

Other Services Add To Gacilities

In addition to the FAC and faculty advisers there are a number of other services for students:

Dr. William R. Ridington is vocational counselor. Students who aren't sure about a career or who are having doubts about their choices are invited to talk with Dr. Ridington. Through discussions and by testing he can often help a student clarify his thinking and set some objectives.

The school also has a consultant psychologist, Dr. Michael H. P. Finn. Dr. Finn, who has offices in the infirmary, helps students who are referred to him by the Deans or who go on their own. He specializes in personality difficulties or adjustment to college life.

The newest group to aid students is the Student Life Committee appointed this summer by President Ensor. The committee has assumed the duties of a former Student Activities Committee. Its function is to be aware of the total life of Western Maryland students and their activities. The group will attempt to plan and coordinate college activities so that overlaps are avoided and gaps are filled. The faculty section of the commitee represents several areas of student interest. Members are: Dean Helen Howery, Dean William David, Dr. Jean Kerschner, Dr. Charles Crain and Mr. Robert Waldorf. Five students will also be members including the president and vice president of the student government.

Each of the individuals or organizations listed, in addition to the two Deans and the Freshman Advisory Council, is included in the section of Facilities in the student handbook.

Students usually think of buildings, labs and books as facilities. However, they are becoming aware that these newer services are every bit as important for a successful college career.

Deans See Change In Concept

A few years ago Dr. Helen Howery received a letter of criticism from a student who had not managed to complete a full year on the Hill. The young lady advised Miss Howery to reflect on her responsibilities as Dean of Women. As Dr. Howery puts it "she told me that it was my duty as dean to learn the secret aspirations of every girl on this campus and help her realize those aspirations!"

Dean Howery says she can't think of anything worse than a systematic prving into the student body's hopes and dreams. "Imagine a series of appointments for girls to tell me their secret aspirations" she adds. If someone does want to talk with her or with Dean William David, both are ready to listen and make suggestions but neither makes a compulsory appointment to probe a student's private thoughts.

Dean David, doing a little reflecting on his responsibilities, believes that the concept of a dean has changed in the past several years. He and Dean Howery look on a student's college experience as part of a total experience. They feel students learn from everything that affects them. Dean David suggests, for example, that if a student breaks furniture in a dorm and nothing happens, he learns something. What he learns may even be more important than something he was taught in class. The new Judiciary Board and the way the college handles fraternities and sororities teach students something about people in authority and methods of arriving at decisions-it is a part of a total experience.

Both Deans agree that they should function not principally as disciplinarians but as counselors. Deans have to deal with infractions of rules, naturally. However, Dean David feels that infractions should not be considered only as behavior to be punished but as the end result of something that is bothering the student. He believes in trying counseling before putting a student off the campus and adds, "you can put up with a lot of nonsense if you feel that a student can be salvaged."

An extension of this type of thinking is found in the Judiciary Board. The faculty-student group handles behavior which, while it cannot be tolerated, is looked at as an indication of students in need of help-the kind of help a small college such as Western Maryland ought to be able to give them.

The Deans both express amazement at the way student members of the Board have handled problems. Anyone hearing the deliberations would be impressed, they believe. There is kindness but firmness in the decisions. In the process both students and faculty learn a great deal about the treatment of infractions. And, the student body as a whole has come to know that the institution is not principally punitive but one interested in the development of each individual.

The deans base their whole attitude on the worth of each individual. They believe that it is the strongest justification for a small (Continued on Page 11)

-Dean Howery teaching and, with his back to the camera, Dear THE DEANS-These two pictures show the deans at work in two ways David pausing on campus for an impromptu conference.

688 Enroll This Fall

688 students are enrolled at Western Maryland for the year '58'59 as the Bulletin goes to press. This is about 20 more than last year.

As the college tries to meet the continuing growth in the number of those who want to enter college, several emergency measures are being taken to house students. Guest rooms in the girls' dorms are used by students this fall and two of the homes acquired with the seminary property now house women students. There isn't a vacant bed in the men's dorms. All told there are about 599 boarding students which more than fills the dining hall. Training tables for athletic teams and waiters eating earlier alleviates this.

The ordinary balance between men and women students broke down under the strain. There are \$24 men to 54 women—this because there was more housing available for women. In the senior class there are 52 men and 73 women making a total of 125 students. The junior class breaks down with 76 men, 65 women, for a total of 141. There are 177 sophomores, divided into 89 men and 88 women. The freehman class, which totals 243, has 116 men and 127 women.

For the first time in several years there will be no new foreign students entering the college. Those on campus returned for another year from Korea, Yemen and Syria.

As usual Maryland leads in the number of students in the incoming class with 174. New Jersey is the next highest with 22, followed by Washington, 9. Pennsylvania and New York each sent 8 to the enrolled from Virginia, Delaware, Massachusetts, Georgia, Connecticut, Ohio, Michigan, West Virginia and Okinawa.

Freshmen arrived on campus September 17 for the annual Orientation Week.

DEAN W. HENDRICKSON

Prof To Continue Teaching

Among those returning to the Hill this fall is a very familiar figure to alumni dating as far back as 1925.

It is doubtful that anyone could attend this college without becomling aware that up on the third floor of Science Hall Professor Dean W. Hendrickson holds forth in the English department. For the past 33 years he has been the final authority on word meanings, fine points of grammar and other complicated matters.

Professor Hendrickson has a great many interests including Shakespeare and astronomy but his best known hobby is this low of words and their meaning and placement in sentences. He has written scholarly papers on difficult constructions for publication. He's called upon to sottle innumerable arguments or supply difficult anwers. His knowledge of astronomy is such that this summer he was able to fill in a few days for Dr. Summers who was at a special conference in California.

At Commencement last June, Professor Hendrickson reached retirement—but new students won't miss knowing him because he is going to be teaching at least another year, probably more.

Bish Directs NEA Service

Dr. Charles E. Bish, Class of 1925, is now director of the service on talented students which has been inaugurated by the National Education Association.

His job is to collect research data and other material concerning the education of gifted students and make it available to school systems and other educational organizations in need of up-to-date information. The service is being financed by the Carnegie Foundation.

Dr. Bish has been in the Maryland and Washington educational systems for 33 years. He went to the NEA after retiring as principal of McKinley Tech High School in Washington. He also held an associate professorship in education at George Washington University.

Former Prof Retires At UM

Dr. Arthur E. Woodhead, former teacher of biology and chemistry at Western Maryland, has retired as professor of zoology at the University of Michigan after 34 years on the faculty.

Dr. Woodhead came to Western Maryland in the fall of 1918 and remained until 1924 when he went to the University of Michigan as an instructor in zoology. Most of his career has centered around parasitology—both as a problem in the classroom and research laboratories.

The professor is credited with discovering the controversial germ cell cycle in a species of parasite known as trematoda. He has written numerous scientific articles and has directed field studies and taught at the U-M Medical School.

Some faculty members now on campus remember Dr. Woodhead, some as students, others who were just beginning their teaching. He was succeeded by Dr. Lloyd M. Bertholf, now president of Illinois Wesleyan University.

Gifts And Memorials Increase College Library Collection

Librarics grow in several ways —by acquiring new buildings, new books, gifts of money and gifts of private collections.

Over the past years the Western Maryland library has been fortunate in receiving several of the latter. One of the most outstanding collections is that of Dr. J. T. Ward, first president of the college. Much of this library was catalogued some time ago. However, this past year more extensive work has been completed on the collection.

Points Out Problem

One of the difficulties, college librarian Miss Elizabeth Simkins pointed out, is that many of the books may be of value as antiques and each must be cartefully checked. For this reason it takes a lot of time to go through a library of several thousand volumes. In Dr. Ward's collection, the cataloguer this year found much valuable material. There was also a lot of duplication.

Among the large groups in the Ward library were some Maryland imprints of interest, a large amount of bound pamphlets, some periodicals, mostly religious, a number of readers and a collection of grammars and rhetorics. One of the most interesting features, Miss Simkins said, was the diversity of subjects which interested the former president. The books range from religious subjects to English and American literature and include economics, phrenology, shorthand, simplified spelling, gardening, history and science.

Another former president, Dr. Thomas Hamilton Lewis also left his library to the college. This year more of those artons have been opened and the material either catalogued or discarded. A number of useful volumes were found in addition to once which have been on the shelves for several years.

Recently Dr. Austin R. Middle-

ton, former director of the Department of Zoology at the University of Louisville, left his scientific collection to the school. The books of Dr. George Wills, professor emeritas, also were given to the college. Samuel M. Harn, a Balimore lawyer gave 3,000 volumes, mostly biggraphies, history and religion. And Clarence Wagener of Baltimore wrote to Miss Simkins about some books he had stored in Carroll County which turned out to be a miscellaneous collection of over 400 volumes.

Miss Simkins and Miss Minnie Ward remember a very frustrating experience in connection with another collection. Mrs. Estelle Williams of New Windsor and New York had a house filled with books. One day the Western Maryland librarians got a call to come over and pick out what they could use before the estate was settled. It all had to be done in a half day and the two had no time to check their lists or trace the books for antique value. In recent years Mrs. Edgar Nusbaum, the New Windsor librarian, has sent to the college volumes which her small library cannot use.

Sale Planned

Some volumes come from faculty, students and friends in small groups. A recent memorial was given by Dean Helen Howery in memory of her mother.

As books go out of date, as the cataloguer discards volumes not useful to the college and as the accumulation grows from various other sources, the librarians begin to think about their book sale. Librarians have a hard time just tossing away books. They try any number of ways of finding more uses for their volumes. So, in November the annual book sale will be held on campus. In past years it has been very successful. The number of cartons already available for this year indicate another good sale.

Days Build New School

Rev. Wesley Day, '31, and his wife, back in Sumatra and busy building a new school on that Indonesian island, faced a problem that seems unique in school construction. In a letter they explain the unusual situation which occurred before and after their leave in the states.

On the first day of their return while traveling from the airport to their home in Palembang, the Days passed a hilltop "once called by a mayor of our city, "The Pearl of Palembang'." The Methodist church bought the hillton in 1952. However, in 1955 while there were no missionaries in Palembang squatter huts appeared. The Days write, "When we arrived late in May, 1955, most of the land was marked off into plots and people were building attap homes. Ingenious rascals had organized a 'Home-owners' Cooperative Association,' sold memberships in their organization Sunday afternoons and assigned each 'member' a piece of ground for home and garden."

The head of the organization was put into jail. However, the Days say, he was a war veteran and powerful. "Eventually he was out, building a permanent home on our land, with the money from innocent purchasers. The city government gave us a building permit, which strengthened our legal position. They also had squatters, When warning deadlines had passed they drove the squatters away with armed police and wrecked their homes with bulldozers." As the Days said this was hardly what the Methodists wanted as a start for their missionary project.

While the couple was on leave, however, other changes were made and when they returned home they could ase the last of the houses bsing carefully taken down, tile by tile. The project once again was moving smoothly and peacefully. This year Rev. Day is serving as superintendent of the Chinese District.

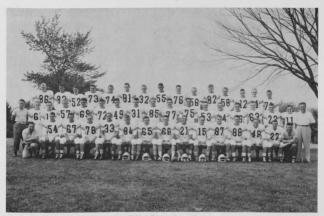

Summer Camp

This summer 26 Western Maryland students joined 1,200 other cadets at Fort George G. Meade for six weeks of practical training.

On the left Cadet Paul A. Zimmerman laces boots he has just been issued. Below him Cadet Samuel L. Cook demonstrates a machine gun for (left to right) Col. Dayton E. Bennett and Major Arnold V. Clark, PMS&T at Western Maryland and Dr. L. Earl Griswold, assistant professor of sociology here. At the right, below, cadets are briefed for pay call. They are left to right Cadets George Summers, James I. Lewis, Bruce Lee, and Stewart Dorweiss. At the bottom a platoon receives an operation order on a tactics problem.

FOOTDALL SQUAD-Left to right: First Row-Waldorf, Fringer, Burger, Bender, Becker, Thys. Bater, Devey, Schwartz, Belington, Lewis, Welling, Dorothin, Cuthrell, Fugh; Scond Row-Jones, Hobart, LeFew, Allwine, Puesy, Marlin, Jones, Giese, Gill, Mahan, Rembert, Leneski, Carter, Stewart, Deaner, Dikes, Holter, Boyer; Third Row-Hudgins, Wolf, Hite, Gilmore, Sitter, Watson, Jackson, Shilling, Warfield, Mc-Kenna, Anders, Bacas, Brown, Berguist, Richards.

Things Look Brighter For Football Team

The Terrors defeated Bridgewater 34-12 in the season's opener.

The first game hasn't been played as the Bulletin is being written but Coach Bob Waldorf says things look brighter this year for the Terror football squad.

Thirteen lettermen were included in the record breaking 50 candidates who turned up at fall football camp this September. Coach Waldorf says the depth problem has improved but is still a problem. He feels the team needs a good victory to boost its confidence.

Quarterback Warren Schwartz, who completed nine touchdown passes last fall, was among the returnees. He is co-captain. Others back are center Jack Fringer, guards Fred Burgee and co-captain Don Dewey, ends Jim Lewis and Frank Thye. At tackle the Terrors have Joe Bender and Walt Mahan. In the backfield are Fred Dilkes, Dave Edington, Al Stewart, Carroll Giese, and John Holter.

Both Gettysburg and Lafayette have been removed from the schedule which makes for a more reasonable season. Kings College, Lycoming and Bridgewater have been added to give the Terrors a nine game schedule. This year six of the games are at home.

Back on campus to coach the backfield is Ron Jones, '55. Ron played on the '51 Terror team which took the Mason-Dixon Conference Championship. He had been in the Army since graduation.

Soccer Team Still Builds

The soccer team is still in the building stage Coach Philip Uhrig says. He expects his slimmest turnout in several years.

The squad was small last year and two of the lettermen will be unable to play because of heavy lab schedules. Mr. Uhrig is particulady in need of a center forward and a right wing. Fourteen members of last year's squad are returning, eight of them lettermen. They include Max Beyer, Bob Hyde, Ted Kinter, Bruce Lee, Lou Schatt, Don Shure, George Varga, Bob Cole, Jim Gibson, John Karer, Larry Langfeldt, Lloyd Musselman, Carl Silex, and John Waghelstein.

Gettysburg is no longer on the schedule. Lycoming has been added. This year is also the end of a two year home and home series with Frostburg. Last year the soccer team had a four and eight record.

Jund Drive Names Listed

Following are names of donors and class agents for the 1958 Annual Alumni Fund who were not listed in the August Bulle-tin: 1990 Adele Ogden Caton Grace Gorsuch Wheeler 1961 essie Graham Adkins Jessie Graham Adkins Edward C. Conference

(Continued from Page 3) an officer could be more readily accessible to both students and faculty when it is necessary for the President to be absent from the campus while performing other vital duties.

2. We would also like to go on record as being in favor of the Pan-Hellenic Council's adopting the academic standards for athletic eligibility as a minimum standard for eligibility for membership in a fraternity or sorority. We recommend that this plan be adopted for second semester of this school year, 1958-59.

3. To stimulate a higher intellectual tone on campus and "self directed" pursuit of culture and to make better use of faculty resources, we propose a student committee to work in conjunction with the existing assembly committee to plan and sponsor at regular times during the school year non-compulsory assemblies or meetings which feature special addresses and discussions by faculty members.

4. The Student Leadership Conference would like to go on record as being in favor of the establishment of one centrally located college calendar.

5. The Student Leadership Conference would like to see students combine with administration and faculty members to form a committee to select chapel speakers. We would also like to go on record as being in favor of more student participation in chapel services.

6. The Student Leadership Conference is in favor of student membership on the assembly and cultural activities committees.

7. The Student Leadership Conference would like to recommend that the Men's Council study the proposal that quiet hours be established in the men's dormitories.

8. In order to improve campus communication the Student Leadership Conference strongly recommends that the funds designated to establish a campus radio station be approved.

9. The Student Leadership Conference recommends that a committee of faculty, students and administration study the feasibility of shortening or eliminating classes on Homecoming and May Days.

10. The Student Leadership Conference recommends that the Interfraternity Council suggest that fraternity members begin to wear a dress shirt and tie and perhaps a sport coat as part of their regular attire to the evening meal.

11. The Student Leadership Conference would like to go on record as being in favor of the continuation of Hell Week with some modification. This modification will mainly consist of adding a "Help Day" (or Days) to Hell Week.

12. The Student Leadership group will meet again at the beginning of the second semester for an evaluation of their accomplishments.

13. We recommend that the Student Leadership Conference be made a permanent part of the college vear.

14. The Student Leadership Conference wishes to extend ternity and sorority pledges will assist in some project which will benefit the entire college communitv.

DEANS

college (Continued from Page 5) In addition to responsibilities as deans, both Dr. Howery and Mr. David are professors. Dean Howery has always been involved in a dual position and would not care to be solely a Dean. A graduate of Radford State Teachers College, she received her A.M. and Ed.D. degrees from Columbia University. She has spent two summers studying at the Shakespeare Institute and Oxford University. She taught in high schools and in an experimental program at the Teachers College before coming to Western Maryland in 1946.

Dean David is a graduate of Dartmouth College and received his A.M. at Columbia. The Dean is in the process of writing the dissertation for his PhD. degree. He came to Western Maryland in 1952 and combines teaching in the history or sociology departments with his other duties.

Part of the new theory in deanship comes from a change in the whole attitude of college administration, Dr. Howery and Mr. David point out. There has been a swing away from the authoritarian approach where the faculty did everything to a realization that students can often handle their own problems better than the faculty and, with a judicious amount of help, can come up with extremely reasonable and far-seeing decisions. Students are now encouraged to make their own decisions and to assume responsibility for them.

To help students under such a program you have to know them and they must want to know you. Part of Dean Howery's technique involves a knowledge of quantity cookery. Her most important achievement in this undeanly department as far as most seniors are concerned is quantity waffle making and the art of keeping three or four waffle irons in production at one time. She likes to have the women to her apartment -also has a waffle breakfast that is strictly a stag affair. In this connection she adds, "I shall never

forget the time when Henry Taitt leaned back, loosened his belt, and announced that he was shifting into second gear—at a moment when I was wondering whether the four times normal receipe was going to last for the fourth meal the boys had had that day."

An outgrowth of the new approach is the student who dismissed one of the Dean's less calm moments with the statement. "Aw, Dean Howery, you know you are an institution around here." Dean David is still called upon to venture in the line of fire when a water battle breaks out in the men's dorms but usually the student government has the situation in hand hefore he arrives. A dean's work ranges from this to handling hysterical women, counseling on academic matters, grading papers, or talking with a student who has really gotten into a lot of trouble. Dean Howery has to add "locating the Christmas decorations that get lost every year" and both have trouble keeping up with all the weddings. The Dean of Women says she now lives in fear of having some of the children of these marriages turn up in Freshman English.

"I have mixed feelings as I look toward those days," she says, "especially after discussing Queen Victoria with several groups of freshmen. I am not sure I want to become that kind of institution, but I'm on my way."

Institutions or not, Dean David and Dean Howery represent something different in student personnel administration. The difference is noticeable in their general relationship with student groups and individuals. It is also evident in the section of the student handbook devoted to rules and regulations which grows smaller each year.

Dean David puts it this way— The student whom we admit and who fails to make the grade for any reason is a failure of everyone and a loss to society—it is potential going to waste. We want to turn out useful and productive citizens who know what they want to do and who can use their education in doing it.

AAUW Plans Adkins Fund

The American Association of University Women has established a Fellowship Fund in honor of Bertha S. Adkins, Under Secretary of Health, Education and Welfare, who was Dean of Women at Western Maryland for eight years.

Through contributions, a \$50,000 Fund in Miss Adkins' name will provide for an annual award to women for advance graduate study or research in the field of social science, including United States history, government and politics.

Before going into active polities in 1946, Miss Adkins was dean here and then Dean of Residence at Bradford Junior Collegs in Massachusetts. She was A selistant Chairman of the Republican National Committee prior to becoming Under Secretary.

A native of Salisbury, Maryland, Miss Adkins attended school three and the Baldwin School in Bryn Mawr, Pennsylvania. She has an AB degree from Wellesley College and an MA degree from Columbia University. She was awarded an honorary Doctor of Laws Degree by Western Maryland in 1953. Miss Adkins is also a trustee of American University.

WESTERN MARYLAND COLLEGE Bulletin

FOR ALUMNI, PARENTS AND PRIENDS

DECEMBER, 1958

Merry Christmas

EVENTS FILL CALENDAR

December is a month of tradition all over the world and a college campus is no exception—especially Western Maryland where there are traditions to be observed throughout the entire year.

Similar to families who bring out cherished tree ornaments year after year, the college community looks forward to certain events which annually occur during this month. Among the loveliest of these is the combined dramatic art - music department program. This year Miss Esther Smith will again present the stained glass window tableaux as part of the Christmas program. The girls' glee club under the direction of Miss Margaret Wappler will open the program with Benjamin Britten's Ceremony of Carols. The program will be held on Sunday afternoon, December 14 at 4:30 in Alumni Hall.

Among the newer Hill traditions is the lighting of a community Ghristmas tree which grows on the lawn of the President's home. This will take place on Sunday, December 7 following the presentation of the Christmas section of *The Messiah* by Handel during chapel service. The choir, directed by Professor Alfred deLong, will total 80 voices plus soloist for the program. Chapel is held at 7:15 in Baker Memorial Chapel.

Another traditional music program is presented by the French Club under the direction of Miss Margaret Snader. The members annually select old and new French carols to include in their program which is held in McDaniel Lounge. This year the program is scheduled for Monday, December 15 at 8 p.m.

The Christmas banquet for the entire school is a project of the Trumpeters. Members of this organization arrange for entertainment and decorate the dining hall for the occasion. Following the banquet the Student Christman Association holds a Christmas Communion in Baker Chapel.

Christmas Message

What do you hope for Christmas 1958?

With the birth of Christ hope was born. When he is born again in our hearts, hope is reborn. "I will lift up mine eyes," "I will lift up my heart," "I will lift up ...". These words express hope, the hope of all mankind, without which life would be meaningless.

Christmas 1958 is probably no different in many respects to previous Christmass except that it is now. It's what you will do with it hat is important. Will the buying of gifts which you cannot afford for those who do not really need or appreciate them fulfill our hopes and symbolize the real meaning of Christ's birthday?

The joy of the season is within our reach in the spontaneous enthusiasm of children, in the beautiful Christmas music, art, drama and poetry available so easily to all of us.

Most important, Christmas means sharing. To believe this and act accordingly is to be certain that no one ever needs to be alone at Christmas.

DR. REUBEN S. HOLTHAUS

WESTERN MARYLAND COLLEGE BULLETIN

Volume XL	December, 1958	No. 1

Western Maryland College Bulletin, Westminster, Maryland, published eight times a year, once in the months of December, March, April, June, August and October, and twice in February, by the College.

Entered as second class matter, May 19, 1921, at the Postoffice at Westminster, Md., under the act of August 24, 1912. Accepted for mailing at special rate of postage provided for in section 1103, act of October 3, 1917.

Editor, Nancy Lee Winkelman '51

Program Called Unique In U.S.

"The Master's program in education at Western Maryland College is almost unique in the United States." This is a statement from the Master's Program catalogue and the story behind it should be of interest to most Western Marylanders.

The unique characteristic is found in something called "action research", which can more simply be termed on-the-job analysis. A far as has been determined very few, if any, other schools use action research as an integral part of the requirements for a Master's degree.

The idea was first originated here in 1949. It came partly as the result of a study made by Dr. John D. Makosky, Dean of the Faculty. The third section of that report, "A Tentative Program for the Master's Degree at Western Maryland College," apparently influenced the policy and requirements of the graduate program. Action research is not mentioned but the general idea is indicated in this statement: "During the program the student will work extensively on at least one problem of practical teaching, making a final summary report of his procedures and conclusions."

At the time Dr. Makosky was developing this policy, Dr. Joseph Bailer came to Western Maryland as head of the education department. Since August, 1949 he has administered action research at the college. The Master's program had been in operation off and on at Western Maryland since the late 19th century but had declined during World War II. The change from a traditional thesis to action research was not abrupt but transitional. Persons who had already started work on a traditional study were allowed to finish.

Action research is a rather recent development in the United States. While it would be hard to set a definite date for its beginnings, it has come more to the fore since the end of the war. As a college program required of grad-

IN ACTION-Dr. Joseph Bailer, head of the education department who directs the graduate program, is shown here in a class discussion.

uate students it was unique when started at Western Maryland.

Dr. Rolf Muuss, who did a study of the program at Western Maryland and from whose thesis much of the material for this article is obtained, points out this fact of systematic action research as a new approach in education. "The fact that teachers have tried to improve their practice and to solve problems is very old, but that these changes are caused by a methodological and systematical research approach is rather new,"

As a background to his study, Dr. Muuss analyzed his own experience with traditional research in Germany. He made several studies and suggested changes in methods. His reports received fine grades and those who read them agreed. However, he points out, "While this kind of research is of value to the researcher who learns to solve a problem theoretically and also helps to meet requirements for diploma and certificate, the subject about which research is done often remains unchanged and uninfluenced . . . through these experiences which made me ask Research for what if it cannot be applied?', I was prepared to see the value of action research and its great advantage over theoretical research." Dr. Muuss received his Master's degree at Western Maryland and soon after received a Ph.D. degree.

What exactly is action research? It has been defined by one leading educational writer as research undertaken by practitioners in order that they may improve their practice. At Western Maryland it is further added that the research is carried on in a school system, by an employee of that system as part of his program of graduate study, as a means of improving that student's practice. The college accepts no plan which does not have the approval of the school administration in which the student teaches.

The plan is to have the students return to their regular teaching position between summers of study (or during a period of taking even ing courses) analyze a problem in theory and put it to actual test. The student selects a problem from his own experience. As Dr. Makosky visualized the program this

(Continued on Page 10)

New Trustees Elected

Three alumni were elected to the Board of Trustees at the fall meeting in October. They bring Board membership up to a total capacity of 40.

Newly elected are: Rev. John Bayley Jones, '41, F. Kale Mathias, '35, and George A. Meyls, Jr., '22.

Dr. Jones, who is minister of Calvary Methodist Church in Washington, D. C. takes the place of the Rev. William H. Litsinger who died in the spring. He received the Bachelor and Master of Sacred Theology degrees from the Wesley Theological Seminary. For four years, Dr. Jones served as instructor in sociology and Director of Public Relations for the college. This spring he was awarded a Doctor of Divinity degree by Western Maryland.

Mr. Meyls, who lives at 12 Beechdale Road in Baltimore, has been associated with the West Coast lumber industry for the past 30 years. For two years he has been chairman of the Annual Alumni Fund and has been his class chairman several years. Under his chairmanship the Fund has been tripled. Mr. Meyls' daughter, Deborah, graduated from Western Marvland in 754.

President of the Alumni Association, Mr. Mathias lives on Main Street in Westminster. A graduate in the class of 1935 he has served as Alumni Visitor to the Board of Trustees. Mr. Mathias is associated with Joseph L. Mathias and Sons, monument builders of Westminster. He is vice president of the Carroll County General Hospital, a former president of the Westminster Kiwanis Club and is now vice president of the Monument Builders of America, a national organization.

Trustee memberships on the Western Maryland Board are lifetime positions. Of the 40 members one more than one-third must be ministers of the Methodist Church.

John B. Jones

Alumni Visitors Have New Role

By Philip E. Uhrig

At the October meeting of the Board of Trustees a new importance was added to the role of the Alumni Visitor to the Board. A proposal by the Executive Committee of the Board of Trustees that Alumni Visitors be appointed to serve on Board committees was approved. The proposal was suggested to the Executive Committee by a Special Study Group of the Alumni Association.

Within the framework of the governing hoard of the Alumni Association are nine members known as Alumni Visitors to the Board of Trustees. Six are elected by the alumni to serve three-year terms. These terms are staggered so that each year two new Alumni Visitors take office as two retire. The remaining three automatically become Alumni Visitors when elected to the offices of President, Vice president and Executive Secretary of the Alumni Association, Until the recent action of the Board these Visitors had the right of attending trustee meetings and voicing opinion. Now they will be appointed to serve on committees with trustees. There is no voting privilege. However, committee status marks a significant step forward in the role of the Alumni Visitor. In recognizing the importance of liaison between the college and its Alumni Association, the Board of Trustees has now made it possible for elected Alumni Association officers to take an active part in committee work leading to the general development of Western Maryland College.

The importance of this status has not been completely missing in the past for it is interesting to note that of the forty members of the Board of Trustees, twentyseven are graduates of the College.

More Firms Give

In the past year the following firms contributed directly to Western Maryland rather than through the Association of Independent Colleges in Maryland which was mentioned in the August issue of the Bulletin:

Coca-Cola Bottling Company. (Thomas), Inc.

Esso Standard Oil Company Household Finance Corporation Johns Manville

Remington Rand Corporation Riggs-Warfield-Roloson, Inc.

COMING ALONG-The new student union building gradually takes shape on the slope of the Hill below Lewis Hall. Here the picture shows the building looking up the Hill toward Baker Memorial Chapil and Old Main.

Campus Changes To Continue Through This Spring

If certain steps now being taken on campus move along as scheduled, the Hill will be considerably changed by Commencement Day. If any one step is held up or fouled up, however, the Hill will be in a state of considerable confusion on that day.

Now that the biology department switch is complex, work is going ahead on the Seminary building. Science Hall, incidentaily has been renamed Memorial Hall. A plaque will be placed in the downstairs lobby listing all those names which are, or were, on buildings in the Old Main unit. Memorial Hall was selected to commemorate all of them.

The Seminary building, or Elderdice Hall as it is now known, is rapidly getting an interior face lifting. Walls are being torn out and new ones put in, doorways and partitions are being placed to fit the new use of the structure. And, that new use will be as an administration building. All of the administrative offices are to be moved from the former Carroll Inn, located on the far side of the Taneytown road, and into Elderdice Hall. Elderdice Hall will have a wide entrance with access to the building from either College Drive or the back campus. Going into the building from the present entrance, the President's office will be on the right and the Registrars, Treasurer, Admissions Counselor will be on the left. On the second floor, on the left, will be the offices of Deans Schofield, Makosky, David and Howery. On the right will be the Military Department offices and the Alumni and Public Relations Offices.

While all of this renovation is going on, back campus the student union building is going up. It is moving along fairly rapidly now and the hope is that it will be under roof before snow sets in. This is one of the vital steps in the plan because the Post Office and Grille eannot move until it is completed. In connection with this construction, a radiway will be extended from the main entrance to Hoffa Field, past Albert Norman Ward Hall and over to join the road which runs in front of Gill Gym. In talking about moving administrative offices and student services, some things obviously occur to alumni. What happens to the art and home ec departments and what will the present administration building be used for? The art department will be in temporary quarters for another few years in the home of the seminary president, located right next to Elderdice Hall. It is anticipated that Art will move to the library when that function has a new home.

Home economics will get a new home this year. The department and its management house facilities will all be located in Carroil Inn. Considerable renovation will be necessary, of course, and here again time is a factor.

As everyone is now aware the next logical step is to tear down Old Main. According to President Ensor this will probably take place between May Day and Commencement. This step naturally is contingent upon all the others. Every function and facility now housed in the old building must be settled before it can be razed.

Patricia Schaefer

Pretty Girls Liven Campus

The month of November may be a time when football and soccer heroes take the stage but these days they have to share the spotlight with bevies of pretty girls.

After all, don't they call a halt to activity on the football field Homecoming Day so that five of our fairest can be honored? And, even that stalwart bunch the military contingent can't quite manage without a full quota of female sponsors. So, all during the past month Western Maryland bulletin boards have been considerably brightened with pictures of our coeds vying for the favored positions.

On Homecoming Day Miss Patricia Schnefer was the school's choice as Queen. Patty reigned over halflime activities and received her crown in the evening at the Homecoming Ball. We might add that even that sacrosanct item of literature, the football program, had Patty's picture on its cover. The editor decided she was prettier than any of our gridiron warriors.

Miss Schaefer had as her court four other pretty girls: senior attendant, Miss Shirley Ream; junior attendant, Miss Sue Warren;

HOMECOMING COURT-Left to right: Top Row, Shirley Ream, Sue Warren. Bottom Row, Peggy Stakem, Carole Gordon.

sophomore attendant, Miss Peggy Staken; and freshman attendant, Miss Carole Gordon. This year all members of the court happened to be residents of Maryland. Patty, Sue and Carole are all from the Baltimore area while Shirley and Peggy are from western Maryland.

As for the military men, they elect sponsors for each and every one of their units, including the executive staff. Of course at offcial events they hide the girls in uniforms but come the Military Ball and things look a little brighter. It's like hiding a light under a bushel to put a really pretty girl in an olive drab uniform jacket but this year's sponsors should add a certain something to the spit and polish parades.

Two of the Homecoming attendants are also ROTC morale builders—Sue Warren and Shirley Ream. They sponsor the Staff and C Company respectively. Miss Melba Lou Nelms is sponsor of A Company, B Company chose Sue Cossabone, the Honor Guard selected Kay Mitchell and Lynne Sterling lends support to the band.

SECOND ART SHOW OPENS

The second in this winter's series of art exhibits is now on display in the College Gallery. It features contemporary furniture and pottery by Jean and Olin Russum.

This year Miss Louise Shipley, who directs the gallery, invited painter Keith Martin to open the season. Mr. Martin brought to campus a series of water colors which had never before been exhibited. The opening night attracted a considerable group of artists and collectors from Baltimore and the surrounding area. This was Mr. Martin's second oneman show at the college.

The second show, now in progress, by the Russums, opened on November 19 and will close on December 9. The artists, who maintain a studio in Monkton, Maryland, are well-known in Baltimore. Mr. Russum is the potter, concentrating on stoneware and reduction firing techniques. Mrs. Russum works with wood, oil and color stain to produce contemporary furniture.

Miss Shipley says that artists she contacts are quite willing to come to Westminster for an exhibit. In the years that the gallery has been in operation some of the better known artists in this region have held shows here. Each one is on hand for the opening night to meet students and faculty who attend and also to talk with the critics and other artists who come.

The gallery is located at present in Old Main and will continue there as long as the building is standing. Miss Shipley has not as yet been able to definitely decide on a future location when Old Main comes down.

The gallery is open to the public from 10 a.m. to 5 p.m. every weekday and from 8-10 on Wednesday evening. On Saturday and Sunday it is open from 2 to 5 p.m.

NEW COUNCIL—Looking at the new student union building are left to right: Donna King, Norman Davis and Sue Warren.

NEW COUNCIL IN OPERATION

Newly operating on the Hill this fall is the Student Life Council taking the place of the former Student Activities Committee.

The Council, composed of faculty and students, will be aware of the total life of Western Maryland students. It will attempt to plan and coordinate activities so that overlaps will be eliminated and gaps filled. Student life, from the classroom to extra-curricular activities will concern the members.

The Council will make suggestions for improvement in existing organizations and help with plans for such new proposals as the college radio station. The group will also look into problems connected with stude ent sponsorship of movies, use of college facilities and the new student union building.

Earlier in the summer, President Ensor selected the five faculty members who represent many areas of student life—Dean William David, Dean Helen Howery, Dr. Jean Kerschner, Dr. Charles Crain, Mr. Robert Waldorf. In addition the president and vice president of the student government are automatic members. The other three student members were selected after interested persons submitted applications. Chosen to join Allen Gilmore and Sherry Phelps were three members of the junior class. They are: Miss Sue Warren of Fort Meade, Maryland, a biology major, cheerleader, member of Tri-Beta and Phi Alpha Mu and on Homecoming and May Courts; Miss Donna King, Reisterstown, Maryland, a biology major, vice president of the junior class, on the house council and Freshman Advisory Council and a member of Sigma Sigma Tau: Norman Davis, Glen Burnie, Maryland, president of the junior class, a pre-med student, member of the soccer team, Tri Beta and Gamma Beta Chi.

ScoresDon'tTellTrueTerrorFootballStory

WM 20 - JHU 13

Western Maryland football fame who have watched the scores this season could not get the true significance of the picture as well as those here on the home front. With the Hopkins game yet to be played, Coach Waldorf's charges do not show an enviable record. Only two games in eight have been won. However, there is more than meets the eye in this record.

For one, this is a young inexperienced team-out of a squad of forty only four are seniors. There being no substitutes for experience. we can look to better things next year. Coach Waldorf and his staff have worked diligently with these young men hoping to mold them into a winning combination. It takes time to build a representative team to win games in the kind of competitive field we are facing. Other things are involved also. Right before the Drexel game an unfortunate turn of events found the Western Maryland gridders minus their star quarterback, Although sophomore John Holter did a fine job of calling signals, the morale factor was tough to overcome. To add to the misery, flu had stricken twenty percent of the team the same week. Unable to overcome these act-backs the Terrors dropped a 20-0 decision to a determined Drexel team whose only victory in the 1958 season was this one.

Another unhappy visit to Philadelphia came in the second game of the season when strong Penn Military beat Western Maryland 13-0 after the Terrors had opened the campaign the previous week by trouncing Bridgewater 34-12. In playing two other Virginia teams we did not fare as well. Randolph-Macon beat us 20-6 at Ashland. The following week Hampden-Sydney walked of Hoffa Field on the winning end of a 22-6 game.

In spite of three losses in a row, Bob Waldorf's boys came back strong against our new opponent King's College victimizing them 30-0 on October 25th here.

The heartbreaker of the year

came on Homecoming. Leading the Lycoming Warriors 26-6 at halftime, our hopes were broken when in the final minutes, the visitors (a second-half comeback team) converted an after touchdown point to win it 27-26. The week before Franklin and Marshall had beaten us 22-8.

The final game with old rival Hopkins to be played November 22nd is shaping up as quite a contest.

Cutstanding on offense this year has been the play of fullback Fred Dikes and halfback AI Stewart. To date Dilkes has earried the ball 139 times for an amazing total of 643 yards gained, averaging 4.6 yards por earry while Stewart has averaged 6.4 yards for 36 carries.

Seniors Jim Lewis, end; Captain Don Dewey, guard and end Frank Thye on the line and Dave Edington, halfback have bolstered the team defensively this year, along with the stellar defensive play of Fred Burgee, a junior from Frederick and Carroll Giese, center from Catonsville.

Soccer Team Finishes Strong

WM 5 - JHU 2

Looking at the other fall sport on the Hill this year we find the soccer team finishing much stronger than it started. With a rather small and inexperienced squad, Phil Uhrig's booters headed into a long twelve game schedule with not too much hope of winning many games in the face of strong opposition.

With only two seniors on a squad of nineteen men it was evident that sepreince, as with the football team, was the needed factor. Optimism increased somewhat as the result of the initial 2-1 win against Loyola. But the hopes died quickly as only one more victory came in the next seven games. Another 2-1 game was taken from Franklin and Marshall while the booters were dropping 2-1 decisions to Mt. St. Mary's, Frostburg and Lycoming.

In the same period Drexel (Middle Atlantic Champs) dumped the Terrors 7-1 and Catholic University (d of en di ng Mason-Dixon champs) beat us 5-0. However, it took Washington College two overtimes to beat out a 3-1 decision on October 29th. It seemed evident, though, that the soccer team was improving since so many of the losses were by close socres. Goal production seemed the greatest handican to the team.

On Homecoming a winning streak began with the home team beating the strongest alumni contingent yet to play here in a good game 4-2. The following week the Delaware Blue Hens fell under a 4-1 onshaught. Two days later travelling back to Washington, D.C., the Terrors opened all stops to trounce American University 6-1.

Outstanding in the turn of events has been the play of center forward George Varga (four geals ecored in the A.U. game) and his two wingmen, junior Bob Cole and dreshman Sam Corbin. The steady defense may be attributed mainly to the rugged play of senior center halfback Bruce Lee, gealie Lloyd Musselman and junior left fullback John Karrer. Hopkins remains to be beaten as the season closes November 22nd.

RIFLE TEAM-ONE OF THE "WINNINGEST" TEAMS ON THE HILL GETS SET FOR ACTION THIS WINTER. Back Row-Bains Yates; S. Hation; Jan Seiler; G. Weber; Cal Siler; Rick Richard; Roh. Otto. From Row-M.Sgt. Corner; C. Mitchell; E. Layr; R. Pore; K. McCaudo; C. White; K. Nichols D. Madnews; R. Siloyi; C. Fugh.

MASTER'S PROGRAM

(Continued from Page 3) happens during the first summer of work. The student studies the problem theoretically and determines the steps by which he will test his ideas in the laboratory of his classroom. According to Dr. Makosky, "The second stage is this practical examination of the idea under the microscope of everyday teaching conditions". The third stage involves reporting, revising, concluding and recording the observations. "The effort is not primarily to produce something new in the field of education research, but rather to face directly a challenging classroom situation in the life of the teacher-student himself and apply the best that is known to the problem-both in theory and practice," Dr. Makosky wrote.

Since the beginning of the program there has been a constant increase in the number of people who take their Master's Degrees at Western Maryland. Dr. Bailer says that people frequently come to him and indicate they have a project they would like to work out after having heard of the plan through other teachers. There were 14 students the first summer zession of the program. There are now over 400 committed to the program although they don't take curses every them. The first fall there were centers at York, Pennsylvania and Hagerstown as well as on campus. Then the areas increased to include York, Carlisle and Waynesboro in Pennsylvania which were discontinued in 1957. There are now established extension centers at Hagerstown, Towson, Hereford, Stemmers Run and Frederick.

Many schools now have programs called action research. Few of them are required for the graduate degree and often the meaning of action research is different in concept from its definition at Western Maryland.

Many of the graduates of the Western Maryland program have gone into administrative positions. This is not actually the aim of the program—it seeks to have the person use his best qualities to the advantage of his school. However, many become outstanding in the daily application of their jobs and are selected for advancement.

Action research in education is a practical approach to change and improve the school, the education procedure and the teacher, Dr. Muuss wrote. While it is scientific in its methods it is not separated from reality but connected with it. Dr. Bailer says he sees more and more evidence in the United States to a trend toward this type of program. He adds that those in the

Offices Move To Seminary

When all the work is completed the college will have a new administration building—Elderdice Hall. It is the former Seminary building vacated by the Seminary's move to the American University campus.

The Board of Trustees voted to continue the name of Elderdize in connection with the building. The structure was originally dedicated to Dr. Hugh Latimer Elderdize, president of the seminary for 35 years, who served on the Board of Trustees of the college for 40 years.

The present building had its beginnings with a group of students at Western Maryland and Adrian Colleges in the 1880s. They requested that the Methodist Protestant Church establish a theological seminary. The church first created a Department of Theology at Western Maryland with Dr. Thomas H. Lewis, second president of the college, as principal. In 1882 a separate school was established and called the Westminster Theological Seminary. Dr. Elderdice was the third president, serving from 1898 to 1932.

The building now owned by the college is the second to stand on that site. It was completed and dedicated in December, 1920.

Dr. Elderdice, who gradunted from Western Maryland in 1882 and Yale Divinity School in 1885, began his ministerial career in Maryland. Following retirement as head of the seminary, he was elected President Emeritus and Professor of Practical Theology, Elderdice Chair, which he held until his death in 1938.

The close connection of Dr. Elderdice to the building and to the college, made it appropriate to call the structure Elderdice Hall, Dr. Ensor said.

program look to improve the teaching situation, further the student's knowledge of other research and to have the student improve his own quality of operation.

Mrs. Veale Dies At Home

One of the most beloved figures ever to be on the Hill died this fall. It seemed most appropriate to reprint the article written by students and published in the student newspaper. The Gold Bug:

Mrs. Nina Venables Veale of Salisbury, Maryland housemother of Blanche Ward Hall for many years, passed away in her sleep on Friday, October 3, 1968. The news of her death was received with deep sorrow by the campus community where she dedicated the greatest part of her life.

The funeral was held this past Monday at the Hill and Johnson Funeral Home in Salisbury. Dean Helen G. Howery and Mrs. Virgie Jefferson were present, representing the college, and flowers were sent by many other friends.

Mrs. Venle, a member of the class of 1908, celebrated her fiftight class reunion last spring, as well as her second retirement as dormitory director. Her student years on the Hill were active ones, for she was not happy if she did not have "that little job" to be done or "that little joke" to repeat.

Miss Bertha Adkins was Dean of Women in 1941 when Mrs. Vcale returned to Westminster to become housemother of Blanche Ward. Sarah Belle, her daughter, was also a student here at the time. Mrs. Vcale's immediate success was evident from the many friends she made. Because she had been a student here, she was able to make "most reagonable" decisions.

She announced her retirement in June of 1955 to return to Salisbury, a place in which she, as a loyal native, took great pride.

However, when President Lowell Ensor called her a year and a half later asking her to resume her former duties for the remainder of that academic year, Mrs. Veale readily consented. In fact, she stayed on for one more year.

"Mother" Veale was just as young as the company she kept, hence she loved college girls. She was constantly surrounded by

young gentlemen callers who came just a bit early to laugh at her latest joke or to admire her freshly arranged colffare or new dress. Never too busy to smile or chat a while, Mrs. Veale enjoyed talking about any subject, trivial or tremendous but especially about books, bridge and boys.

During her rather infrequent spare moments, she indulged in scrabble games with Mrs. "J" or a few hearty chuckles with "Miss Howery".

Upon the second announcement of her retirement and the news of her fittels reunion, the dormitory council arranged a farewell party for her based around a "This Is Your Life" theme. A modest person by nature, she volunteered little personal information, but with the help of some of her class friends, her life story with its humorous anecdotes was pieced together.

The memories the college will cherish are pleasant ones filled with the service of one who devoted her life to Western Maryland... The Gold Bug. October 10, 1958

Faculty Members Publish Works

Two members of the faculty and staff have recently had works published.

Dr. Michael H. P. Finn, consulting psychologist for the school, has one work out now and two ready for publication in the coming year. These works include: Myokinetic Psychodiagnosis (M.K.P.) November, 1958, Logos Press, Drs. Leopold Bellak, Leonard Small and Michael Finn. The Psychologist Intern-The Springfield Sinai Conference - International Universities Press, Spring 1959, Dr. Michael H. P. Finn and Dr. Fred Brown. The Mira M.K.P. Test: Logos Press, Spring, Dr. Michael H. P. Finn.

In the October issue of The Classical World DT, William R, Rädington, department of classics, has written a resume of the Western Maryland College Latin Workshop, 1968. The article is a study of the aims and accomplishments of this first workshop on the campus.

Personals from Alumni

Two twins had a minor family reminon at the 50th reunion. Grace Young Parr of Chestertown and Gerife Young Roberts of Mount Airy were back and enjoyde seeing Miss Namis Lease, '55. SPRINGTIME

A time for dreaming, for memories, for REUNIONS. A good time to take a trip back to the Hill . . . renew old friendships and make new ones, see the improvements and changes, visit the new buildings. You can take a look at Baker Memorial Chapel, the men's dorm and the student union. Bring golf clubs and see seventh green again. We've new tennis courts, too, down near Hoffa Field.

Mark the date---May 30, 1959 ALUMNI REUNIONS ... 4 and 9 classes honored

There's plenty of activity scheduled for the whole weekend. Friday night the College Players will present the Commencement Play in Alumni Hall. All day Saturday, Alumni Day, there will be meetings and luncheons climaxed by the banquet that night. There is plenty of room for those who want to stay overnight, you can even take your meals in the college dining room. If you really want to make a weekend of it there is Baccalaureate and a choir concert on Sunday and on Monday morning. Commencement.

Remember - ALUMNI DAY, SATURDAY, MAY 30, 1959

Plan now to be here.

Reservation forms will be mailed in April.

WESTERN MARYLAND COLLEGE BULLETIN

Volume XL February, 1959 No. 2

Western Maryland College Bulletin, Westminster, Maryland, published eight times a year, once in the months of December, March, April, June, August and October, and twice in February, by the College.

Entered as second class matter, May 19, 1921, at the Postoffice at Westminster, Md., under the act of August 24, 1912. Accepted for mailing at special rate of postage provided for in section 1103, act of October 3, 1917.

Editor, Nancy Lee Winkelman '51

Admissions Work Changes

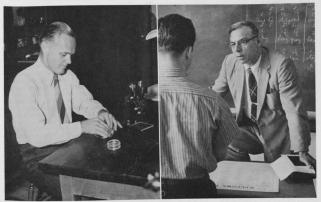

There was once a time when a prospective college student could make application on June 1 and be the first person to sign up for the coming term. Just ten years ago a student could still wait until after January to think about making applications. But, times have changed.

Colleges now receive applications from juniors! In fact, the whole trend is toward applying early in the fall of the year before entering a school. This tendency has been growing but in the past two years Western Maryland's Registrars have had dramatic proof of the change. On December 9, 1956 the Admissions committee had considered 60 applications since the opening of school. Last December 15 the number was 151. This year on December 15 the committee had considered 282 applications.

The number of total applications has increased also but here figures are less reliable because as soon as a class is filled the Registrars discourage further applications. Therefore, there could have been more than 955 applications last year. There were 804 considered in '57-58 and 710 in '56-'57.

A much more conclusive figure to show the recent trend is in the number of paid students. On June 10 for the year '54-55 there were 57 women who had paid the registration fee. Last year by December 15 there were 23 and the total enrollment for women was closed on April 1. This year on December 15, 30 women had paid and it is estimated that enrollment for women will be filled well before April 1.

The general rule is that three applications must be studied for each student who eventually shows up for Freshman Orientation Week. Up to December 15 in the (Continued on Page 10)

COMMITTEE MEMBERS-Dr. H. P. Sturdivant, on the left, and Dr. Joseph Hendren, right, are active members of the Admissions and Standards Committee in addition to their classroom and lab work.

Sigmas Keep Club Active

One of the more active alumni groups anywhere is the Sigma Sigma Tau Alumnae Club of Baltimore.

The group meets each month in the home of a member and has a speaker or demonstration. At Christmas time the senior members of the club on the Hill are entertained in Baltimore and in the spring there is a banquet in horor of graduating Sigmas.

An annual event is the presentation of the Ideal Sigma award. The members vote to select the outstanding senior in the club. This year Joanne Filbey, a Trumpeter from Baltimore, won the award.

Officers of the club are: President-Weslea Pearson Edwards, ex 55; Vice president-Lynnda Skinner, '56; Secretary-Corinne Schofield Les-Callette, '52; Treasurer-Christine Mienl Kaisler, '51; and Corresponding Secretary-Janet Cross Berenda, '54.

National Group Elects Hildebran

Dr. Kathryn B. Hildebran, professor of modern languages, has been elected to the Executive Committee of the National Federation of Modern Language Teachers Associations.

The election was held at the annual meeting of the Middle States Association of Modern Language Teachers held in Atlantic City in November. The term of office is for four years.

This fall Dr. Hildebran was \hat{u}_{p-1} pointed by the Maryland Superintendent of Schools, Dr. Thomas \hat{u}_{p-1} Pullen, Jr., to a special committeestudying language instruction in the state in connection with the National Education Act. She is also Maryland representative on the national committee of the American Association of Teachers of French.

Dr. Hildebran has been president of the Middle States Associa-

GEORGE A. MEYLS, JR.

Sorority Clubs Plan Dance

The Alumnae Sorority Clubs of Baltimore will hold their annual dance on Saturday, February 28 at the Edmondson Village Hall.

For a number of years the clubs, which all meet regularly, have joined together for this annual mid-winter dance. Each club sis responsible for one phase of the preparations.

This year the dance, which will be from 9 to 1:00, will cost \$3.00 per couple. Music will be by "The Men of Note". Those interested in reservations should call Weslea Edwards at R1 7-7856 or Lynnda Skinner at VA 3-3928. Any profit from the dance goes to the Annual Alumni Fund.

tion of the Modern Language Teachers Associations and has served five years as secretary and treasurer. She is vice president of the Maryland Chapter of the American Association of Teachers of French.

The modern language professor has been on the Western Maryland faculty since 1940. She is a graduate of Oberlin College and received her Master and PhD degrees from the University of Chicago.

Meyls Again Heads Drive

This year the Western Maryland Annual Alumni Fund will begin on March 23 and end on June 30. George A. Meyls, Jr. will again be chairman of the drive.

This is the second year the fund will operate under its new name— Alumni Fund instead of the former Living Endowment Fund. It is Mr. Meyls' third year as chairman of the drive. Prior to that he was his class chairman for several years. Under Mr. Meyls' chairmanship the fund has been tripled.

There will be a few changes in the drive this year all designed to make it more effective. Alumni are asked to give some attention to the information which will be coming to them in the near future. The annual report of the Fund drive will be published in the August Bulletin.

Miss Lease Dies At 84

Miss Nannie C. Lease, one of the college's older alumni and its oldest former faculty member, died at the Asbury Methodist Home in Gaithersburg on November 30, 1958. She was 84.

A number of her friends decided to contribute books to the Western Maryland library in lieu of flowers. A fund of \$65.00 which was collected for the purpose will be used to purchase books for the Dramatic Art Department. Miss Lease was a former professor of dramatics.

The daughter of the late William and Anna Lease, she was born in 1874 in Frederick. She was graduated from Western Maryland in 1895⁵ and then studied at Emerson College in Boston. After brief periods of teaching in North Carolina and Michigan, Miss Lease returned to Western Maryland in 1906. She taught elocution and dramatics, heading that department for many years. Miss Lease retired in 1940.

Rebert Book Published

Merle Charles Rebert, class of 1941, has recently had published a book of verse called Shadow Prints.

Published by Dorrance and Company of Philadelphia, Shadow Prints is a collection of Rebert's own poems, many of which have appeared in magazines and journals. The book is in three parts: the first-The Shape of the Leaf is a "look into the dark and bright experiences of man's daily living" according to the publisher's release. The middle section, Images, will be of most interest to Western Marylanders. It is a reflection of rural life along the Carroll County-York County border where the author lived as a boy. The Willing Heart, last section, is a collection of lyric love poems.

Rebert was known as a poet even in college. The Aloha lists him as an "anateur poet" and a lover of music and drama. In fact the editor called him "a walking book of Musical Knowledge". In his freshman year Rebert acquired the nickname "Fritz" which may be more familiar to his classmates.

After leaving Western Maryland the author taught English at the Margaret Brent School in MaryINVOCATION (from Shadow Prints by Merle Rebert, '41)

Spare me the field Where Fate spies on the grain, And Circumstance, his wife, feeds

The beasts upon its yield.

Set me hill-high, Where winds weave tapestries, Above the plains of frantic grass, Beneath the national sky.

Carve me a frosted peak Above the tilting hills, There grant me time to weld a world,

To hear the ages speak.

Hide me from thorns of talk Which dwindle mighty men To tumbleweeds of idle brash Along the public walk.

Give me no wail Like Saxons fed on chance, Or Persian cat couched in the cold Complaining to its tail.

Release me, set me free Among the cinder crags, To splash in fragments of the sky, In life's proud, compound sea.

land, worked as a copy writer with the Mid-South radio network, and served as a program director and announcer for two of its stations throughout Mississippi, Alabama and Arkannas. Later he worked as a fiscal analyst for the Labor Department in Harrisburg, Pennsylvania. For the past twelve years Rebert has been associated with the Atlantic Refining Company of Philadelphia as a research analyst and lives in soriginally from Hanover, Pennsylvania.

Rehert says he has already received letters about his book from former Western Marylanders. In addition he prizes this comment from Vladimir Sokoloff of the Curtis Institute of Music in Philadelphia—"Shadew Prints is a tender and beautiful book of poetry". The author is nov at work on a romantic, fictional novel concerned with a college professor's daughter. He hopes to finish the final rewrite by mid-summer.

New Students Get Information

Students who arrive on campus for Orientation Week in the fall already have a pretty good idea of what Western Maryland is like. A series of publications designed for them'is sent to students from the first moment they show an interest in the school.

When the Registrars receive a letter asking for information they send a three fold flyer that gives an abbreviated picture of the school. They accompany the flyer with an invitation to write for a catalogue and to come visit the school and talk with the Admiasions Counselor. When visiting the school, students receive a tour of the campus and the Viewbook.

The Viewbook is also used by the Admissions Counselor, H. Kenneth Shook, '52, when he talks to high school groups. At college night programs and in individual conferences in counselors' offices the books are used. This booklet contains informal and formal pictures of buildings, students and faculty. Earlier this year most of the high schools from which Western Maryland receives students were sent a copy of the Aloha, senior yearbook, to be placed in the school library. When spring comes the incoming class is sent a little folder designed for freshmen. It tells what to bring, what to expect the first day and how to get here.

Each of the publications is part of a coordinated plan to familiarize prospective students with the school. They are written and illustrated so that a high school student can obtain a fairly accurate idea of the type of school which is located here on the Hill.

Alumni who have children interested in coming to Western Maryland or know of students who are interested are invited to request any of these publications, except the Aloha.

Group Of Faculty Unknown To Many Alum

An important segment of the Western Maryland faculty which arrived on campus from about 1946 to 1956 may be largely unknown to whole groups of alumni.

Perhaps they weren't on the Hill along with you but their names are familiar through constant mention in Bulletin pages.

The members of this group are often still known as "new faculty" —on a Hill where tradition reigns supreme—but their interest in the school is considerable and has litthe relationship to the years spent here. Nineteen new professors have arrived in the ten year period mentioned. They represent almost all departments on the Hill.

Representative of activity of the group are eight — one from each segment of years. These eight serve on committees such as Athletic and Admissions and Standards, advise freshmen or seniors, work on curriculum changes or help with student government work. As the Western Maryland faculty has grown in the past years these professors have been encouraged to become a part not only of the campus community but also of the town.

Many of them are active in church work, a number serve as instructors in the various reserve units, some work directly with community fraternal and civic organizations. The greater proportion have developed roots in Carroll County and will in future years be the people who are featured in 20 and 25 year articles.

The eight representative faculty members from this group are: Dr. Reuben S. Holthaus (came in '46); Dr. Joseph W. Hendren ('47); Dr. Harwell P. Sturdivant ('48); Dr. Charles E. Crain ('49); Dr. Jean Kerschner ('52); Dr. Ralph B. Price ('54); Mr. Eugene M. Nuss ('55) and Dr. L. Earl Griswold ('56).

Dr. Holthaus, professor of philosophy, is a fraternity advisor and a member of the Athletic Council. He is a frequent chapel speaker and can often be found in the Grille chatting with students. He also is the advisor of the philosophy society.

Associate professor of English, Dr. Hendren is noted for his interest in ballads and has made poetry come alive for numerous students since his arrival here. Dr. Hendren is a member of the Admissions and Standards Committee.

Dr. Sturdivant, head of the biology department, is also chairman of the Admissions and Standards Committee. In addition he is advisor to the biological fraternity. Another member of the biology department, Dr. Kerschner, is a former member of the Administrative Advisory Council and is now a member of the Student Life Committee. She is also the advisor to the freshman class.

The Student Christian Association is advised by Dr. Crain, as-

DR. REUBEN HOLTHAUS

sociate professor of religion and Director of Religious Activities. Dr. Crain is also a frequent chapel speaker. Dr. Price is interested in the curriculum and is at present on the committee looking into suggested changes for Western Maryland. The professor of economics also was active in the first annual Leadership Conference.

ni

Mr. Nuss, assistant professor of education, is well known to all recent education students. He is one of the faculty members of the Judiciary Board and has been very active in its sessions. Dr. Griswold, assistant professor of sociology, takes part in the Methodist Student Movement. He is also advisor to the senior class.

These are just a cross section of the faculty members who have proved such an addition to the campus in the past years. Others who came during the ten year period include: Dean of Women Helen G. Howery; Librarian Elizabeth Simkins; Assistant Professor of Physics Mahlon F. Peck; Professor of Psychology Olive R. Russell; Associate Professor of Music Arleen Heggemeier; Dean of Men William M. David: Associate Professor of Music Gerald E. Cole; Associate Professor of English Richard B. Hovey; Associate Professor of Chemistry Karl L. Lockwood; Assistant Professor of Economics A. John Giunta; Assistant Professor of Physical Education Richard A. Clower.

DR. JEAN KERSCHNER

DR. RALPH PRICE

DR. CHARLES CRAIN

PROF. EUGENE NUSS

New Form In SGA

One of the most important recent additions to student government on campus has been the Judiciary Board,

While still young the Board has already proven it has great maturity of thought and action. The Board was formed as a step toward greater student responsibilty for self-governmet. It has three immediate purposes: 1. to deal with cases which the Men's or Women's Councils are not equipped to handle; 2. to decide on academic matters, particularly in reference to cheating; 3. to act on matters referred to the Board by the two councils.

The Board includes: two faculty members appointed by President Ensor, the deans of Men and Women and four students—two seniors and two juniors. One of the student members must be a member of the Student Government Cabinet. The others are selected by the Student Government Association.

Since its origination the council has handled a variety of cases. The faculty members have expressed

COYNER PROMOTED

M/Sgt. Crawford G. Coyner of the ROTC detachment has been promoted to the special grade of E-8. He is among the first to be promoted to this rating.

The new grade is designed to give greater responsibility to men of the M/Sgt rank. It is a recognition by the Army that some men who reach the former top enlisted grade can handle more responsibility. Sgt. Coyner was one of a few men selected from many who were recommended in the First Corps area.

In a special parade arranged by Cadet Commander James I. Lewis the battalion honored the instructor as he received his new grade from Lt. Col. Dayton E. Bennett, PMS&T.

Sgt. Coyner, in the Army for 17 years, has been Master Sergeant since 1949. He has been assistant since September 1956 and in 1957 began coaching the rifle team. The sergeant is considered an outstanding map reading and weapons instructor and under his direction the rifle team has made a winning record.

M/Sgt. Coyner served with the Sand Airborn Division in Europe during World War II and in Korea with the Second Infantry Division. He is married and has two childrem. Sgt. Coyner holds a Bachelor of Science in Military Science from the University of Maryland and has done graduate work in cartography at the University of Washington.

considerable satisfaction with the maturity of thought shown by the students who have, at times, recommended decisions that were more harsh than those considered by the professors.

Members of the Board this year include: Dean Helen G. Howery, Dean William M. David, Mr. Eugene M. Nuss, Dr. R. D. Summers, Beatrice Gill, Manfred Joeres, Beverly Bosworth and James Worden.

Basketball Team Still Rebuilding

Coach Dick Clower, '50, is still rebuilding the Green Terror basketball team.

The major problem this year is in depth with only 14 men out. Only one of these, Bill Bruce, is a letternan. Bill is also the one player with some real height at 6' 6". The Terrors are suffering from the loss of sure shooting Tony Sarbanes and of Bill Spaar who was 23rd in the nation in rebounding. Also gone is former Mason-Dixon all-star Sloan Stewart.

Returning from last year's squad are sophomores Bill Bruce and Bob Vaughn and junior John Long. From the junior varsity, Clower has Dave Sullivan, Ozzie Stewart, Bill Moore, John Holter and Mike Bird.

Newcomers this year are freshmen Jack Baile, Skip Brown, Barrry Jackson, Tom Watson and Dave Martin. Although faced with many problems the team still hopes to beat last year's record. Clower believes this team has greater speed and is working on better shootine.

COACH DICK PUGH

Baseball Team Plans Spring Vacation Tour

Western Maryland's baseball team is tentatively planning a spring vacation tour in the South according to coach Dick Pugh.

As the Bulletin is written Pugh doesn't have a complete or definite schedule but team members are hoping that come March 22 they'll be headed South. Pugh says any games set up will not be included in the regular playing schedule.

The h a seh all Terrors had weather problems last year which led to the suggestion for a tour this spring. Pugh says the team was able to get outside only two days prior to the first game lay two days prior to the first game lay two days are and as a result got "clobbered". Without seeing the players in action in practice it takes four or five games before a coach can find out about his personnel, he added. On the trip he hopes to defat these two problems.

In the South Pugh and the team hope for relatively good weather. They would like to get in a practice session in the morning and have a game in the afternoon. That way they could get in about 10 sessions and 8 or 9 practice games which would jell the team.

Pugh plans to take about 15 players on the trip. They will play college and service teams. Seven of those hoping to travel are returning lettermen from last year.

Schools tentatively scheduled for the baseball tour include:

Belmont Abbey College, Belmont, North Carolina

Western Carolina College, Cullowhee, North Carolina

Erskine College, Due West, South Carolina

Marietta Air Force Base, Marietta, Georgia

Oglethorpe University, Atlanta, Georgia

Charleston Air Force Base, Charleston, South Carolina

Admissions Work

(Continued from Page 3)

previous two years the Admissions Committee met only three or four times. This year they had had eight meetings by December 15.

The trend is the result of too many students for too few spaces in colleges. Each year the number of students trying to enter colleges and universities increases and schools have not grown fast enough to keep up with the surge. Students, afraid of not getting into any freshman class, often make as many as ten applications. This creates a considerable problem in high school guidance offices. It is also a handicap to college registrars trying to get an idea of the size of the incoming freshman class.

Registrars and Admissions Committees have no way of knowing if their school is the first or tenth choice of an applicant. Many attempts have been made to meet the problem. Western Maryland uses the continual acceptance plan. This, in addition to aiding the school, allows a frantic high school senior to know just where he stands. Early acceptance based on continuing good grades allows the student to enjoy his high school experience and get more from it without having to worry continually about his future in the fall.

What happens to an application after it is received from the student's high school?-any number of things. First Western Maryland acknowledges receipt of the record to the high school. The applicant is sent a card giving the date of the next Admissions Committee meeting so that the student can know when to expect some word. A folder on each applicant is made as well as certain other record cards. Folders containing all assembled data on the students are presented to Admissions Committee members. These members must read each folder before the general meeting. They make notations on a personal list, which does not continue in the folder, before sending the folder on to the next member. At the meeting each application is discussed and some ac-

ROMANTIC INTEREST-Robert Milli and Dolores Viola play Orsino and Olivia in the Players Inc. production of "Twelfth Night".

Twelfth Night Planned By CU Group

The third and final program in the annual concert series will be the Players Incorporated production of *Twelfth Night* on Friday, April 4 at 8:15 in Alumni Hall.

Currently ceiebrating its 10th anniversary season, the touring company of Players Incorporated has become the longest-running national classical repertory theatre in the United States. The

tion taken.

The student receives a letter telling of the committee action. Accepted students also receive a student is given a month to submit bis contract and registration fees, This continuing process of reviewing and accepting is designed to help both the student and the college. members of the company are graduates of the famous Speech and Drama Department of The Catholic University of America in Washington, D. C., noted for the many Broadway hits which have originated in the University Theatre. The C. U. Drama Department is under the direction of the Reverend Gilbert V. Hartke, O.P.

Although Western Maryland has consistently met C.U. teams in athletics this performance will mark the first time the dramatic group has appeared in Alumni Hall. The young company is on the road from early fall to early spring. It is made up of 15 actors and actors who also double in set and costume design. The Players have made six trips abroad under the auspices of the Department of Defense to entertain troops. The group gives approximately 150 performances during the travel season.

During summer months members of the group operate two summer theatres. One is located at Olney, Maryland and the second on the campus of St. Michael's College in Winooski Park, Vermont.

Heavy Schedule Set For Spring

As usual spring on the Western Maryland campus will be busy. There won't be anything like the dedication of Baker Memorial Chapel and the Whiteford Organ last May but there will be other acquisitions to admire and inspect in addition to the traditional activities.

Sometime this spring the student union building will be ready for inspection. Workmen have moved inside the building frustrating the crew of sidewalk superintendents who indulged their hobby of watching and commenting. The roof went on just in time to collect a good thick coating of ice which was eyed longingly by ice skating devotees. With that operation completed workmen happily went indoors to work. Students and faculty members are impatient to put into use the new facilities and comforts of the building.

Administrative personnel already have new quarters. Elderdice hall, minus a few walls here and with a few new ones there plus fresh paint and plaster, is now the hub of administrative activity. Changes will continue throughout the spring and summer probably, until the building is an integral part of the Hill.

Spring sports schedules will be in operation soon. All are listed on pages 8 and 9.

On March 13 Miss Esther Smith and the College Players will present the Junior Plays. These are generally three one-act plays presented by junior members of the Dramatic Arts classes. Another dramatic event will be the Players, Inc. presentation of Twelfth Night on April 4. The Shakespearean play will be the third on the annual concert and lecture series.

From dramatic presentations the school will turn to familiar traditional events. On April 13 members of the senior class will be formally invested with caps and gowns. From that day until graduation they will wear the outfits at each chapel service. Investiture is now held in Baker Memorial Chapel. The old tradition of having a surprise speaker from the faculty still stands. The loveliest of the spring events is of course May Day which this year comes on May 2. The Queen and members of her court are crowned at an afternoon ceremony followed in the evening by a formal ball.

MILITARY BALL

The annual Military Ball sponsored by the **ROTC** Department of the college will be held Friday, March 20 at 8:30 in Gill Gvm. As a climax of the dance a Military Queen will be crowned and her attendants presented. The ROTC unit extends a special invitation to graduates of the department to attend the affair. The dance is, of course, open to all alumni

Preceding the afternoon events is a parade of floats through the town streets.

The final events of the year will begin on May 29 with the Commencement Play. This is annually given on the Friday evening opening the last weekend of school. May 30 will be Alumni Day. Baccalaureate will be on May 31 and on June 1 graduation will be held. School will then slow down for a few days to catch its breath for the summer season.

The **BULLETIN**

WESTERN MARYLAND COLLEGE

APRIL, 1959

Once again Western Maryland has joined with colleges and universities across the country to present a problem facing all U.S. education. A cooperative group of editors pooled ideas and resources in order to make a more comprehensive study of The College Teacher-the problems and rewards. These articles are particularly timely for Western Maryland because the Annual Alumni Fund has been planned this year to encourage recognition of the need for action in the same area.

This special report is being printed during April in 249 Alumni magazines. Readers of The Bulletin are urged to consider the information in relation to the situation facing Western Maryland-especially those sections indicating what each alumnus can do to assure that the college will continue equipping young people with the tools of future leadership.

April, 1959 No. 3 WESTERN MARYLAND COLLEGE BULLETIN, Westminster, Maryland, published eight tir o ban. March, April, June, August and October, and twice in February, by the College. Entered as second class matter, May 19, 1921, at the Postoffice at Westminster, Md., under the act of August 24, 1912.

Volume XL

age provided for in section 1103, act of October 3, 1917. scepted for mailing at special rate of p Editor, Nancy Lee Winkelman '51

THE COLLEGE TEACHER: 1959

"If I were sitting here and the whole outside world were indifferent to what I was doing, I would still want to be doing just what I am."

I'VE ALWAYS FOUND IT SOMEWHAT HARD TO SAY JUST WHY I CHOSE TO BE A PROFESSOR.

There are many reasons, not all of them tangible things which can be pulled out and explained. I still hear people say, "Those who can, do; those who can't, teach." But there are many teachers who *can*. They are teachers because they have more than the usual desire to communicate. They are excited enough about something to want to tell others, have others love it as they love it, tell people the *how* of something, and the *why*.

I like to see students who will carry the intellectual spark into the world beyond my time. And I like to think that maybe I have something to do with this.

THERE IS A CERTAIN FREEDOM IN THIS JOB, TOO.

A professor doesn't punch a time clock. He is allowed the responsibility of planning his own time and activities. This freedom of movement provides something very valuable-time to think and consider.

I've always had the freedom to teach what I believe to be true. I have never been interfreed with in what I wanted to asa—either in the small college or in the large university. I know there have been and are infringements on academic freedom. But they've never happened to me.

THE COLLEGE TEACHER: 1959

I LIKE YOUNG PEOPLE. I REGARD MYSELF AS YOUNG.

I'm still cager about many of the things I was cager about as a young man. It is gratifying to see bright young men and women excited and enthusiastic about scholarship. There are times when I feel that I'm only an old worn boulder in the never-ending stream of students. There are times when I want to flee, when I look ahead to a quieter life of contemphation, of reading things I've always wanted to read. Then a brilliant and likeable human being comes along, whom I feel I can help—and this makes it all the more worthwhile. When I see a young teacher get a start, I get a vicarious feeling of beginning again.

THE COLLEGE TEACHER: 1959

PEOPLE ASK ME ABOUT THE "DRAWBACKS" IN TEACHING.

I find it difficult to be glib about this. There are major problems to be faced. There is this business of salaries, of status and dignity, of anti-intellectualism, of too much to do in too little time. But these are problems, not drawbacks. A teacher doesn't become a teacher in spite of them, but with an awareness that they exist and need to be solved.

AND THERE IS THIS MATTER OF "STATUS."

Terms like "egghead" tend to suggest that the intellectual is something like a tondstool—almost physically different from everyone else. America is obsessed with stereotypes. There is a whole spectrum of personalities in education, all individuals. The notion that the intellectual is somebody totally removed from what human beings are supposed to be is absurd.

TODAY MAN HAS LESS TIME ALONE THAN ANY MAN BEFORE HIM.

But we are here for only a limited time, and I would rather spend such time as I have thinking about the meaning of the universe and the purpose of man, than doing something else. I've spent hours in libraries and on park benches, escaping long enough to do a little thinking. I can be found occasionally sitting out there with sparrows perching on me, almost.

"We may always be running just to keep from falling behind. But the person who is a teacher because he wants to teach, because he is deeply interested in people and scholarship, will pursue it as long as he can." — LOREN C. EISELEY

> HE CIRCUMSTANCE is a strange one. In recent years Americans have spent more money on the trappings of higher education than ever before in history. More parents than ever have set their sights on a college education for their children. More buildings than ever have been put up to accommodate the crowds. But in the midst of this national preoccupation with higher education, the indispensable element in education-the teacher-somehow has been overlooked. The results are unfortunate-not only for college teachers, but for college teaching as well, and for all whose lives it touches. If allowed to persist, present conditions could lead to so serious a decline in the excellence of higher education that we would require generations to recover from it. Among educators, the problem is the subject of current concern and debate and experiment. What is missing, and urgently needed, is full public awareness of the problem-and full public support of measures to deal with it.

> HERE IS A TASK for the college alumnus and alumna. No one knows the value of higher education better than the educated. No one is better able to take action, and to persuade others to take action, to preserve and increase its value. Will they do it? The outlines of the problem, and some guideposts to action, appear in the pages that follow.

WILL WE RUN OUT OF COLLEGE TEACHERS?

No; there will always be someone to fill classroom vacancies. But quality is almost certain to drop unless something is done quickly

WHERE WILL THE TEACHERS COME FROM? The number of students enrolled in America's colleges and universities this year exceeds last year's figure by more than a quarter million. In ten years it should pass six million—nearly double today's enrollment.

The number of teachers also may have to double. Some educators say that within a decade 495,000 may be needed —more than twice the present number.

Can we hope to meet the demand? If so, what is likely to happen to the quality of teaching in the process?

"Great numbers of youngsters will flood into our colleges and universities whether we are prepared or not," a report of the Carnegie Foundation for the Advancement of Teaching has pointed out. "These youngsters will be taught—taught well or taught badly. And the demand for teachers will somehow be at least partly met—if not with well-prepared teachers then with ill-prepared, if not with superior teachers then with ill-prepared, if not with superior teachers then with ill-prepared.

Most immediate is the problem of finding enough qualified teachers to meet classes next fall. College administrators must scramble to do so.

"The staffing problems are the worst in my 30 years' experience at hiring teaching staff," said one college president, replying to a survey by the U.S. Office of Education's Division of Higher Education.

"The securing and retaining of well-trained, effective teachers is the outstanding problem confronting all colleges today," said another.

One logical place to start reckoning with the teacher shortage is on the present faculties of American colleges and universities. The shortage is hardly alleviated by the fact that substantial numbers of men and women find it necessary to leave college teaching each year, for largely financial reasons. So serious is this problem—and so relevant is it to the college alumnus and alumna—that a separate article in this report is devoted to it.

The scarcity of funds has led most colleges and universities to seek at least short-range solutions to the teacher shortage by other means.

Difficulty in finding young new teachers to fill faculty vacancies is turning the attention of more and more administrators to the other end of the academic line, where tried and able teachers are about to retire. A few innitiutions have modified the upper againints for faculty. Others are keeping selected faculty members on the payroll past the usual retirement age. A number of institutions are filling their own vacancies with the cream of the men and women retired elsewhere, and two organizations, the Association of American Colleges and the American Association of Luiversity Professors, with the aid of a grant from the Ford Foundation, have set up a "Retired Professors Registry" to facilitate the process.

Old restraints and handicaps for the woman teacher are disappearing in the colleges. Indeed, there are special opportunities for her, as she earns her standing alongside the man who teaches. But there is no room for complacency here. We can no longer take it for granted that the woman teacher will be any more available than the man, for she exercises the privilege of her sex to change her mind about teaching as about other matters. Says Dean Nancy Duke Lewis of Pembroke College: "The day has passed when we could assume that every woman who earned her Ph.D. would go into college teaching. She needs something positive today to attract her to the colleges because of the welcome that awaits her talents in business, industry, government, or the foundations. Her freedom to choose comes at a time when undergraduate women particularly need distinguished women scholars to

inspire them to do their best in the classroom and laboratory—and certainly to encourage them to elect college teaching as a career."

S^{OME HARD-PRESSED ADMINISTRATORS find themselves} forced to accelerate promotions and salary increases in order to attract and hold faculty members. Many are being forced to settle for less qualified teachers.

In an effort to attract and keep teachers, most colleges are providing such necessities as improved research facilties and secretarial help to relieve faculty members of paperwork and administrative burdens, thus giving faculty members more time to concentrate on teaching and research.

In the process of revising their curricula many colleges are eliminating courses that overlap one another or are considered frivolous. Some are increasing the size of lecture classes and eliminating classes they deem too small,

Finally, somewhat in desperation (but also with the firm conviction that the technological age must, after all, have something of value to offer even to the most basic and fundamental exercises of education), experiments are being conducted with teaching by films and television.

At Penn State, where televised instruction is in its ninth semester, TV has met with mixed reactions. Students consider it a good technique for teaching courses with large enrollments—and their performance in course enrploying television has been as good as that of students having personal contact with their teachers. The reaction of faculty members has been less favorable. But acceptance appears to be growing: the number of courses offered on television has grown steadily, and the number of faculty members teaching via TV has grown, also.

Elsewhere, teachers are far from unanimity on the subject of TV. "Must the TV technicians take over the colleges?" asked Professor Ernest Earnest of Temple University in an article title last fall. "Like the conventional lecture system, TV lends itself to the sausage extangence cept of education," Professor Earnest said. The classroom, he argued, "its the place for testing ideas and skills, for the interchange of ideas"—objectives difficult to attain when one's teacher is merely a shadow on a fluorescent screen.

The TV pioneers, however, believe the medium, used properly, holds great promise for the future.

POR THE LONG RUN, the traditional sources of supply for college teaching fall far short of meeting the demand. The Ph.D., for example, long regarded by many colleges and universities as the ideal "driver's license" for teachers, is awarded to fewer than 9,000 persons per year. Even if, as is probable, the number of students enrolled in Ph.D. programs riss over the next

few years, it will be a long time before they have traveled the full route to the degree.

Meanwhile, the demand for Ph.D.'s grows, as industry, consulting firms, and government compete for many of the men and women who do obtain the degree. Thus, at the very time that a great increase is occurring in the number of undergraduates who must be taught, the supply of new college teachers with the rank of Ph.D. is even shorter than usual.

"During each of the past four years," reported the National Education Association in 1958, "the average level of preparation of newly employed teachers has fallen. Four years ago no less than 31.4 per cent of the new teachers held the earned doctor's degree. Last year only 23.5 per cent were at this high level of preparation,"

H Ph.D., to which educators are directing their attention:

The Ph.D. program, as it now exists in most graduate schools, does not sufficiently emphasize the development of teaching skills. As a result, many Ph.D.'s go into teaching with little or no idea how to teach, and make a mess of it when they try. Many who don't go into teaching might have done so, had a greater emphasis been lidi upon it when they vrey graduate students. The Ph.D. program is indefinite in its time requirements: they vary from school to school, from department to department, from student to student, far more than seems warranted. "Generally the Ph.D. takes at least four years to get," asys a committee of the Association of Graduate Schools. "More often it takes is so seven, and not infrequently ten to fifteen.... If we put our heads to the matter, certainly we ought to be able to say to a good student: "With a leeway of not more than one year, i will take you so and so long to take the Ph.D.""

▶ "Uncertainty about the time required," says the Association's Committee on Policies in Graduate Education, "leads in turn to another kind of uncertainty financial uncertainty. Doubt and confusion on this score have a host of disastrous effects. Many superior men, facing unknowns here, abandon thoughts about working for a Ph.D. and realistically go of to law or the like,...,"

Artifotogin ROUGHLY HALF of the teachers in Amercia's colleges and universities hold the Ph.D., more than three quarters of the newcomers to college and university teaching, these days, don't have one. It have paras hadea, it appears invertible that the proportion of Ph.D./'s to non-Ph.D.'s on America's faculties will diminish.

Next in line, after the doctorate, is the master's degree.

For centuries the master's was "the" degree, until, with the growth of the Ph.D. in America, it began to be moved into a back seat. In Great Britain its prestige is still high.

But in America the M.A. has, in some graduate schools, deteriorated. Where the M.A.'s standards have been kept high, on the other hand, able students have been able to prepare themselves, not only adequately but well, for college teaching.

Today the M.A. is one source of hope in the teacher shortage. "If the M.A. were of universal dignity and good standing," says the report of the Committee on Policies in Graduate Education, "... this ancient degree could bring us succor in the decade ahead...

"The nub of the problem ... is to get rid of 'good' and 'bad' M.A.'s and to set up generally a 'rehabilitated' degree which will have such worth in its own right that a man entering graduate school will consider the possibility of working toward the M.A. as the first step to the P.D...."

One problem would remain. "If you have a master's degree you are still a mister and if you have a Ph.D., no matter where it is from, you are a doctor," Dean G. Bruce Dearing, of the University of Delaware, has said. "The town looks at you differently. Basiness looks at you differently. The dean may; it depends on how discriminating he is."

The problem won't be solved, W. R. Dennes, former dean of the graduate school of the University of California at Berkeley, has said, "until universities have the courage ... to select men very largely on the quality of work they have done and soft-pedal this matter of degrees."

A point for parents and prospective students to remember-and one of which alumni and alumname might remind them—is that counting the number of Ph.D.'s in a college catalogue is not the only. or even necessarily the best, way to judge the worth of an educational institution or its faculty's abilities. To base one's judgment solely on such a count is quite a temptation, as William James noted 56 years ago in "The Ph.D. Octopus": "The dazzled reader of the list, the parent or student, says to himself. This must be a terribly distinguished crowd—their titles shine like the stars in the firmametr, Ph.D's, Sc.D's, and Litt.D's bespangle the page as if they were sprinkled over if from a pepper caster."

The Ph.D. will remain higher education's most honored earned degree. It stands for a depth of scholarship and productive research to which the master has not yet addressed himself so intensively. But many educational leaders expect the doctoral programs to give more emphasis to teaching. At the same time the master's degree will be strengthened and given more prestige.

In the process the graduate schools will have taken a long step toward solving the shortage of qualified college teachers.

SOME OF THE CHANGES being made by colleges and universities to meet the teacher shortage constitute reasonable and overdue reforms. Other changes are admittedly desperate—and possibly dangerous—attempts to meet today's needs.

The central problem is to get more young people interested in college teaching. Here, college alumni and alumnae have an opportunity to provide a badly needed service to higher education and to superior young people themselves. The problem of teacher supply is not one with which the college administrator is able to cope alone.

President J. Seelye Bixler, of Colby College, recently said: "Let us cultivate a teacher-centered point of view." There is tragedy as well as truth in the old saying that in Europe when you meet a teacher you tip your hat, whereas over here you tup your head. Our debt to our teachers is very great, and fortunately we are beginning to realize that we must make some attempt to balance the account. Money and prestige are among the first requirements.

"Most important is independence. Too often we sit back with the comfortable feeling that our teachers have all the freedom they desire. We forget that the payoff comes in times of stress. Are we really willing to allow them independence of thought when a national emergency is in the offing? Are we ready to defend them against all pressure groups and to acknowledge their right to act as critics of our customs, our institutions, and even our national policy? Evidence abounds that for some of our more vociferous compatriots this is too much. They see no reason why such privileges should be offered or why a teacher should not express his patriotism in the same outworn and often irrelevant shibboleths they find so dear and so hard to give up. Surely our educational task has not been completed until we have persuaded them that a teacher should be a pioneer, a leader, and at times a nonconformist with a recognized right to dissent. As Howard Mumford Jones has observed, we can hardly allow ourselves to become a nation proud of machines that think and suspicious of any man who tries to.'

By lending their support to programs designed to improve the climate for teachers at their own colleges, alumni can do much to alter the conviction held by many that teaching is tolerable only to martyrs.

WHAT PRICE DEDICATION?

Most teachers teach because they love their jobs. But low pay is forcing many to leave the profession, just when we need them most

EVERY TURBOAY FURNING for the past three and a half months, the principal activity of a 34-year-old associate professor of chemistry at a first-rate midwestern college has centered around Section 3 of the previous Sunday's New York Times. The Times, which arrives at his office in Tuesday afternoon's mail delivery, customarily devotes page after page of Section 3 to large help-wanted ads, most of them directed at scientists and engineers. The associate professor, a Ph.D., is jobhunting.

"There's certainly no secret about it," he told a recent visitor. "At least two others in the department are looking, too, We'd all give a lot to be able to stay in teaching; that's what we're trained for, that's what we like. But we simply can't swing it financially."

"I'm up against it this spring." says the chairman of the physica department at an eastern college for women. "Within the past two wecks two of my people, one an associate and one an assistant professor, turnod in their resignations, effective in June. Both are leaving the field —one for a job in industry, the other for government work. I've got strings out, all over the country, but so far I've found no suitable replacements. We've always prided ourselyces on having Ph.D's in these jobs, but it looks as if that's one resolution we'll have to break in 1959-60."

"We're a long way from being able to compete with industry when young people put teaching and industry on the scales," says Vice Chancellor Vern O. Knudsen of UCLA. "Salary is the real rub, of course. Ph.D.'s in physics here in Los Angeles are getting \$8-12,000 in industry without any experience, while about all we can offer them is \$5,500. Things are not much better in the chemistry department."

One young Ph.D. candidate sums it up thus: "We want to teach and we want to do basic research, but industry offers us twice the salary we can get as teachers. We talk it over with our wives, but it's pretty hard to turn down \$10,000 to work for less than half that amount."

"That woman you saw leaving my office: she's one of our most brilling young teachers, and she was ready to leave us," said a women's college dean recently. "I persuaded her to postpone her decision for a couple of months, until the results of the alumnae fund drive are in. We're going to use that money entirely for raising salaries, this year. If it goes over the top, we'll be able to hold some of our best people. If it falls short... The mon the phone every morning, talking to the fund chairman, counting those dollars, and praying."

THE DIMENSIONS of the teacher-salary problem in the United States and Canada are enormous. It has reached a point of crisis in public institutions and will as in poorer ones. It exists even in Catholic colleges and universities, where, as student populations grow, more and more laymen must be found in order to supplement the limited number of derics available for teachine nosts.

"In a generation," says Seymour E. Harris, the distinguished Harvard economist, "the college professor has lost 50 per cent in economic status as compared to the average American. His real income has declined substantially, while that of the average American has risen by 70-80 per cent."

Figures assembled by the American Association of University Professors show how seriously the college teacher's economic standing has deteriorated. Since 1939, according to the AAUP's latest study (published in 1988), the purchasing power of lawyers rose 34 per cent, that of dentists 54 per cent, and that of doctors 98 per cent. But at the five state universities surveyed by the AAUP, the purchasing power of teachers in all ranks rose only 9 per cent. And at twenty-cipit privately controlled institutions, the purchasing power of teachers' salaries *dorped* by 8.5 per cent. While nearly everybody else in the country was gaining ground spectacularly, teachers were losing it.

The AAUP's sample, it should be noted, is not representative of all colleges and universities in the United States and Canada. The institutions it contains are, as the AAUP says, "among the better colleges and universities in the country in salary matters." For America as a whole, the situation is even worse.

The National Education Association, which studied the salaries paid in the 1937–58 academic year by more than three quarters of the nation's degree-granting institutions and by nearly two thirds of the junior colleges, found that half of all college and university teachers carned less than 56,015 per year. College instructors carned a median salary of my 24,562–not much better than the median salary of teachers in public elementary schools, whose conomic plipt is well known.

The implications of such statistics are plain.

"Higher salaries," says Robert Lekschman, professor of economics at Barnard College, "would make teaching a reasonable alternative for the bright young lawyer, the bright young doctor. Any ill-paid occupation becomes something of a refuge for the ill-trained, the layz, and the incompetent. If the scale of salaries isn't improved, the quality of teaching won't improve; it will worsen. Unless Americans are willing to pay more for higher education, they will have to be satisfied with an inferior product."

Says President Margaret Clapp of Wellesley College, which is devoting all of its fund raising efforts to accumulating enough money (\$15 million) to strengthen faculty salaries: "Since the war, in an effort to keep alive the profession, discussion in America of teachers' salaries has necessarily centered on the minimums paid. But insofar as money is a factor in decision, wherever minimums only are stressed, the appeal is to the underprivileged and the timid; able and ambitious youths are not likely to lister."

PEOPLE IN SHORT SUPPLY:

THAT IS THE ANSWER?

It appears certain that if college teaching is to attract and hold top-grade men and women, a drastic step must be taken: salaries must be doubled within five to ten years.

There is nothing extravagant about such a proposal; indeed, it may dangerously understate the need. The current situation is so serious that even doubling his salary would not enable the college teacher to regain his former status in the American economy.

Professor Harris of Harvard figures it this way:

For every \$100 he earned in 1930, the college faculty member earned only \$85, in terms of 1930 dollars, in 1957. By contrast, the average American got \$175 in 1957 for every \$100 he earned in 1930. Even if the professor's salary is doubled in the years, he will get only a

TEACHERS IN THE MARKETPLACE

\$70 increase in buying power over 1930. By contrast, the average American is expected to have \$127 more buying power at the end of the same period.

In this respect, Professor Harris notes, doubling faculty salaries is a modest program. "But in another sense," he says, "the proposed rise seems large indeed. None of the authorities ..., has told us where the money is coming from." It seems quite clear that a fundamental change in public attitudes toward faculty salaries will be necessary before significant progress can be made.

FINDING THE MONEY is a problem with which each college must wrestle today without cease. For some, it is a matter of convincing taxpayers and state legislators that appropriating money for faculty salaries is even more important than appropriating money for campus buildings. (Curiously, buildings are usually easier to "sell" than pay raises, despite the seemingly obvious fact that no one was ever educated by a pile of bricks.)

For others, it has been a matter of fund-raising campaings ("We are writing salary increases into our 1959-60 budget, even though we don't have any idea where the money is coming from," says the president of a privately supported college in the Mid-Attanic region; joi finding additional salary money in budgets that are already spread thin ("We're cutting back our library's book budget again, to gain some funds in the salary accounts"); of tuition increases ("This is about the only private enterprise in the country which gladly subsidizes its customers; maybe we're crazy"); of promoting research contrasts what would we do without the AEC?"); and of bargaining.

"The tendency to bargain, on the part of both the colleges and the teachers, is a deplorable development," says the dean of a university in the South. But it is a growing practice. As a result, inequities have developed: the teacher in a field in which people are in short supply or in industrial demand—or the teacher who is adept at "campus politics"—is likely to fare better than his colleagues who are less favorably situated.

"Before you check with the administration on the actual appointment of a specific individual," says a faculty man quoted in the recent and revealing book, *The Academic Marketplace*, "you can be honest and say to the man, "Woold you be interested in coming at this amount? and he says, "No, but I would be interested this amount." One result of such bargaining has been that newly hired faculty members often make more money than was paid to the people they replace—a happy circumstance for the newcomers, but not likely to raise the morale of others on the faculty.

"We have been compelled to set the beginning salary of such personnel as physics professors at least \$1,500 higher than salaries in such fields as history, art, physical education, and English," wrote the dean of faculty in a state college in the Rocky Mountain area, in response to a recent government questionnaire dealing with salary practices. "This began about 1954 and has worked until the present year, when the differential perhaps may be increased even more."

Bargaining is not new in Academe (Thorstein Veblen referred to it in *The Higher Learning*, which he wrote in 1918), but never has it been as widespread or as much a matter of desperation as today. In colleges and universities, whose members like to think of themselves as equally dedicated to all fields of human knowledge, it may prove to be a weakening factor of serious proportions.

Many colleges and universities have managed to make modest across-the-board increases, designed to restore part of the faculty's lost purchasing power. In the 1957.-58 academic year, 1,197 institutions, 84.5 per cent of those answering a U.S. Office of Education survey question on the point, gave salary increases of at least 5 per cent to their faculties as a whole. More than half of them [248 public institutions and 329 privately supported institutions) said their action was due wholly or in part to the teacher shortage.

Others have found fringe benefits to be a partial answer. Providing low-cost flowing is a particularly successful way of attracting and holding faculty members; and since housing is a major item in a family budget, it is as good as or better than a salary increase. Oglethorpe University in Georgia, for example, a 200-student, private, liberal arts institution, long ago built houses on eampus land (in one of the most desirable residential areas on pus land (in one of the most desirable residential areas the outskirts of Allanta), which it rents to faculty members at about one-third the area's going rate. (The cost of a three-bedroom faculty house: \$50 per month.) "It's our major selling point," says Oglethorpe's president, Donald Agnew, "and we use it for all it's worth."

Dartmouth, in addition to attacking the salary problem itself, has worked out a program of fringe benefits that includes full payment of retirement premiums (16 per cent of each faculty member's annual salary), group insurance coverage, paying the tuition of faculty children at any college in the country, liberal mortgage loans, and contributing to the improvement of local schools which faculty members' children attend.

Taking care of trouble spots while attempting to whittle down the salary problem as a whole, searching for new funds while reapportioning existing ones, the colleges and universities are dealing with their salary crises as best they can, and sometimes ingeniously. But still the gap between salary increases and the rising figures on the Bureau of Labor Statistics' consumer price index persists.

TOW CAN THE GAP BE CLOSED?

First, stringent economies must be applied by educational institutions themselves. Any waste that occurrs, as well as most luxuries, is probably being subsidized by low salaries. Some "waste" may be hidden in educational theories so old that they are accepted without question; if so, the theories must be re-examined and, if found invalid, replaced with new ones. The idea of the small class, for example, has long been honored by administrators and faculty members alike; there is now reason to suspect that large classes can be equally effective in many courses—a suspicion which, if found correct, should be translated into action by those institutions which are able to do so. Tuition may have to be increased—a prospect at which many public-college, as well as many private-college, educators shudder, but which appears justified and fair if the increases can be tied to a system of loans, scholarships, and tuition rebates based on a student's or his family's ability to pay.

Second, massive aid must come from the public, both in the form of taxes for increased salaries in state and municipal institutions and in the form of direct gifts to both public and private institutions. Anyone who gives money to a college or university for unrestricted use or earmarked for faculty salaries can be sure that he is making one of the best possible investments in the free world's future. If he is himself a college alumnus, he may consider it a repayment of a debt he incurred when his college or university subsidized a large part of his own education (virtually nowhere does, or did, a student's tuition cover costs). If he is a corporation executive or director, he may consider it a legitimate cost of doing business; the supply of well-educated men and women (the alternative to which is half-educated men and women) is dependent upon it. If he is a parent, he may consider it a premium on a policy to insure high-quality education for his children-quality which, without such aid, he can be certain will deteriorate.

Plain talk between educators and the public is a third necessity. The president of Barnard College, Millicent C. McIntosh, says: "The 'plight' is not of the faculty, but of the public. The faculty will take care of themselves in the future either by leaving the teaching profession or by never entering it. Those who care for education, those who run institutions of learning, and those who have children-all these will be left holding the bag." It is hard to believe that if Americans-and particularly college alumni and alumnae-had been aware of the problem, they would have let faculty salaries fall into a sad state. Americans know the value of excellence in higher education too well to have blithely let its basic element-excellent teaching-slip into its present peril. First we must rescue it; then we must make certain that it does not fall into disrepair again.

Some Questions for Alumni and Alumnae

Is your Alma Mater having difficulty finding qualified new teachers to fill vacancies and expand its faculty to meet climbing enrollments?

Has the economic status of faculty members of your college kept up with inflationary trends?

► Are the physical facilities of your college, including laboratories and libraries, good enough to attract and hold qualified teachers?

Is your community one which respects the college teacher? Is the social and educational environment of your college's "home town" one in which a teacher would like to raise his family?

Are the restrictions on time and freedom of teachers at your college such as to discourage adventurous research, careful preparation of instruction, and the expression of honest conviction?

To meet the teacher shortage, is your college forced to resort to hiring practices that are unfair to segments of the faculty it already has?

► Are courses of proved merit being curtailed? Are classes becoming larger than subject matter or safeguards of teacher-student relationships would warrant?

Are you, as an alumnus, and your college as an institution, doing everything possible to encourage talented young people to pursue careers in college teaching?

If you are dissatisfied with the answers to these questions, your college may need help. Contact alumni officials at your college to learn if your concern is justified. If it is, register your interest in helping the college authorities find solutions through appropriate programs of organized alumni cooperation.

A Letter From The 1959 Fund Chairman

Fellow Alumni:

Spring is just around the corner and if you look closely you will see cardinals and bluejays together with robins and other birds filting from pillar to tree. The spring flowers are poking their heads through the ground, after having lain dormant throughout the winter, and these facts emphasize my opening sentence, that spring is just around the corner, if an emphasis is needed.

With the advent of spring it means our annual roll call of Alumni and Triends to the Alumni Fund. We fell short of our goal last year and I would like to attribute it to the fact that a recession was on and the dollars were just not available for this purpose. Every barometer points to business picking up in all lines and I do hope each and every one of you will feel the impetus of this business recovery, to the extent that the old exchequer will be bulging with sufficient dollars, that you can make this a banner year and we can go over the top.

We have made great strides in our physical plant at Western Maryland and in a very short time Old Main and the remaining parts of Ward Hall will be leveled off and graded and they will only be a memory. More than a physical plant is essential for a strong, independent, Liberal Arts College. We must have a strong faculty and to maintain a faculty comparable to our physical plant we must necessarily pay the salaries to keep our fine faculty and add to it, as it becomes necessary. Our high standards must be maintained, but the cost is great, and for Western Maryland College to maintain its forward position in this fast moving world, we need your financial help.

Should I appeal to your sentimental side and ask you to close your eyes and think of those wonderful years spent on the Hill? And, would you not like others to have the opportunity of this wonderful experience? Or should I appeal to your practical side, and point out the great need and the necessity of maintaining small, indecendent Liberal Arts Colleges as a balance, in this highly mechanized, scientific world?

The answer to either appeal is the same. We truly need your financial help and we deeply trust you will help us.

Most sincerely,

George a. meyle. J.

WESTERN MARYLAND COLLEGE

June 1959

The BULLETIN

Many on the Hill for Alumni Day had their last look at Old Main, the original college building. This summer, after many delays, the familiar structure is finally to come down.

In this instance natural sentiment balks slightly at progress but there has been a general adjustment to the idea of a new landmark on top of the Hill. Present students, who only know the building for its inconveniences, are delighted that they will soon be using the brand new Winslow Student Center. And, the home economics and art departments are also getting ready to accuston themselves to new surroundings.

A recent check into old Bulletins and brochures reveals that the delay in razing Old Main actually dates back to the 1920's. Periodically there have been attempts to completely renovate the building and keep it standing but none of these were ever found feasible. So, progress has finally caucht up with Old Main.

Alumni Association Honors Frank B. Hurt; Over Four Hundred Attend Annual Banquet

Over 400 alumni attended the Alumni Banquet on Saturday, May 30. Largest groups were from 1929 and 1949. The Class of 1909, with over 30 back, were special guests of the college.

Highlight of the annual banquet was the presentation of a special alumni award to Professor Frank B. Hurt, a member of the faculty since 1930. Several members of past tennis teams attended the dinner.

Written by a former member of the Western Maryland team the following citation was read by Alumni President F. Kale Mathias:

Rarely in the course of normal daily living does one have the privilege to be associated with an individual who has dedicated the substantial part of his life to his fellow man.

For the past score years and four, however, you, Professor Frank B. Hurt have exemplified the highest qualities of personal dedication,

As a Professor and Tennis Coach you have won the respect and esteem of your students and col-

RECEIVES AWARD-Professor Frank B. Hurt received a special award from the Alumni Association at the annual banquet.

leagues. Since the Spring of 1935, when you assumed the coaching position, our tennis team has compiled an enviable record of 229 wins, 121 loses and 2 ties. This was accomplished because of your steadfast devotion and guidance to the members of these teams. The various ideas which you imparted have been just as valuable in our daily lives as they were on a tennis court. The members of the Alumni Association of Western Maryland College are fully aware of the outstanding contribution which you personally have made to this, your college and ours. We desire that our appreciation and veneration be known to all who are associated with Western Maryland College and to all others who have the honor and privilege of knowing Frank B. Hurt.

College Awards **128 Diplomas**

SCOTT W. LUCAS

The college awarded 128 Bachelor degrees, 24 Master of Education degrees and six honorary degrees at Commencement exercises on Monday, June 1.

Commencement speaker was Scott W. Lucas, former Senate majority leader from Illinois who received an honorary Doctor of Laws degree. Dr. Ensor conferred highest honors on 13 of the graduates. Nine were graduated cum laude.

The speaker, Mr. Lucas, was born in Illinois and graduated from Illinois Wesleyan University in 1914 with an LL.B. degree. Following World War I he was active in the American Legion and held public office in his state. The former senator was elected to the House of Representatives in 1935. He served in the Senate from January 3, 1939 to January 3, 1951 where he was a member of several important committees. From January, 1949 to January, 1951 Senator Lucas served as majority leader of the Senate and chairman of the Democratic Policy Committee of the Senate and of the Democratic Steering Committee. Since 1951 he has been engaged in general practice of law.

Honorary Doctor of Divinity de-

CITIZENSHIP CITATIONS GIVEN TO JOERES, SCHAEFER AT GRADUATION

Patricia Schaefer of Catonsville and Manfred Joeres of Baltimore received the Alumni Citizenship Award this year at commencement exercises.

The award goes to two students who have shown themselves of service to the campus during their senior year. The citation says that the persons selected should be universally respected. It continues, "Recipients of these awards should be students who have given dignity and stability to the role of the undergraduate. Reliability, responsibility, and unobtrusive genuiness are qualities these students should possess."

Miss Schaefer is an honor student who this year served as editor of the Aloha. She is a member of the Argonauts, the Student Christian Association and Future Teachers of America. A Sigma, Patty was news-feature editor of the Gold Bug and was elected Homecoming Queen. She was also chosen for Who's Who. Miss Schaefer plans to teach English.

Manfred Joeres this year was Battalion executive officer for the cadets of ROTC. He was a cadet major. Manfred was a member of the Student Government, vice president of Delta Pi Alpha and president of Tri Beta. He served

grees were awarded to Rev. Clarence L. Fossett and Rev. Frank N. Van Brunt. Rev. Fossett, superintendent of the Baltimore East District of the Methodist Church, is originally from Birmingham, Alabama. He is a graduate of Birmingham-Southern College and has the Bachelor of Divinity Degree from Garrett Biblical Institute. Rev. Fossett has served pastorates in Illinois, Alabama and Maryland.

Rev. Van Brunt is originally from Adelphia, New Jersey. He attended Teachers' College, Temple University where he received a BS in Education. He attended Drew Theological Seminary and received a Bachelor of Sacred Theology de-(Continued on page 8)

as first chairman of the Judicial Board. A biology major who plans to be a doctor, Manfred was also chosen for Who's Who.

PATRICIA SCHAEFER

The awards, two silver trays, were presented by President Ensor at the graduation ceremonies. Part of the inscription reads "They should have maturity of judgment to determine what is best for Western Maryland . . ."

MANFRED JOERES

GRADUATION:

as seen by three generations...

Senior Class Advisor

One of the things that impresses me at graduation time is the brevity of a college generation. Four years have passed all to quickly since the class of 1950 eame to the campus as freshmen. Now, just as we are getting well acquainted, you are leaving the Hill as graduates.

I hope that college life for you will have been made up of four years with the real stuff of living in them. For the future, I wish you happiness and success in your very endeavor. We will miss you on the Hill, for many lasting contributions to campus life have been made by members of the Class of '59.

Some of you have heard me make the statement, "I never learned to fly until I got my wings." This is not a complaint against the quality of instruction in military flying schools. It simply refers to the fact that, having learned the proper fundamentals I was later able to apply them successfully in the great variety of situations in which I found myself. I trust that your college education will serve you in much the same way.

I have enjoyed my relationship with the class of 1959 and count it a privilege to have been your advisor during your last year on The Hill.

L. EARL GRISWOLD

ALLEN GILMORE

Student Government President

A senior's impression of approaching graduation seems to parallel the old Army adage, "Hurry up and wait!"

As the big day draws near, the academic and social merry-goround whirls faster and faster. Seniors hope and pray that the speed continues. "Come on June 1st" is their motto.

But, then there are the quiet, more serious moments when every prospective graduate realizes that graduation will mean so much more than walking across the stage to receive a diploma and shake Dr. Ensor's hand. That handshake means the end of the sheltering atmosphere of the Hill. It means the beginning of existence in the "cold, cruel world" of business or the Army. It may mean the sobering prospect of graduate school. In these quiet moments every senior begins to think about the good times and congeniality of WMC life, and perhaps hopes that the time until graduation will slow down a little.

However, even in these moments of doubt I think that each senior realizes that he has been well prepared for whatever the future may bring. These mixed feelings of expectation and doubt are tempered by the self-confidence that four years at Western Maryland will develop.

And so, "Come on June 1st" continues to be the idea uppermost in a senior's mind.

VIRGIE W. JEFFERSON 50th Reunion Class

Hoorah, hoorah, hoorah, hoo Vela, Vela, Vela, voo "Honor nobis scopus est" Nineteen nine upholds the best Hullabaloo, kunnuck, kunnine Seniors, seniors, 1909

This yell was a familiar sound on College Hill in 1909 when commencement time was nearing for 43 members of the graduating class were busy making plans to leave WMC.

We had gathered here four years before from Maryland, Delaware, Virginia, West Virginia, New Jersey, New York and North Carolina and in spite of many rules and restrictions had spent happy years on the Hill. We were carefully sheltered and chaperoned, even walking to church under the eye of an austere faculty member. But, we had our "strikes," KOB's passed frequently from one side of campus to other, and then of course came narlor night. We were allowed to spend a whole hour talking to the boys but not to the one boy we liked best since Doctors B or D were busy carrying out orders to upset the fruit basket-or in other words break up serious cases.

Fifty years ago Old Main with all its wings was the one main building on the Hill housing both boys and girls, classrooms, gym, library, dining hall and kitchen as well as some faculty members. Part of Lewis Hall was being used for the science departments. Baker Chapel was new, Alumni Hall was there, a very imposing structure. The President's and Dr. McDaniel's homes were in use as well as several faculty homes long since torn down to make room for Blanche Ward. The library had just been finished. It opened in 1908. Where McDaniel Hall stands there was a beautiful green with rows of lovely trees. The arch stood across the drive just below McDaniel.

Baker Chapel held the whole student body and we went each Sunday evening by classes to listen to long scholarly sermons by the austere president, Dr. Lewis. As now, there was a fine choir from our student body.

Ours was the first class to be given what was then called a "Teachers' Certificate." We had only one year of education which entitled us to teach but at that time all schools wanted experienced teachers more than they wanted an inexperienced college graduate.

We, too, marched to commencement exercise to the strains of "A Mighty Fortress." No doubt we felt sure, as students do now, that we were going out to improve the world in a very short time.

It is difficult to recall too many details of 50 years ago but no one can ever forget the happy days and hours spent with classmates on College Hill. And, while many of us, 1'm sure, have forgotten the facts we learned, not one has forgotten such teachers as Dr. Tiffany, Dr. Warfield, Dr. Field, Miss Wheeler, Miss Lease, Dr. Reese, Dr. McDaniel and others who gave their all to help make our cducation here worth while.

Now we have, those of us who are left, met again. Some we had not seen for half a century. We've gone our different ways for many years hut one thing we have in common — our years together on College Hill and we enjoyed recalling those times and events.

Jesse Eli Pritchard of Ashchard wrote in our class poem:

But for our alma mater dear We shall over do our bust And for our friends who've taught us well A word of prise in our bequest And to our class let us be true Whatever life shall have in store And let us still be one in thought Though as a class we meet no more.

Dr. Evelyn Wenner Comments On Her Work

by Dr. Evelyn W. Wenner

(The following material is taken from a recent report on her activities in England by Dr. Wenner)

Since the first of January I have made considerable advance along the several avenues of my search for materials essential to a biography of George Steevens, Shakespearean scholar. I have spent much time in the British Museum, I have also continued my excursions into the counties where it seemed probable that there would be records of Steevens and his family. This field work - which I think might very well be called "spade work"-is made necessary by the fact that I am doing pioneer research on Steevens. No biographer (except the few persons who have done short, cursory sketches of the man) precedes me. . . .

Although most departments of the Museum have holdings important for my project, it is to the Students' Room of the Department of Manuscripts that I now go daily. sometimes breaking off there for further study of some book on reserve for me in the North Library, but always returning to my perusual of the big catalogues of manuscripts and to my rapidly growing pile of notes on the unpublished works of George Steevens, (Some of the catalogues have indexes. Many, however, require a page by page search.) . . .

Once in a while in my search for writings by or pertaining to Steevens I come upon a document which suddenly transforms my activity into an adventure which I may report but may in no respect modify or control. Such was my position a few weeks ago when I saw this entry in one of the catalogues of the Additional Manuscripts in the Museum: "Findings of a Court Martial in the Essex Militia 10 June 1761." This, I said. for good or ill could be George Steevens. Hesitantly, almost unwillingly, I put in my request for the manuscript. I read the first page and had an unmistakable feeling of relief. (A researcher must be objective and dispassionatel) Steevens was there all right. There were the names: Lieut. Cranmer, President; Ensign Steevens, Ensign Roberts. These three men, however, were the members of the court, the judges....

I have seen letters which indicate that even during the time of his military service Steevens was trying out, and estimating, his several abilities. It was in this period that he gave up his hope of becoming England's great realistic painter and decided that he would

STEEVENS MONUMENT - This monument to George Steevens is in an Essex Church visited by Dr. Wenner.

introduce himself to the world as an "deditor in form." Certainly he began here the program of concentrated study which a few years later earned for him the title of the "prince of scholars."...

The report so far makes no mention of the use that I have made of letters and telephone calls. The field of my correspondence would perhaps best indicate the wide range of the search that I have made, but an enumeration would be tedious here. A letter to a Glasgow bookseller inquiring about an item in his printed catalogue brought a favorably reply and, in time, gave me a long-forgotten, or perhaps never-admitted, work of the scholar George Steevens. The dealer said that he still had the book but had lent it to a museum. If I wished to purchase it, he would have it in hand within a few days. I did wish to purchase it, for it was the book of prints which Steevens, privately repudiating the unrealistic pictures in the Boydell edition, had said would provide appropriate illustrations for his own Shakespeare of 1793....

Even before I read the first page of the addition (ed. note-the book proved to have a second section), I had the sense of excitement which even the most prosiac researcher may have when "a new planet swims into his ken." It was, first of all the title of the new content that quickened my heart beat: Shakespeare Illustrated by an Assemblage of Portraits and Views: with Biographical Anecdotes. I had seen such a title as this years before when I discovered that Steevens had written "biographical anecdotes" for Hogarth's prints. and this part of the title to his Hogarth studies had become in my mind a hallmark, almost a pseudonym of George Steevens, Here again on a title page of the book that came to me from Glasgow were these significant words. Here again too were descriptions, or "anecdotes," which would make a collection of prints "more complete and interesting to the reader." The descriptions, though unsigned, bear the clear imprint of Steevens' scholarship and taste Several make particular reference to his Shakespeare of 1793, calling it the "principal edition" of the century. All further the end proposed in the preface, that of blending information with amusement. I have shown this book to a number of persons who are knowledgeable in the Eighteenth Century. All agree that Steevens' hand is apparent in the book. The edition to which my copy belongs escaped the Stationers' Register. George Steevens whose name to this day excites a show of wrath at Stationers' Hall because "he put his initials G.S." against some of the entries therewould know how to make the evasion. . . .

I have as yet worked out no com-(Continued on page 8)

ELDERDICE HALL Now in use

Elderdice Hall is now in full use as an administration building for the college,

Although from the outside it looks little changed—except for a sign that says Western Maryland College instead of Wesley Seminary—the building has been considerably transformed inside. The registrars, shown at the bottom of the page, are, for example, enjoying a brighter, more roomy area in which to work. Although somewhat different, the old counter, over which so many registration alips and cards have passed, is still in use.

Up on the second floor of the building along with a number of offices is the mail room, a part of the Alumni and Public Relations offices. Here is located equipment needed to process the Bulletins and other general mailings as well as all outgoing mail. This too, is a great improvement over the former location.

HONORARY DEGREES AWARDED-Left to right: top-Bishop G. Bromley Oxnam, Joseph S. Whiteford; bottom-Clarence L. Fossett, Frank N. Van Brunt; not pictured-Charles W. Wainwright.

Degrees Awarded

(Continued from page 3)

gree from Temple University. Rev. Van Brunt transferred to the Baltimore Annual Conference and was appointed associate minister of Foundry Church in Washington in 1950. He was appointed to St. Mark's Methodist Church in 1955.

Dr. Charles W. Wainwright of Baltimore, a graduate of the class of 1914, received the honorary Doctor of Science degree, Dr. Wainwright graduated from the Johns Hopkins School of Medicine in 1922 and is an associate professor of medicine and physician in charge of the arthritis clinic there. Dr. Wainwright is known as one of the foremost authorities in the field of arthritis. In fact he recently examined Secretary of State Christian Herter to make sure he was physically capable, despite crippling arthritis, to take over the position. Dr. Wainwright is a member of the Association of American Physicians and of the Clinical and Climatological Association.

Joseph S. Whiteford, of the class of 1943, received the honorary Doctor of Music degree, Mr. Whiteford is an international authority on musical acoustics. He recently invented an electronic reverberation device enabling acoustics of any room to be changed to suit musical or architectural needs. In 1956 at the age of 34 he became president and tonal director of the Aeolian-Skinner Organ Company of Boston, youngest president of any major organ company in the world. Many of the finest organs in the country have been installed under Mr. Whiteford's supervision.

Bishop G. Bromley Oxnam, Bishop of the Washington area, received the Doctor of Humane Letters degree. Bishop Oxnam is a familiar figure on the Hill not only for his association with the Baltimore Conference sessions but also because he was speaker at the dedication of Baker Memorial Chapel.

FORMER DEAN DIES

Dr. Forrest L. Free, former dean of men at Western Maryland, died during May at his home in West Chester, Pennsylvania. He had been ill for three weeks.

Dean Free taught mathematics and astronomy at the college from 1937 to 1952 when he left to accept a position at West Chester State Teachers College. He is survived by his wife and two daughters.

Wenner Comments

(Continued from page 6) plete peligree of George Steevens. There are gaps in the family history which I seek constantly to close. Subject of some of these gaps to be filled in some day is Steevens' grandfather, Captain John Steevens, whom I identify only by a plaque on the wall of an Essex church and by an entry in a burial register. Both certify to the fact that John Steevens died in August, 1726. I have found no record of his birth, his property, or his work.

I have found in Essex the country house that the George Steeveness (father and son) occupied as lords of the manor. The house, which is called Dunton Hall, is actually a medieval structure with Eighteenth Century additions. It is now woned by a wealthy farmer, who is proud of his home and all its appurtenances.

In Survey and Cambridgeshire, as well as in London, Essex, and Bucks, there are, I think, some long-lost keys to the personal history of George Steevens, I may visit Eton and the Kingston Grammar School, where many historical monuments still invite a concern with earlier days. King's College, Cambridge, also must be explored. Academic life at Cambridge in the Eighteenth Century makes a large part of the story of George Steevens. I am continuing the search in Essex but shall probably not discover any hoard of Steevensiana in the attic or outer precincts of Dunton Hall.

Ensor Appoints Philip Schaeffer

Philip B. Schaeffer, class of 1948, has been appointed assistant treasurer of the college President Ensor announced this spring.

Mr. Schaeffer is the son of Carl Lawyer Schaeffer, treasurer of the college, who graduated in 1914. He assumed his duties in April.

The new college officer had been living in Pittsfield, Massachusetts where he was production manager for the ordnance department of General Electric. Mr. Schaeffer is now making his home in Westminster.

He entered Western Maryland as a freshman in 1942 but interrupted his college career for army duty during the war. Mr. Schaeffer returned to campus in 1946 to complete his college work.

NOTICE

Please notify the Alumni Office whenever you change your address or marital status. Bulletins, notices of Homecoming and reunions and other mailings will not reach you if your address is not kept current.

Russian Classes Attract Crowds

More than 80 students of all ages turned out this spring for a series of classes in the Russian language offered by the college.

Twice a week two sessions of the class were held in the evening after dinner. College students and faculty were joined by junior and senior high school students and residents of Carroll County and nearby Pennsylvani. The college offered the course without charge as a public service to the community.

Response to the language course was overwhelming. Dr. Joseph Bailer, head of the education department who arranged for the sessions, felt sure that 40 or so people would turn out. The first evening the classroom had to be changed to a large lecture hall and the second evening the class had to be divided into sections.

Mrs. Helena Kruger, originally from Siberia, taught the course. She has been employed as an interpreter at the Brethren Center in New Windsor.

It was found that Russian is a great leveler. Faculty members with years of experience in other languages had no easier time than the high school students just beginning a language.

TENNIS, GOLF ENJOY Satisfactory year

The golf and tennis teams had satisfactory seasons this spring while track and baseball found that more building is needed.

Led by Coach Frank Hurt the tennis team posted a 10-5.1 record to earn second place in the northern division, Mason Dixon, The team loses only Senior Bruce Lee through graduation and looks forward to a good season again next year. Freshman Phil Brohawn is very promising, winning all his matches for the season.

The golf team won third place in the Mason Dixon tournament and compiled a season record of 4-4-0. The team will have many of the same players returning.

After a promising start in its southern tour during spring vacation, the baseball team failed to make the .500 mark. The season record was 4-11-0. Coach Dick Pugh is hoping for better results next spring when many of the same players will be returning.

Coach Dick Clower's track team, while breaking some Western Maryland records, managed only a 1-5-0 record in duar meets and 8th place in the Mason Dixon meet. The team, which was plagued by injuries, loses Jim Lewis and Roy Kennedy via graduation.

OVER THE TOP-Jim Lewis, graduating track star, takes a final turn at the high jump.

SPRING COMES TO THE HILL

Spring on the Hill — there are a number of ways to think of it: Grass turning green, Mrs. Jefferson out weeding the flower beds in Robinson Garden, dogwood on the golf course coming into bloom, the final ROTC inspections.

Perhaps, though, the description in the 1959 Aloha sums it up best of all: "... April found the campus turning green, while sunbathers acquired varying shades of red and bronze. Spring fever was much in evidence, amateur athletes vied for a spot on the tennis courts, and

young men developed an increased in terest in young women (ed. note-and vice versa). The stag line migrated from the gloomy depths of the Rec Hall to the sunny curb outside, a better vantage point for watching the girls go by. Outside the Grille, tables blossomed with bridge games.

"Work of all sorts was regarded as the cruelest drudgery. Teachers lectured to sparsely populated classrooms, while librarians found themselves governing an empty library. A few enterprising individuals did manage to combine studying with the great outdoors, but in most cases the last few weeks before exams were spent in a siege of inspired and remorseful cramming."

WESTERN MARYLAND COLLEGE August, 1959

The **BULLETIN**

Dear Fellow Alumnia

It is indeed a rare privilege to be able to contact the entire Alumni group of Western Maryland College at "one fell swoop."

Scattered as you are around the world, and as members of the ever-increasing "Western Maryland Family," you are and shall continue to remain, as you know, her constant interest and concern.

Your Alumni Association was recently singularly honored by the Board of Trustees of the College, by their adoption of a resolution granting appointment of active committee memberships to Alumni Visitors. As many of you know, the Alumni Visitors have been participants at the Board of Trustees' sessions for perhaps more than twenty years, but now, in addition, this new progressive step of actual participation on the Trustees' working committee's deliberations has been taken. This new mechanism has already been activated with considerable success.

We would be remiss indeed in our report to the Alumni, if we did not describe in well-deserved superlative terms, the enthusiastic services of George Meyls as Chairman of the Alumni Fund. This year's Fund is the greatest ever, with more than \$20,000 subscribed by the Alumni and friends of the College.

Of course, in this same vein, we owe a tremendous vote of thanks to Phip Uhrig, our Executive Secretary; Nancy Winkelman, Editor of the Bulletin, and their associates in the Alumni office, who actually work day and night during the Fund campaigns to get all the material mailed, and generally supervise the mechanics involved. It is no small task to send out successive and rather complex mailings to more than seven thousand Alumni and friends, all the paraphernalia to class agents and sub-agents, and finally, the correlation and strict recording of campaign results.

Our Chapter activities are in most instances thriving and vigorous. We have recently established a second Chapter on the West Coast, and a brand new organization in Wilmington, Delaware, which was, incidentally, officially launched by Dr. Ensor. We are grateful indeed for the loyalty and cooperative spirit which all Chapters have continued to exhibit with our office, and it is our sincere hope that it will be possible to visit most of the Chapters sometime during our administration.

We want the Chapter officers and members to know that all of us connected with the Alumni Association will lend every support to further your aims and objectives, and we would sincerely appreciate any suggestions or recommendations that you wish to forward to us at any time. You can rest assured that any program you propose will be given earnest consideration.

In conclusion, I want to express my deep respect and admiration to Dr. and Mrs. Ensor, Chairman Murray Benson and the Board of Trustees, and the Faculty and Staff, who have been so kind, considerate and gracious in all our Administration and Alumni collaborations.

Cordially yours,

Rale Mattuces

COVER STORY

Members of the Class of 1929 presented the first flag pole to the college at the time of their graduation. This year in honor of its 30th reunion the class presented a 49 star flag to the college to be flown this one year before the 50 star flag becomes official. President of the class, Roy Chambers, made the presentation to Major Alfred V. Clark of the ROTC program just prior to July 4th.

Accepted for mailing at special rate of postage provided for in section 1103, act of October 3, 1917. Editor, Vancy Lee Winkelman, '51

WALTER H. CAMPBELL, JR.

CATHERINE RUDOLPH REEDY

JEANNE PATTERSON ENSOR

BOARD ELECTS 4 MEMBERS Harmon To Coach

At the annual meeting May 2 on campus the Alumni Association Board of Governors nominated two members each for the Board of Governors Class 2 and 5 and for Treasurer. Elections were held at the Alumni Banquet on May 30.

Elected to the Board of Governors, Class 2, were John M. Robinson, '43 and Walter H. Campbell, '53, Elected Visitors to the Board of Trustees were Jeanne Patterson Ensor, '48 and Catherine Rudolph Reedy, '39. Philip Schaeffer, '48 was elected treas-urer, Mr. Schaeffer took over the position from his father Carl Schaeffer, '14

The Board of Governors is made up of the officers of the Board, the club officers and elected members. Class two members serve for three years as do class five members. The only difference is that Class 5 members attend meetings of the Board of Trustees. This spring as President Mathias mentions in his letter on page 2 the visitors were granted committee memberships. Officers serve on the Board for two years. Club officers serve as their individual clubs elect

Some background information on the new Board members follows: "Nemo" Robinson went to Ft. Benning immediately following graduation and from there went on duty with the 78th Infantry Division in the States and the European Theater. He was with the unit from October, 1943, until June of 1946. In September, '46, Nemo started teaching and coaching at Gilman School in Baltimore and remained there until June, 1956. At that time, due to his father's death, he took a leave of absence to take over the family business. He has since given up teaching but continues to coach the basketball team. Over the past four year period Nemo's teams have won 48 games while losing 16. They have taken two Private School Divisional Championships. Nemo's wife, the former Jane Miles, was a member of the class of '45. They have two daughters, Margie, 11 and Linda, 9 and a son, Johnny, 4. The new Board member is active in his real estate business, the Ki-

wanis club and the Lochearn Presbyterian

'Soup'' Campbell of Easton, Maryland also went into the Army at graduation. He served for two years as an instructor in both M-1 rifle and machine gun at Forts Gordon and Jackson. After the Army he began teaching U. S. history at Easton Junior-Senior High School where he has been since 1956. He also coaches the varsity soccer team and the JV basketball team. "Soup" says that if things go according to plans he will receive his M.Ed. from West-ern Maryland late this summer or in the early fall

Catherine Rudolph Reedy, who graduated in 1939, has been class chairman of the Alumni Fund for the past two years. A resident of Baltimore, she has two chlidren, a daughter sixteen and a son fourteen. The new Board member has been a Girl Scout leader in Baltimore and is a member of the Second Presbyterian Church where she has been a circle leader, membership chairman and corresponding secretary of the Women's Association. She is now teaching second grade at Towson Elementary School

Jeanne Patterson Ensor is married to Joshua Ensor, Class of '46. They have a daughter, Carole Scott, 9, and two sons, Johnny, 7 and Douglas Nelson, born in New 1968 Part and Labe Joint He Her State May, 1958. Pat and Josh originally lived in New York City while Josh was located in the New York office of the Justice Department. In 1954 he came to the Washington office of the FBI and the family moved to Williamsburg Village in Montgomery County, Maryland. Pat has been active in PTA serving as President of the Olney Elementary School Chapter and as a delegate to the County Council of PTA's. She has worked with the Girl Scouts, was district chairman of the United Givers Fund and is treasurer of the Olney Citizens Association. She is senior counselor of the Methodist Youth Fellowship at Ashton and is secretary of Youth Work. Prior to her election as an Alumni Visitor. Pat had served as secretary of the Washington Club and the Board of Governors since 1956.

Soccer Team

S. Dennis Harmon, Jr., '57 has been ap-pointed soccer coach at Western Maryland by President Ensor.

Dennie, who is from Garrison, Maryland, was a soccer star while on the Hill. He will take over direction of the team from Philip E. Uhrig, his former coach. Dennie will be a graduate assistant in the athletic department coaching golf as well as soccer and helping in the intramural program under Ronald Jones, '55. He is planning graduate work in the education department.

The new coach, son of Mr. and Mrs. Samuel D. Harmon of Garrison, was a business administration major while on the Hill. He played soccer, basketball and baseball. His last three years at school he was captain of the soccer team and was twice named to the All American Soccer twice named to the All American Soccer Squad at center forward position (seasons of '54-55 and '56-57). Since graduation Dennie has been in the Army and was working for an insurance firm. He received a reserve commission at graduation.

IN HIS HONOR--President Lowell S. Ensor shook hands with William R. Winzlow, on the left, digrt the new student union building maned for him was dedicated on May 30. Mr. Winslow, a Washington businessman, is a member of the Board of Trustees.

STUDENT UNION BUILDING OPENS

The new student union building known as the Winslow Student Center was dedicated in a special ceremony the afternoon of Alumni Day, May 30.

cated in a special cerefining on interneous of Alumin Day, Mock Day, Mock Day, Mock Day, Mork Day, Mork Day, Mork Day, Mork Day, Mork Day, Mork Day, Milliam R, Winslow of Washington, D. C. Mr. Winslow is a member of the building and grounds committee of the Board who has shown a considerable interest in young people throughout his life.

During the ceremony, keys to the building were presented to representatives of the student body, the bodskrore staff and the faculty. The keys were to the areas of the new building specifically designed for them. Chairman of the Building and Grounds Committee, D. Carlysle MacLea, presented the building to Trustee Chairmon F. Murray Benson.

man F. Murray Benson. The building was immediately put into use and because of its air conditioning has been especially popular with summer residents of the campus. Located just beyond the entrance to the athletic fields, the two story building looks out toward Hoffa Field.

story building looks out toward Hoffa Field. Winslow Student Center is 118 feet long, 62 feet 8 inches wide at the larger end and 44 feet 8 inches wide at the end. Its entrance hoors giving a split level uffect. All mechanical equipment for the air conditioning and heating units is located in a third underground level.

NEW GRILL IN USE—Immediately following dedication ceremonies visitors to the campus tried out the new facilities. This view looks toward windows which face out on the road leading into Hoffa Field. The bookstore would be to the right and the fountain to the left.

Fund Passes Goal

by Philip E. Uhrig The 1959 Alumni Fund is a success. For the first time since its inception in 1947, the goal has been reached. In fact, the \$20,000.00 mark has been passed and at this writing, July 16th, the total is \$25,021.51.

To single out one reason for success this year would be a difficult task. Excellent leadership, good class organization, dili-gence, timing all were important ingredients. The most significant of these probably was the tremendous increase in the number of class agents working for the fund.

Under the enthusiastic leadership of George A. Meyls, Jr., '22, fund chairman, over 300 class agents formed the basic fund working the state of the basic fund-working organization. The result: more enthusiasm, greater participation, higher totals—a successful campaign.

A look at the table below gives a good indication of what this growing enthusiasm has meant over the past few years.

1956- 941 donors contributed \$14,010.00 1957-1.283 donors contributed \$16,744.01

BUSINESS, INDUSTRY CONTRIBUTE TO WMC

In addition to the Alumni Fund Western Maryland benefits from gifts from business and industry and contributions from the Methodist Church.

This year the total funds from these two sources amounted to \$50,808.19, a sig-nificant amount of money in the college budget. This includes: from the Association of Independent Colleges of Maryland—a combined appeal to business and industry-\$18,273.45; from the Baltimore Annual Conference \$31,900.00 and from business and industry not through the Association, \$634.74

The Association of Independent Colleges in Maryland has made healthy and continuous growth since its inception in 1953. In the six complete fiscal years since es-tablishment 242 separate contributors have made 538 separate investments in the pro-gram. The dollar total of these 538 separate stant. The dollar total of these 538 separate investments is \$267,311.47. In the fiscal year 1957-58 the volume of support was \$70,412.76 with 127 contributors. In this fiscal year 197 contributors invested \$82,489.97. Of the Western Maryland total, \$1,100 was in direct gifts to the college. The fund from the Baltimore Conference

is based on \$.50 per member. In 1959 the church expects to raise \$90,000 which will be apportioned between Western Maryland, American University and Wesley Seminary. This is the conference contribution to the Church's Quadrennial emphasis on higher education.

Four firms contributed directly to Western Maryland College as part of their sup-port of higher education. They were: Gulf Oil Company, \$259.74; Metropolitan Tourist Company, \$200.00; Westminster Laundry, \$125.00; and Household Finance Corporation, \$50.00.

1958-1.127 donors contributed \$17,695.00 1959-1,495 donors contributed \$25,021.51

A closer look at the record of individual classes reveals some surprising results. Top honors in several categories go to the following classes:

1929-highest total-\$1,808.00 under chair-man Joseph L. Mathias, Jr. Running a close second was Walter Short's 1908 class with a total of \$1,765.00.

1950—highest number of contributors, 69 with John Silber at the helm. Close on his heels came Malcom Meltzer's 1951 class with 64.

But the honor of having one hundred percent participation still rests with the Class of 1901. For the third year running Col. T. K. Harrison, who has been spending a year in England with his daughter Jane, managed a successful defense from foreign shores, retaining the unique title in percentages. His closest contender, 1907 under the chairmanship of E. McClure Rouzer, posted 93 percent. Covering all classes, 32 percent of the alumni contributed this year.

Statistics do not tell the whole story. Though they are interesting to read and are significant in value to the total effort, more important is the fact that Western Maryland alumni are showing increasing interest in their Alma Mater. Of course the Alumni Fund is only one evidence of this growing affection, but an excellent indication that alumni and friends are greatly interested in the future of higher education on the Hill.

Except for designated gifts, the bulk of the Alumni Fund is being used to support the adumni rund is being used to support the faculty salary program at the College. Quality of instruction produces a quality product—our graduates. The importance of this statement cannot be over emphasized. As our independent colleges continue to face the problem of maintaining strong faculties in a highly competitive market, alumni funds dedicated to this purpose, continue to strengthen the program. It is important too that the Western Maryland faculty know our alumni are interested in the total program of instruction, one guar-antee toward a stronger Western Maryland College

Special Fund

This year the Class of 1924 celebrating its 35th reunion has started a special fund. It will be used to make some addition to the facilities of the Winslow Student Center in honor of deceased members of the class. The funds collected thus far were added to the class Alumni Fund total.

Contributors to the Fund

Following our policy of former years, class totals are shown only where there is more than one contributor from a class. Percentage participation is based on the number of graduates solicited. Class listings include those contributions re-ceived before the Bulletin deadline. Contributions which arrived later will be listed in the October Bulletin.

In addition to percentage participation the percentage of increased class participation is shown.

Alumni Conference

PRESIDENTS MEET TO DISCUSS CLUBS

An annual conference was the suggestion of those attending a weekend meeting of alumni club presidents or their representatives on campus September 11 and 12.

The Alumni Office had invited each club to send representatives to this first conference designed to introduce the officers to each other and in addition generally explore common problems, perhaps reaching some helpful conclusions.

Twenty alumni, representing seven of the 13 clubs and the association officers, arrived on Friday evening. After an introductory session they spent the evening getting acquainted and discussing some of their problems.

On Saturday a series of three sessions was had followed by a general summary which closed the conference. Topics were: Club Organization, Club Programming and the Annual Alumni Fund. With short breaks for coffee and lunch, conference members worked all of Saturday trying to arrive at solutions to such questions as: How to get more people to help with club work, why don't more people come to meetings, what kind of program should we have, do clubs need projects and if so, what kind? Almost every aspect of alumni activity was looked into and some conclusions were reached.

Each session opened with general remarks by a member of the Alumni Office. A discussion leader and recorder then took over the meeting. Minutes made by the recorders were used in the final session when a summary of the entire conference was made. Copies of the remarks and the discussion summaries were sent to each alumnus attending, all club presidents and the Board of Governors.

Club organization dealt with constitutions, membership, the need for committees, officers and the responsibilities for organizing and maintaining an alumni club. In this sessino conference members were made aware of the facilities of the Alumni Office and the kind of service available to them to make their work easier and also more thorough.

The session on club programming concerned timing and number of meetings with particular emphasis on starting to plan far enough abead to give membership amplenotice. Everyone agreed that meetings drawing on something from the collage have the most appeal. Various types of programs, including those giving recognition to alumni, were mentioned. Most conference members such the merit of some sort of project for the clubs but none felt that these should be standardized.

The successful 1969 Alumni Fund Campaign was reviewed so that the alumni could understand how it operated and what factors seemed to be responsible for its success. Fund chairman George Meyls was also present. It was the consensus that directors of the Fund not use the club structures for any broadening of regional solicitation.

Throughout the weekend conference members continually found themselves borrowing ideas from each other or receiving helpful warnings from someone who had tried out a particular suggestion and found it. wanting. It was generally agreed that alumni are the life blood of a college, bound together by the regard they hold for their school, their pride in it and a desire to identify themselves with its future, promoting its interest and welfare. They subscribed to the theory submitted that alumni get together to express ways of supporting the college as well as to hear what is going on and renew acquaintanceships. The officers agreed that they should understand and develop this desire in club activity.

Conference members were unanimous in their opinion that such a conference be made an annual affair with, in future years, the Board of Governors also being invited.

Those attending were: F. Kale Mathias, Alumni President, and Mrs. Mathias: C. Lease Bussard, Alumni Vice President; Alleck Resnick, Past President: Harold M. Lewis, Wilmington Club: C. Dietherh Ward, Baltimore Club: Maradel Clayton Ward, Baltimore Club: C. Frasier Scott, Washington Club: Betty Baker Englar, Frederick Club: Gay Smith Mullican, Prederick Club: Joseph Snyder, Washington County Club: John Mansbeaker, Carroll Connty Club:

BISHOP G. BROMLEY OXNAM

Has called a series of meetings in the Baltimore Conference to open the library campaign.

Campaign Started to Build New Library

The Baltimore Annual Conference at its June session voted to raise \$350,000 to assist in erecting a new library building on the campus. This will be the Conference's four years.

The proposed library building is expected to cost about \$750,000. In 1951 Mr. and Mrs. Walter H. Davis of Westminster presented a fund of \$250,000 to the college for a new library. This fund has since grown to approximately \$400,000 and will be available when needed.

For some years the inadequacy of the present library has been of concern to Western Maryland. However, the archimade it uneconomical to enlarge. It will Dr. Ensor. however provide needed facilities for the tion.

tutions of higher learning within the Baltimore Conference related to the Methodist Church. The others are Wesley Seminary major financial emphasis during the next and American University, both now located in Washington.

The amount of money which must be raised will be apportioned to the churches of the Conference. One-fourth of the amount will be included in 1960-61 budgets if the churches so desire. Some of the churches may decide to use other plans to raise the money. In addition, contributions made directly to the college by individuals will be credited to the church to which the member belongs. There is also a memorial protecture and location of the present structure gram planned which is being handled by

In order to present Western Maryland's Methodist Church Fine Arts department after some renova- case to the churches of the conference a series of meetings have been planned and Methodist Church

Western Maryland is one of three insti- are being held this month. Bishop G. Bromley Oxnam is speaking in each district to representatives from each church in the district who have been invited by their respective superintendents. Dr. Ensor will accompany the bishop. The College Choir has also planned a short program.

Meetings have been scheduled in the following churches:

Baltimore West District - Wesley Memorial Church

Hagerstown District (1)-St. Paul's Methodist Church

Cumberland (Hagerstown District 2) -Center Street Methodist Church

Washington East District - McKendree Methodist Church Washington West District - Bethesda

Baltimore South District - Pasadena

OLD MAIN COMES DOWN

A whole new aspect of the campus opened up as more and more of Old Main was torn down this summer. Some buildings took on a different appearance as they became visible from angles never before possible. Pictured from top to bottom starting at the left are:

1. McDaniel Hall slowly came into view as Hering Hall was torn down.

2. Baker Memorial Chapel got covered with dust but finally stood alone on top of the Hill.

3. Many alumni will remember the fancy iron columns in the former dining hall, later the Rec Room.

4. The wrecking crew takes the first bite out of the familiar Old Main tower.

5. The old Alumni Office forlornly waits for the scoop.

6. At one point the original building once again stood by itself looking down on Westminster.

7

EUGENE M. NUSS

Professor Receives Grant Fellowship

Assistant Professor of Education Eugene M. Nuss has been awarded a Grant Foundation fellowship for 1959-60. Professor Nuss has been awarded a leave of absence and will work at the University of Maryland for the next year.

The fellowship is administered through the Institute of Child Study at the University of Maryland. It enables a doctoral candidate to do full-time graduate work in the field of human development, education. Mr. Nuss will be taking a number of courses and plans to outline his dissertation. He will conduct an experimental study.

The education professor came to Western Maryland in 1955. He received his B.S. from Bloomsburg State Teachers College and an M.S. from Temple University. He has done preliminary work on his doctorate at the University of Maryland.

Please Keep The Alumni Office Informed Of Any Change In Your Mailing Address or Marital Status

SIX ADDED TO FACULTY

Six members joined the college faculty when school opened this fall. They entered the chemistry, biology, religion, psychology, education and military science departments.

Dr. Charles R. Eberhardt is Visiting Professor of Religion in the absence of Dr. Charles E. Crain. Dr. Crain is studying this year at Oxford University on a fellowship. He and his family left for England late this summer.

Dr. J. Lloyd Straughn, professor of chemistry, returns to the campus after an absence of six years. Dr. Straughn recently left the Aeroprojects, Inc., company in Pennsylvania.

Other new members of the faculty include: Lt. Col. Paul Vernon Fogleman, professor of military science and tactics; Dr. Henry Natunewicz, associate professor of psychology; Herbert L. Davis, instructor in biology; and Gilbert Hall, instructor in education.

Dr. Eberhardt, a Presbyterian minister, had been pastor of churches in New Jersay and was Sprunt Professor of Bible at Davidson College before he became founder of the Biblical Arts and Sciences Association in Monkton, Maryland. A graduate of New York University and Biblical Seminary. New York, he studied at the University of Basel, Switzerland, and University of Edinburgh, Scotland, and received the Ph.D. degree from Drew University. Dr. Eberhardt was the recipient of a Carnegic Grant for research in the Middle East and is a fellow of the Royal Geographical Society of London.

Dr. Straughn came to Western Maryland for the first time in 1942 after receiving his Ph.D. from The Johns Hopkins University. He had previously received a Master's degree in chemistry there following graduation from Mansfield State Teachers College in Pennsylvania with a B.S. in education. Dr. Straughn has been living in West Chester, Pennsylvania.

Lt. Col. Fogleman is now in command of the ROTC unit at Western Maryland. Originally from North Carolina, he received the B.S. degree in education from the University of Georgia. The ROTC commander comes to Western Maryland from a tour of duty in Korea.

The new associate professor of psychology, Dr. Henry Natunewicz, was born in Poland. He received an A.B. from Stanford University in social science after previously studying chemical engineering at Cornell. He received the A.M. from University of Michigan in political science and sociology and his Ph.D. from Columbia in science. He has also studied public administration and law at Harvard, psychology at the University of Chicago and psychosomatic medicine at Northwestern. Dr. Natunewicz was professor of psychology at Chicago Teachers College before joining the Western Maryland faculty.

Gilbert Hall, instructor in education, was formerly guidance counselor in Washington County, Maryland, He received his B.A. from University of Maryland, the M.A. from Columbia and is now doning further graduate work at the University of Maryland. He has also studied at the Andrew Newton Theological Seminary.

The biology instructor, Herbert L. Davis, comes from Flat Rock, North Carolina. He received his B.S. from Berry College in Rome, Georgia, and an M.A. this August from Emory University in Atlanta.

Three Foreign Students Enter Western Maryland

Three foreign students were among the 293 entering students at Western Maryland this fall

Miss Marianthy Pappadopoulou of Athens. Greece, graduated from Bethesda-Chevy Chase High School in 1966 after spending her senior year in the U. S. as an exchange student. She has since taught English classes in Sparta and at the Institute of American Studies in Athens. Miss Pappadopoulou plans to major in English literature.

Lazzlo Zsebedics was the second Hungarian to enter Western Maryland. George Varga, who arrived in this country with Mr. Zsebedics, is now a member of the junior class. Both left Hungary at the time of the anti-Communist uprising. Mr. Zsebedics was educated in Gyor, Hungary, and had worked in a bank, as a bookkeeper in a factory and served two years in the Hungarian Army before arriving in this country. He plans to major in physical education.

Miss Kyung Sook Synn of Seoul will use the name Kay while a student in the United States. She has been attending the Kyunggi Women's College in Seoul and will major in music while at Western Maryland. Miss Synn's father is a member of the foreign service department of the Korean Government.

Enrollment Hits Peak

Enrollment at Western Maryland went to 751 students this fall. Two hundred ninety-three new students arrived on campus Wednesday, September 23, for Orientation. Totals may change but these are the figures as the BULLETIN is written.

Upperclassmen returned to register on Monday, the 28th, and Fall Convocation officially opened the year on September 29. Peak enrollment has filled all available dormitory space and even the temporary housing the college arranged.

Following tradition most of the new students are from the Maryland area. There are 227 from Maryland including 66 from Baltimore. The next largest group of students is from New Jersey-35. New Hill residents have also come from New York, Delaware, Pennsylvania, Connecticut, Virginia, Ohio, Georgia, Florida, Greece, Korea, Canada, Hungary and Indonesia.

Breakdown by classes:

Class	Men	Women	Total
Senior	76	56	131
Junior		81	152
Sophomore		97	174
Returning	224	234	457
New		145	293
Total	372	379	751

Western Maryland's full enrollment follows the nationwide trend as more and more students reach college age. By mid-June the college Admission Committee had reviewed applications from over 1,000 students and women's enrollment had been closed since very early spring.

Of course the incoming students found changes other than in numbers. For the first time they will all have an opportunity to use the new Winslow Student Center which was dedicated on the last day of school in the spring. The building was in use during summer sessions. And, of course when they arrived Old Main was gone giving a whole new look to the campus.

MALCOLM NAMED PRESIDENT

Dr. Gilbert Malcolm was installed as 23rd president of Dickinson College in June. Dr. Malcolm, a graduate of Dickinson, received an honorary doctor of laws degree from Western Maryland in 1948.

The new president has been an administrative officer at Dickinson since 1922. He became vice president in 1946.

LAST CLASS IN OLD MAIN—This art class taught by Miss Louise Shipley this summer was the last class to be held in Old Main. Shortly after the summer session was over razing of the building began. Pictured are: Don Hobart, Ed Lukemire, Robert Moss, Elizabeth Wentz, Miss Louise Shipley, Evelyn Snyder, Joan Patterson.

HOME EC., ART IN NEW HOMES

Home economics and art are gradually getting used to new homes—art in the former home of the Seminary president and home economics in the former administration building.

Of course, for art, this is expected to be only a short stay. The department of Fine Arts is scheduled to take over the present library building when the new library is completed.

Home economics will be the same and yet different in its new surroundings. The department took with it much of the equipment used in the old quarters and in the surroundings will be familiar. The sewing and art labs are located along the side of the building nearest the Uniontown Road. The apartment facilities are on the side nearest the rest of the college. Rooms for home ec majors in their senior year have been located on the upper floor.

The former management house is now being used by upperclass women as a dormitory.

Wilmington Alumni Start New Club

Forty alumni from the Wilmington area dined at the University Club in that city Friday, April 10, at the first meeting of the newly organized Wilmington Alumni Club.

Thus the thirteenth Western Maryland Alumni Club came into being. Those mainly responsible for organizing the new club were: Mr. and Mrs. Thomas Reed, Mr. and Mrs. Harold Lewis, Mr. and Mrs. Leonard Zawacki and Mr. and Mrs. Donald Wassmann.

On hand from the Hill to help inaugurate the program were Dr. and Mrs. Lowell S. Ensor, F. Kale Mathias, Alurmi Association President, and his wife, and Mr. and Mrs. Philip E. Uhrig. Dr. Ensor was the principal speaker.

Alumni from a 35-mile radius surrounding Wilmington were invited to attend. This area includes parts of Delaware south to Dover, Cecil County, and parts of Pennsylvania north to West Chester and Media. Three meetings are planned for the coming year under the direction of the following officers: Thomas Reed, 28, president; and Kathy Bliss Wassiman, '51, secretary-treasure;

Hawkins Makes School Study

Dr. Earle T. Hawkins, '23, president of State Teachers College at Towson, is in the Philippines making a five-month study of the public school system.

Dr. Hawkins joined five other prominent educators who are making the tour. They left in August and will return by March 1, 1960. The team of educators, including representatives of both the east and west coasts, was requested by the Philippine Government through the International Cooperation Administration of the United States Government to survey all public school education in the Philippines, and to help chart educational objectives in that country for the next decade.

Members of the team plan to visit and observe all facets of the educational system. They will discuss problems with teachers, administrators, parents and government officials. The Philippine Government is anxious to develop a system of public schools which will take into account the cultural patterns of the country.

Currently a member of the executive committee of the Middle States Association of Colleges and Secondary Schools, Dr. Hawkins previously served for five years on the Commission on Institutions of Higher Education of that organization. He has also been a member of the National Commission on Accrediting and is on the Board of Directors for the National Study of Secondary School Evaluation. He was a member of the Governor's Commission for the survey of higher education in Maryland in 1954-55. He has served as president of the Maryland State Teachers Association and vice president of the National Education Association.

After receiving his B.A. from Western Maryland, Dr. Hawkins went to Columbia for his M.A. and Yale for a Ph.D. degree. He served as principal of the Chesspaceke City High School in 1928-29 and then was principal of Bel Air High School before joining the Maryland State Department of Education where he served for nine years. He has been president of State Teachers College at Towson since 1947.

FORMER PROFESSOR DIES

James Widdowson, a former dean of the college and at one time president of Frostburg State Normal School, died in August at his home in York. Mr. Widdowson was 86.

JAMES BOYER

Heart Attack Fatal to Boyer

Athletic trainer and former coach at Western Maryland, James M. Boyer, died this summer at his home in Westminster. He was 51.

He had been on the Western Maryland staff, part time or full time, for many years. Prior to his first heart attack about two years ago Jim had been coach of the baseball team in addition to his duties as trainer.

Jim had played some pro ball before becoming an American League umpire. He worked the World Series in 1947. He had also been a prep school athletic director and a basketball coach.

As a trainer Jim had a close association with men students on the campus forming some very firm friendships. One of these former students, now a coach himself, asked that some tribute be printed in the BULLETIN. His own thoughts follow:

"Jim was a friend.... I'm sure the one thing he demanded was simple sincerity. As a man Jim had the two traits that are the most important—self respect and the respect of all who knew him.

"Western Maryland College is something special and I doubt if it can be explained to a non-Western Marylander. It is in the air, a complete and sincere friendliness, an atmosphere conducive to learning and searching for truth. Jim in a simple homespun way contributed to this."

Fund Hits New High

In the August BULLETIN, the Alumni Fund showed a total of \$25,021.51 received from 1,455 donors. In closing out the fund report with this issue we are printing the names of those donors not previously listed. The total now stands: \$25,919.51 from 1,554 donors.
